Summary

Data analyst with Summa Cum Laude honors in Statistics and Mathematics and a strong foundation in computer science. Skilled in Python, R, SQL, Excel, and statistical modeling, with hands-on experience analyzing large datasets, developing predictive models, and automating reporting workflows. Recognized for automating Salesforce reports, driving a 15% increase in lead conversion and enabling data-driven decision making.

Education

University of Minnesota-Twin Cities

May 2025

Bachelor of Science, Statistics, Mathematics

- **GPA:** 3.85
- **Achievements:** University Honors Graduate: Summa Cum Laude
- **Coursework:** Machine Learning, Algorithms & Data Structures, Regression Analysis, Applied Multivariate Methods, Cryptology, Advanced Programming Principles

Experience

Wave Dynamics

Dec 2025 - Present

Web Developer

- Transformed frontend application logic into backend services using TypeScript, improving system structure and separation of concerns and showcasing analytical thinking.
- Contributed to general backend development, including implementing APIs, refactoring existing code, and supporting core application functionality.

University of Minnesota – Twin Cities

Jan 2024 - May 2025

Teaching Assistant

Minneapolis, MN

- Guided weekly labs and office hours in Python and Java for 30+ students, strengthening programming proficiency and problem-solving skills, improving class performance by 10%.
- Evaluated assignments and provided feedback on data structures, algorithms, and backend development, reinforcing coding accuracy and efficiency while applying critical thinking.
- Consulted with faculty to design automated targeted exercises that improved student performance in algorithm design and computational thinking.

HighCloud Solutions

Oct 2021 - Feb 2023

Intern

St. Paul, MN

- Performed data modeling on customer usage and engagement data with Python and Excel, generating insights that informed product improvements and client strategy.
- Consulted with sales teams to automate Salesforce reports and queries, streamlining prospecting workflows and contributing to a 15% increase in lead conversion.

Skills

- **Programming Languages:** Python, Java, C++, R, SQL, OCaml, JavaScript, HTML, CSS, Arduino, MATLAB, Salesforce, Excel, AWS, CI/CD pipelines, Git, RStudio, MongoDB, LaTeX, Hive, Domo
- **Data Science & Analytics:** Machine Learning, Statistical Modeling, Regression Analysis, Data Visualization, Algorithm Design, Predictive Modeling, Mathematical Modeling, Data Modeling
- **Cloud & Infrastructure:** AWS, CI/CD Pipelines, Salesforce, RStudio, LaTeX, Excel, Linux
- **Core Competencies:** Analytical Thinking, Problem-Solving, Communication, Adaptability, Agile Teamwork, Critical Thinking, Package Solutions, Typescript, Docker, Kafka, Spock, React, Consulting Experience, Tech Industry Experience

Projects

Honors Thesis

Sep 2024 - May 2025

- Completed an honors thesis under Professor Nathaniel Helwig.
- Built machine learning models in RStudio to analyze NFL game outcomes using time and point differential, improving predictive accuracy by 20%.
- Applied predictive modeling, statistical analysis, and data science techniques to large, real-world datasets.

Python-based algorithm to model spatial power series

Jan 2024 - May 2024

- Worked under Professor Hannah Burson, designed and implemented a Python-based algorithm to model spatial power series from user inputs, demonstrating advanced problem-solving, algorithm design, and computational efficiency.

Awards/Leadership

- Recognized on the Dean's List for six semesters; graduated Summa Cum Laude with Distinction; honored as a UMN Scholar with Distinction.
- Served as Vice President of the Statistics Club, organizing events and coordinating guest speakers from industry.
