CAREER HIGHLIGHTS

SimWorld LLC

Nov 2022 - Oct 2025

Co-Founder & Chief Operating Officer

SimWorld is a funded business delivering immersive, revenue-generating virtual sports role-playing experiences that foster vibrant, inclusive online communities.

- Extracted, designed, and implemented AI-enabled operational workflows using SQL, Excel, and data reporting tools, automating reporting and monitoring processes and reducing processing time by 20%
- Conducted data analytics to forecast and manipulate large datasets across multiple systems using SQL, Python, and Power BI, generating actionable insights on user engagement, revenue performance, and platform growth
- Partnered with developers to review, debug, and validate AI-driven systems and large codebases, ensuring accuracy, reliability, and scalability.
- Leveraged modern AI tools and Tableau to prototype, test, and iterate on automation solutions, reducing manual operational effort and improving data visibility

FlowPath (AI-Based Facilities Management Platform – Startup)

Jan 2025 - Jun 2025

Sales Development Representative

FlowPath is an AI-driven platform that helps organizations streamline operations and automate facility workflows.

- Worked directly with CredentialStream and other data reporting tools on an AI-based facilities management platform, gaining hands-on exposure to AI-driven automation and analytics
- Applied willingness to learn to rapidly adopt new data processes and support lead qualification, messaging refinement, and pipeline optimization using data reporting tools
- Collaborated with sales and marketing teams to align AI-powered solutions with customer pain points and operational needs.

Interim Physicians (Healthcare Staffing Company)

Oct 2023 - Jan 2025

Sales Operations Specialist

- Optimized and configured AI-assisted outreach and sourcing tools to support recruiter workflows and improve provider engagement.
- Maintained and analyzed a CRM database of 300,000+ records, using data insights to improve outreach efficiency and recruiter performance.
- Identified strategies for evaluating key performance indicators, quality metrics, and outcomes to enhance AI-supported sales and recruiting processes

EDUCATION / CREDENTIALS

University of Alabama

B.B.A., Business Administration
