

SUMMARY

Software Development Engineer with 4+ years of experience, proficient in various programming languages and technologies, including C, C++, Java, Python, and JavaScript, along with frameworks like Spring Boot, ReactJS, and MERN Stack. Skilled in implementing DevOps tools such as Jenkins, Docker, and Kubernetes and managing cloud services across AWS, Azure, and GCP. Demonstrates strong database management abilities with MySQL, PostgreSQL, and MongoDB. Excels in fast-paced environments, leveraging SDLC, Agile, and Waterfall methodologies to deliver high-quality software solutions efficiently.

SKILLS

- Methodology:** SDLC, Agile, Waterfall
- Programming Languages:** C, C++, Java, Python, HTML, CSS, JavaScript, PHP, TypeScript, GraphQL
- Frameworks/Libraries:** Spring Boot, Spring MVC, Hibernate, JPA, Maven, ReactJS, NodeJS, Angular, NextJS, Django, Fast API, MERN Stack, OAuth 2.0, Redis
- Web Technologies:** HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML
- DevOps/Build Tools:** Jenkins, Docker, Kubernetes, Git Version Control, GitHub Action Workflow, CI/CD Pipelines, Maven, Gradle, JUnit
- Application Servers:** Apache Tomcat, WebSphere
- Cloud Technologies:** AWS (DynamoDB, S3, RDS, EC2), Azure, Google Cloud Platform (GCP)
- Version Control Tools:** Git, GitHub, Bitbucket
- IDEs:** NetBeans, IntelliJ IDEA, Eclipse, Visual Studio Code (VScode), Atom
- Databases:** MySQL, PostgreSQL, MongoDB, Click House, RDBMS, NoSQL

EDUCATION

Master of Science in Computer Information Systems and Information Technology University of Central Missouri Missouri, USA	Dec 2024
Bachelor of Technology BV Raju Institute of Technology (BVRIT)	May 2020

EXPERIENCE

ServiceNow, MO | July 2024 – Current | Software Development Engineer

- Implemented Agile methodologies to streamline project management and enhance team collaboration, reducing cycle times by 15% and ensuring timely delivery of development projects.
- Designed, developed, and enhanced scalable web applications using Java, SpringBoot, and Angular, incorporating iterative user feedback loops to deliver intuitive interfaces and drive a 25% increase in overall user satisfaction.
- Employed Spring Boot and Hibernate for back-end development and ReactJS for front-end construction, enhancing application responsiveness and performance, resulting in a 20% improvement in load times.
- Integrated key AWS services such as DynamoDB, S3, and RDS, which enhanced data storage solutions and supported a 30% scale increase in application user load.
- Conducted comprehensive unit testing using JUnit, ensuring superior code quality and reliability with a 40% decrease in post-deployment issues.

Infosys Limited, India | June 2021 – July 2023 | Senior Systems Engineer

- Designed and developed scalable Java-based applications using Spring Boot and Hibernate, implementing RESTful APIs to support seamless integration with front-end systems, resulting in a 20% improvement in application performance.
- Led end-to-end development of microservices on AWS EC2 and RDS, utilizing Maven for build automation and Jenkins for CI/CD pipelines, reducing deployment time by 15% and enhancing system reliability.
- Optimized database interactions by leveraging JPA and MySQL, designing efficient queries and indexing strategies, which improved data retrieval speed by 25% for high-traffic modules.
- Collaborated in an Agile environment, participating in sprint planning and code reviews, using Git and GitHub for version control to ensure robust code quality and timely delivery of features.
- Integrated front-end components with ReactJS and JavaScript, utilizing JSON for data exchange and Bootstrap for responsive UI design, enhancing user experience across web applications.

Neon IT Systems, India | Jan 2020 – June 2021 | Software Engineer

- Designed and developed scalable backend services using Spring Boot, Hibernate, and JPA, integrating with MySQL and MongoDB databases to support high-performance web applications, improving response times by 30%.
- Implemented RESTful APIs with Java, Spring MVC, and OAuth 2.0 for secure data exchange between client-side ReactJS applications and servers, ensuring seamless user authentication and authorization.
- Orchestrated CI/CD pipelines using Jenkins, Docker, and GitHub Actions, automating build and deployment processes with Maven for Java-based microservices hosted on AWS EC2 and S3, reducing deployment time by 40%.
- Enhanced application performance by leveraging Redis for caching and optimizing database queries in PostgreSQL, achieving a 25% reduction in latency for critical business features.
- Collaborated in an Agile environment, utilizing Git and Bitbucket for version control, conducting code reviews, and writing unit tests with JUnit to ensure robust, maintainable code for enterprise applications deployed on Apache Tomcat.

PROJECTS

Art World –An E-Commerce website | (HTML5, CSS, JavaScript, JSON, Ajax, XML, jQuery, Bootstrap, PHP, MySQL)

- Developed a secure and scalable e-commerce platform with PHP, MySQL, and Bootstrap, improving user engagement and sales conversion rates.
- Integrated an AI-powered product recommendation system using machine learning algorithms, personalizing user experience and boosting sales by 25%.
- Engineered a real-time admin dashboard to track top-selling products and high-frequency customers, increasing data-driven decision-making by 40%.
- Implemented AJAX and JSON-based asynchronous data fetching, enhancing website speed and reducing page load time by 35%.

Event Management Website | (HTML5, CSS, JavaScript, PHP, MySQL, XAMPP)

- Designed and developed a dynamic event management platform with 10+ interactive web pages, leveraging HTML, CSS, JavaScript (frontend) and PHP, MySQL (backend).
- Implemented three-tier architecture, object-oriented design, session handling, and sticky forms to enhance usability and maintainability.
- Integrated user authentication and event booking functionalities, improving event coordination efficiency.

Wanderlust Hotel Booking Project | (HTML5, CSS, JavaScript, Java, Spring Boot, MySQL, Eclipse IDE)

- Built a full-stack hotel booking application using Spring Boot (backend) and React (frontend), ensuring seamless user experience through CI/CD integration and Agile methodology.
- Developed a responsive and user-friendly UI with HTML, CSS, and JavaScript while implementing secure REST APIs for booking management.
- Optimized database queries in MySQL, reducing response time by 30% and enhancing scalability and performance.

CERTIFICATIONS

- Oracle Java Foundations.
- AWS Cloud Practitioner Essentials
