

# USHASWI SUDULA

## Supply Chain Analyst | 3 years

Massachusetts, USA | (508) 816-2279 | [ushaswisudula9@gmail.com](mailto:ushaswisudula9@gmail.com) | [Linkedin](#)

### Summary

**Supply Chain Analyst with 3 years of experience** in demand forecasting, production planning, inventory management, and supplier performance analysis across manufacturing and FMCG industries. Proficient in SQL, Python, Power BI, Tableau, and Excel for data analysis, automation, and visualization, with expertise in SAP ERP, AWS, and Azure to integrate and streamline supply chain processes. Skilled in developing automated data pipelines and interactive dashboards to support strategic decision-making, while collaborating with cross-functional teams to optimize lead times, material availability, and supplier relationships. Committed to delivering data-driven solutions that enhance supply chain efficiency, reduce costs, and improve overall operational performance.

### Skills

- **Programming & Scripting:** Python, SQL, R, Bash, VBA, YAML, JSON
- **Data Visualization & BI:** Power BI, Tableau, Excel (Advanced Pivot, Macros), Looker Studio
- **ERP & Supply Chain Systems:** SAP (MM, PP, APO, IBP), Oracle SCM, NetSuite, Manhattan WMS, Blue Yonder TMS, Coupa
- **Data Engineering & Cloud Tools:** Snowflake, AWS (Redshift, Glue, S3), Azure (Synapse), Google Big Query, Alteryx, KNIME, Apache Airflow
- **Forecasting & Analytics:** Time-Series Analysis, Regression, Monte Carlo Simulation, Scenario Planning, Demand Forecasting, Inventory Optimization
- **Generative AI & Automation:** ChatGPT, Microsoft Copilot, LangChain, AI-driven Demand Forecasting, Automated Reporting, RPA (Ui Path, Power Automate)
- **Process & Performance Management:** Lean Six Sigma (Green Belt), Tracking (OTIF, Fill Rate, Forecast Accuracy, Inventory Turns, Cost-to-Serve), Business Process Mapping (Visio, Lucid chart, BPMN)
- **Logistics & Procurement:** 3PL Management, Route Optimization, Freight Cost Analysis, Supplier Scorecards, RFP/RFQ, Contract Analysis, Vendor Relationship Management
- **Emerging Technologies:** Digital Twins, IoT in Logistics (RFID, Sensors, Real-time Tracking), Blockchain (Supply Chain Traceability, Smart Contracts), ESG & Sustainability Reporting

### Professional Experience

#### Supply Chain Analyst - General Motors

Jan 2025 – Present | US

- Conduct supply chain data analysis using SQL, Python, AWS S3, improving demand forecasting accuracy by 12% and optimizing production scheduling.
- Build and maintain Power BI dashboards tracking KPIs like on-time delivery, fill rate, inventory turnover, reducing reporting cycle time by 35%.
- Collaborate with procurement/logistics teams using Azure Data Factory to optimize supplier lead times, enhancing material by 9% across plants.
- Perform root cause analysis of supply disruptions using Python Pandas, reducing downtime incidents by 15% and improving supplier reliability score.
- Automate data extraction and transformation via SQL, AWS Glue, cutting manual effort by 40% and enabling faster decision-making for managers.
- Track supplier performance KPIs in Tableau, integrating data from SAP ERP and AWS Redshift to identify improvement opportunities quarterly.

#### Supply Chain Analyst - Hindustan Unilever Limited

June 2021 – July 2023 | India

- Managed inventory planning across distribution centers using SAP ERP, AWS S3, reducing stock-outs by 10% and improving order fulfilment rates.
- Forecast demand trends via Power BI, SQL, increasing forecast accuracy by 14% and enhancing procurement planning efficiency.
- Optimized lead times by 8% through Azure Synapse Analytics analysis, improving production flow and warehouse inventory turns KPI.
- Automated shipment and inventory tracking using Excel VBA, Python, cutting manual reporting time 40% and increasing visibility across operations.
- Provided actionable insights with Tableau dashboards, improving senior management's decision-making 20% on supplier and inventory strategies.
- Developed procurement KPI tracking models in AWS Redshift, enabling real-time visibility into purchase order cycle times and supplier reliability.

#### Supply Chain Analyst (intern) - Hindustan Unilever Limited

Mar 2021 – May 2021 | India

- Supported logistics planning using SAP ERP, AWS S3, ensuring on-time delivery KPI above 95% to key retail partners.
- Conducted SKU-level inventory analysis in Excel Pivot Tables, reducing slow-moving stock 12% via targeted clearance strategies.
- Prepared supplier performance scorecards using Power BI and Azure Data Factory, boosting procurement review efficiency 25%.
- Optimized warehouse material flow with PostgreSQL, Python, improving average dispatch time KPI 18% across distribution network.
- Maintained purchase order tracking in SAP ERP, integrated with AWS Lambda for automated status notifications to procurement teams.
- Delivered KPI reports via Tableau on lead time fill rate and order accuracy, improving operational transparency for management.

### Project

#### Supply Chain Optimization Dashboard

- Designed an interactive Power BI dashboard to track key supply chain KPIs including inventory turnover, on-time delivery rate, and supplier lead times.
- Integrated SQL-based data extraction from a simulated ERP database and automated daily data refresh using Power Query.
- Applied demand forecasting models in Python to predict stock requirements, improving order planning accuracy by 15%.
- Developed supplier scorecards to evaluate vendor performance and identify areas for cost reduction. Key Technologies: Power BI, SQL, Python (Pandas, NumPy), Excel, ERP Data Simulation

### Certifications

- **Microsoft Certified: Azure Fundamentals**
- **AWS Certified Solutions Architect – Associate**

### Education

#### Master of Science in Information Technology

Aug 2023 – May 2025 | USA

Clark University

#### Bachelor of Technology in Electronics and Communication Engineering

Aug 2019 – May 2023 | INDIA

Malla Reddy engineering college for women
