

SAI DEEPAK MADINENI

deepak.m@itjobmail.com | +1 (716) 225-1694 | AZ, United States

SUMMARY

Supply Chain Analyst with 4+ years of experience optimizing end to end inventory management, procurement, and operations in dynamic manufacturing and retail sectors. Ability to leverage advanced tools like Excel, SQL, Tableau, and SAP to boost forecast accuracy by up to 15%, streamline planning cycles, and significantly reduce costs. Expert in implementing S&OP frameworks, managing strategic supplier partnerships, and converting real time data into actionable insights to develop responsive, cost efficient supply chain strategies. Expert at driving process improvements, enhancing operational efficiency, and delivering measurable results that align with business growth objectives.

SKILLS

Supply Chain Analytics: Data Analysis, Predictive Analytics, Data Visualization, Root Cause Analysis, Problem-Solving, Decision-Making.

ERP Systems & Tools: SAP ERP, Oracle ERP, TMS, WMS, Microsoft Excel, Power BI, Tableau, SQL.

Supply Chain Optimization: Inventory Optimization, Logistics Management, Transportation Planning, Distribution Network Optimization, Capacity Planning, Production Planning, Lead Time Optimization, Lean Manufacturing, Six Sigma and Process Improvement.

Planning & Forecasting Techniques: Demand Forecasting, Strategic Planning, KPI Tracking, Performance Measurement, Cost Reduction, On-Time Delivery, S&OP.

Supply Chain Management: Supply Chain Analysis, Supply Chain Visibility, Global Supply Chain Management, Reverse Logistics, Supply Chain Risk Management, Procurement Strategies, Supplier Relationship Management, Warehouse Operations.

Project & Communication Skills: Project Management, Communication Skills, Collaboration, Customer Satisfaction, Lead Manufacturing.

WORK EXPERIENCE

Cardinal Health, USA | Supply Chain Analyst

Aug 2024 - Present

- Performed detailed demand forecasting and inventory trend analysis using advanced Excel and SQL, identifying seasonal patterns and supply constraints that increased production throughput by 20% within two quarters.
- Refined production planning timelines by aligning MRP and ERP systems with demand signals, shortening cycle times by 10% and lowering inventory carrying costs by 5%.
- Led cross department coordination with engineering, production, and quality teams to implement Just in Time inventory practices, reducing excess stock, improving floor space utilization, and stabilizing production flow.
- Improved operational performance through the application of Lean Manufacturing and Six Sigma principles, raising Overall Equipment Effectiveness (OEE) by 15% and cutting process waste by 8%.
- Designed real time Power BI dashboards to monitor forecast accuracy, equipment downtime, and scrap rates, enabling faster, data backed decisions across supply chain operations.
- Partnered with finance and procurement stakeholders to strengthen demand planning cycles, improving forecast reliability and material readiness during peak demand periods.

Citius Tech, India | Supply Chain Analyst

Oct 2020 - Jul 2023

- Simplified analysis of large scale product datasets using advanced Excel functions, improving data consolidation, uncovering inconsistencies, and supporting budget oversight for global sample planning activities.
- Designed a forecasting model for sample planning based on historical order patterns, increasing prediction accuracy by 12% and lowering sample expenditure by 5% through closer coordination with finance and logistics.
- Drove the adoption of Sales and Operations Planning (S&OP) processes, aligning demand and supply teams to achieve a 15% improvement in on time delivery performance and faster response to market changes.
- Managed end to end procurement, sourcing, and distribution workflows within SAP ERP, strengthening supplier relationships, shortening lead times, and improving supply chain cost efficiency.
- Built interactive Tableau dashboards to track fill rate, order accuracy, and logistics KPIs, enabling real time visibility and data driven operational decisions.
- Led supplier negotiations and introduced Vendor Managed Inventory (VMI) initiatives, improving material availability, supplier reliability, and reducing stockout events.
- Directed the rollout of a Warehouse Management System (WMS), streamlining logistics operations, cutting shipping costs by 10%, and increasing order accuracy by 5%.
- Applied Lean Manufacturing and Total Quality Management (TQM) practices to optimize inbound production flows, removing bottlenecks, reducing production costs by 7%, and improving product quality consistency by 3%.

EDUCATION

Master of Science in Data Science | University at Buffalo, Buffalo, NY

Bachelor of Technology in Electronics and Communication Engineering | PES University, Bengaluru, India

CERTIFICATIONS

Databricks Data Engineer Associate

Tableau certified Data Analyst Training

Microsoft certified: Data Analyst associate with Power BI
