SUMMARY

Supply Chain and Demand Planning Analyst with 4+ years of experience in transportation analytics, demand planning, inventory optimization, and procurement analytics across retail, consulting, and manufacturing sectors. Proven track record of reducing logistics by 18%. Improving forecast accuracy by 18%, and automated reporting processes by 50%.

SKILLS

- **Data & Analytics:** Python (Pandas, NumPy, Scikit-learn), SQL, Advanced Excel (Power Query), Power BI, Tableau, Looker, MySQL, Git
- **Supply Chain Planning:** Strategic Sourcing, Inventory Management & Optimization (ABC, Safety Stock, EOQ), Capacity Planning, Procurement, KPIs, Logistics Optimization, Demand Planning & Forecasting, Supplier Negotiation, Supplier Risk Management, Lead Time, OTIF, JIT, Service Level, S&OP, Regression, Classification, ANOVA, Time Series Analysis, Applied Machine Learning
- **Stakeholder & Operations:** Stakeholder Management, Cross-Functional Collaboration (Finance, Quality, Manufacturing, Operations), Process Improvement (Lean Six Sigma, 5Why, Fishbone, DMAIC), Cost Reduction, Agile, Project Management
- **ERP Systems:** SAP (IBP, MRP, WMS, MM, PP, TMS, S4/HANA) Forecasting & KPI Tracking, Infor Polaris, RPA (UiPath), GCP

WORK EXPERIENCE

Supply Chain Analyst-Part Time | USM Supply Chain Consulting | Dallas, TX January 2026 – Present

- Improved forecast accuracy by 16% using MAPE and Bias based on historical sales, promotions, and inventory data S&OP reviews.
- Reviewed material inventory and developed action plans to improve inventory turns and reduce excess through MRP-driven analysis
- Automated SAP data extraction using Python, SQL, and UiPath RPA reduced manual effort by 35%.
- Built Power BI & Tableau dashboards to track inventory health, demand trends, and KPIs.
- Validated 500+ purchase orders, improving PO accuracy by 18% by using Excel and improved supplier on-time delivery by 22%.
- Reduced planning cycle time by 20% by eliminating process inefficiencies using lean tools (5 Whys, Fishbone).

Supply Chain Analyst | Walgreens | Sheridan, WY July 2025-December 2025

- Improved product availability by 12% by aligning forecasts with inventory planning across 8 distribution centers.
- Implemented demand forecast model using SAP IBP data integrated with Python and Excel-based planning models (VLOOKUP, Pivots) improved demand forecast accuracy by 20% partnered with inventory planners to refine seasonality and promotions.
- Built supplier scorecards dashboards in Tableau and Power BI that improved on-time delivery by 22% through KPIs within six months.
- Reduced transportation and storage costs by 11% through root cause analysis, and using EOQ, Reorder Point lowering excess inventory by 25%.
- Analyzed SKU-level performance data, with low sales and high holding costs, driving inventory adjustments and deactivations that reduced carrying costs by \$475k. and developed SQL and Python data pipeline to cleanse inventory data, cutting processing time by 40%.
- Owned MRP parameter management (lead time, safety stock, BOM) and automated SAP MRP-based procurement planning using Excel.

Supply Chain Analyst | - SRM Exim Private Limited | India August 2022-July 2023

- Reduced logistics cost by 8 to 10% through carrier performance using SAP TM and improved last mile delivery by 20% by analyzing SAP WM.
- Developed vendor scorecards, OTIF tracking by using Power BI and Tableau and improving supplier on-time delivery by 22%.
- Led monthly logistics performance reviews, aligning sales and operations teams, and improving On-Time In-Full (OTIF) delivery by 7%.
- Streamlined data extraction and reporting processes using SAP, SQL, Python and Excel, reducing manual reporting effort by 25-40%.
- Built SKU-level seasonal demand forecasts, improving accuracy by 15% and supporting cross-functional S&OP across sales and operations.

Demand Planning Analyst | Infor India Private Limited | India July 2019- August 2022

- Owned end-to-end demand, supply, and capacity planning across multiple industries, supporting EMEA customers.
- Developed monthly, and rolling 30/60/90-day demand forecast with statistical techniques in Excel and Python improved forecast accuracy.
- Led demand forecasting and capacity planning for 1,000+ global resources across enterprise products (LN, MRP, WMS, SCM) using Infor Polaris and Infor ERP, ensuring resources matched demand.
- Translated demand forecasts into capacity plans, resource allocations improved utilization by 20% and reduced idle time by 25%.
- Analyzed forecast performance (bias, variability, error) and refined planning assumptions resulting in more reliable forecasts.
- Created Power BI and Tableau dashboards to track demand planning KPIs and support S&OP pipeline reviews with cross-functional teams.

PROJECTS

AI Demand Planning & Forecasting Optimization August 2022-September 2025

- Built **SKU-Level forecasting** models in **Python** improved accuracy by **81%** to support **S&OP** and inventory planning decisions.
- Designed **Power BI dashboards** to visualize demand trends, forecast vs actuals, and planning **KPIs** for stakeholder reviews.

Supply Chain Reporting Automation Using UiPath December 2025-January 2026

- Designed **UiPath bot** to automate supply chain reports by extracting data from **SAP and Excel** and reduced manual effort by **30-40%**.
- Integrated **UiPath workflows with Excel and SQL** to **standardize KPI** reporting across **demand, inventory, and logistics** functions.

EDUCATION

Master of Science in Advanced Data Analytics – University of North Texas

August 2023 - May 2025

B. Tech in Electronics and Communication Engineering – JNTU, Hyderabad

August 2015 -May 2019

CERTIFICATION

Lean Six Sigma White Belt-Council for Six Sigma Certification **Supply Chain Analyst-** Rutgers, Unilever **Data Analytics**-Google
