Summary

Supply Chain Analyst with 3+ years of experience optimizing end-to-end operations, demand forecasting, and inventory management through data-driven insights. Skilled in Python, SQL, Tableau, Power BI, and SAP, with expertise in predictive analytics, supplier performance evaluation, and process automation. Adept at enhancing forecast accuracy, reducing operational inefficiencies, and enabling strategic, cross-functional decisions across global supply chain networks.

Technical Skills

Supply Chain Operations & Strategy: Supply Chain Planning, Demand Forecasting, S&OP, Procurement & Strategic Sourcing, Inventory Optimization, Logistics & Distribution Management, Supplier Relationship Management, Cost-to-Serve Analysis, Supply Risk Mitigation.

Data Analytics & Business Intelligence: SQL, Python (Pandas, NumPy), Power BI, Tableau, Advanced Excel (Power Query, Pivot Models), Data Modeling, Scenario Planning, Predictive Analytics, KPI Dashboards, Statistical Process Analysis.

ERP & Digital Supply Chain Systems: SAP (MM, SD, PP, IBP), Oracle NetSuite, Microsoft Dynamics 365 SCM, Kinaxis RapidResponse, Blue Yonder (JDA), Coupa Procurement, Manhattan WMS, Ariba, TMS Integrations, EDI Transactions.

Process Optimization & Performance Management: Lean Six Sigma (DMAIC), Value Stream Mapping, Root Cause Analysis, Supplier Performance Evaluation, Process Automation, Continuous Improvement, SLA Tracking, Cost Optimization, Compliance Reporting.

Collaboration, Leadership & Tools: Cross-Functional Coordination, Stakeholder Communication, Project Scheduling, Agile Workflows, Change Management, Jira, Confluence, MS Project, Google Workspace, Business Case Development, Strategic Decision Support.

Professional Experience

Supply Chain Analyst, Walmart

Aug 2024 – Present | Remote, USA

- Designed interactive Tableau dashboards integrating Snowflake and Oracle SQL to visualize replenishment trends across 150+ U.S. Distribution Centers, improving forecast accuracy by 12% and reducing out-of-stock incidents during peak seasonal shifts.
- Streamlined vendor performance tracking by automating data pipelines using SQL and Alteryx, reducing reporting delays by 23% and enhancing visibility into on-time shipment metrics.
- Supported network optimization initiatives by analyzing transportation cost patterns through Python (NumPy) and Tableau, identifying high-cost routes and recommending actionable logistics rebalancing strategies.
- Collaborated with category managers and demand planners to align seasonal inventory forecasts, leveraging Power BI and Azure Synapse for cross-functional scenario planning and stockout prevention.
- Partnered with data governance teams to standardize SKU classification and master data accuracy, ensuring compliance with Walmart's enterprise data standards and global sourcing frameworks.
- Facilitated quarterly S&OP cycles by synthesizing demand trends, distribution constraints, and supplier KPIs, enabling executive teams to make data-driven fulfillment and replenishment decisions.

Supply Chain Analyst, Micron Technology

May 2021 – Apr 2023 | Hyderabad, India

- Optimized semiconductor component forecasting models using Python (Pandas) and SAP IBP, improving material availability accuracy by 17% and reducing excess inventory costs across multi-tier vendor networks.
- Developed Power BI dashboards integrating SAP MM data, enabling real-time visibility into wafer supply, supplier lead times, and procurement cycle performance across regional production units.
- Automated data extraction pipelines using SQL and Azure Data Factory, streamlining reporting workflows and reducing manual data consolidation time by 28% for supply-demand alignment.
- Collaborated with global procurement and engineering teams to enhance supplier risk models, leveraging predictive analytics for early disruption detection in silicon and substrate supply chains.
- Coordinated cross-functional planning with logistics and finance teams, ensuring on-time delivery compliance, optimized shipment priorities, and alignment with quarterly production capacity targets.
- Supported supplier performance evaluations and compliance audits through detailed KPI analysis, fostering transparent communication and accountability across internal and external stakeholders.
- Facilitated weekly S&OP sessions with business leaders to align demand forecasts, production scheduling, and capital equipment readiness for next-generation memory product launches.

Education

Master of Science, Webster University

May 2023 – May 2025 | MO, USA

Information Technology Management

Bachelors of Engineering, Nalla Malla Reddy Engineering College

Aug 2018 – Jul 2022 | Hyderabad, India

Electrical and Electronics
