PROFESSIONAL SUMMARY:

Analytical and collaborative Power BI Developer, expertise in designing, developing, and deploying interactive dashboards and scalable data solutions. Proficient in Power BI, SQL, Python, Databricks, Power Automate, and ETL automation, with strong experience in cloud platforms (Azure, GCP) and Agile project delivery. Skilled at translating business needs into intuitive visualizations, driving consistency in user experience, and iterating rapidly based on stakeholder feedback.

TECHNICAL SKILLS:

- **Business Intelligence:** Power BI, Tableau, Power Automate, Visio, SAS Studio, Microsoft Excel, Dashboard Development, Data Visualization, AWS Quicksight Reporting, BI Stack (Power pivot, Power query, Power map)
- **Data Engineering:** Databricks, Apache Spark, PySpark, Azure Data Factory, Apache Airflow, ETL, ELT, Data Pipelines
- **Databases:** SQL, Microsoft SQL Server, Oracle, MySQL, DynamoDB, Google BigQuery
- **Programming:** Python, Pandas, NumPy, PySpark
- **Cloud Platforms:** Microsoft Azure, Azure Data Factory, Azure Synapse, Google Cloud Platform, Snowflake
- **Data Management:** Data Integrity, Data Governance, Data Quality, Data Modeling, Statistical Analysis, Data Mining
- **Methodologies:** Agile, Scrum, Project Management, Iterative Development, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE:

HUG reading program, USA | May 2024 to Present

Data Analytics Engineer

Responsibilities:

- Experienced in Data Modeling used to define and analyze data requirements needed to support the business processes within the scope of corresponding information systems in organizations.
- Worked with data models with complex relationships in Power BI and connected different data sources to Power BI desktop.
- Published many reports and visualizations created to the Power BI service and thereby develop dashboards.
- Created SQL Joins, sub-queries and other SQL code to implement business rules.
- Developed new or modified SAS programs to load data from the source and create study specific datasets, which are used as source datasets for report generating programs.
- Experienced in working with DAX commands to pull up more calculated data out of the tables.
- Utilized DAX studio to improve the performance of the measures.
- Utilized Performance analyzer to analyze the performance of DAX measures, visuals and query that is running the measures.
- Worked with the use of Data Modeling Standards for all projects requiring a standard means of defining and analyzing data within an organization, to manage data as a resource, for the integration of information systems, for designing Databases/Data Warehouses.
- Developed internal admin tools using Power Apps and automated workflow notifications via Power Automate, streamlining communication with educators and program coordinators regarding student progress updates and resource allocation alerts.
- Experienced in Dimensional Data Modeling and some of the terms commonly used are Dimension Table, Attributes, Hierarchy, Fact Table, and Lookup Table.
- Created notebooks in Azure Databricks to transform data using Pyspark.
- Developed Monthly, Daily, Quarterly, Yearly Reports in Power BI.
- Familiar with all the types of cardinality relationships such as ONE - ONE, MANY-ONE, ONE MANY, MANY MANY.
- Utilized Power BI gateway to keep dashboards and reports up to-date with on premise data sources. And formatted dashboards, multiple chart types, trends and KPIs with Power View to support analysis.

- Ingesting Parquet files using ADF from multiple sources and loaded data into ADLS (Azure data lake Storage) using Pyspark in Databricks.
- Expertise in publishing Power BI reports of dashboards in Power BI server and scheduling the dataset to refresh for live data in Power BI server.
- Responsible for creating Row-Level Security (RLS) based on the business requirements.

Arch Pharma labs Ltd, India | July 2022 to July 2023**GCP Data Engineer****Responsibilities:**

- Executed data pipelines using Cloud Composer and Apache Airflow to automate ingestion and transformation of clinical trial and manufacturing data
- Created SQL-based transformation frameworks in Google BigQuery to build curated data layers supporting self-service analytics
- Collaborated with business teams to understand and validate workflows within Microsoft Dynamics 365 CRM, ensuring regulatory compliance
- Developed and executed comprehensive Test Strategies and Test Cases to ensure systems met business and regulatory requirements
- Established comprehensive documentation for data pipelines and quality rules, ensuring auditability and regulatory compliance
- Developed compliance tracking dashboards in Power BI to monitor trial milestones and manufacturing quality metrics
- Created automated data integrity checks and reconciliation scripts, achieving 99.9% accuracy in batch data processing

Aurobindo Pharma Ltd, India | January 2022 to June 2022**Data Analyst****Responsibilities:**

- Developed and optimized SQL scripts and stored procedures to extract and transform sales and supply chain data, improving financial report generation efficiency by 40%
- Designed and deployed Tableau dashboards to track inventory levels and sales performance, providing management with visual insights for strategic planning
- Conducted data cleaning and validation using Python Pandas, improving accuracy of monthly business intelligence and financial reports
- Assisted in migrating legacy Excel reports to Power BI, improving data refresh automation and interactive capabilities
- Managed user access and permissions for Oracle databases, ensuring data security and role-based controls
- Collaborated with cross-departmental teams in Agile environment to gather reporting requirements and translate business needs into technical specifications
- Authored and maintained centralized data catalog and process documentation for all major reports, reducing onboarding time for new team members by 50%

EDUCATION:

- **Master of Science in Management Information Systems**
University of Illinois Springfield | 2023-2025
