

Vishwa Darshini Porika | Data Analyst

St Louis, USA | vishwadarshinip@gmail.com | +1 (314)-472-5049 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

Data Analyst with 4+ years of experience in financial services and supply chain analytics, skilled in SQL, Python, R, and cloud platforms (AWS, Azure) for ETL, data modeling, and reporting. Proficient in Power BI and Tableau for building interactive dashboards that deliver executive insights. Experienced in risk analytics, compliance (Basel III, IFRS 9, AML/KYC, GDPR, SOX), financial forecasting, and supply chain analytics, including demand forecasting, inventory optimization, and vendor performance analytics. Proven ability to bridge technical solutions with business strategy, driving cost savings, operational efficiency, and data-driven decision-making.

TECHNICAL SKILLS:

Programming & Frameworks: Python, R, SQL, Scala

Data Processing & ETL: Apache Spark (PySpark), AWS Glue, SSIS, Talend, Informatica, Alteryx, Azure Data Factory

Visualization: Power BI, Tableau, Qlik Sense, DAX, ThoughtSpot

Machine Learning & AI: Scikit-learn, TensorFlow, XGBoost, H2O.ai, Prophet, ARIMA

Compliance & Regulations: GDPR, SOX, PCI DSS

Enterprise Systems & Business Tools: SAP, ERP/MRP systems, PLM, CRM Systems (Salesforce, Hubspot) EDI

Advanced Domains: FP&A, B2B SaaS Analytics, GenAI Concepts

Big Data & Cloud: AWS (Redshift, S3, Glue, Data Lake), Azure (Synapse, Data Lake, Data Factory), Oracle SCM, SAP, Databricks, GCP

Specialised Tools: SAS, SPSS, Actimize, FICO, Palantir Foundry

Statistical Analysis: NumPy, Pandas, SciPy, A/B Testing

Automation & Scripting: Apache Airflow, Bash, PowerShell

Databases & Data Warehousing: SQL Server, Oracle, PostgreSQL, Snowflake, BigQuery, Redis, DBT

Methodologies & Frameworks: Agile, Project Management, Lean, Six Sigma, SDLC, Product life cycle management (NPI, EOL)

PROFESSIONAL EXPERIENCE:

Data Analyst | Edward Jones

August 2024 - Present

- Designed and deployed a centralized AWS Redshift data warehouse with automated ETL pipelines (PySpark, AWS Glue, Airflow) to integrate transactional, payments, and credit risk datasets.
- Reduced data processing time by 40% while ensuring Basel III / IFRS 9 compliance and delivering a single source of truth for risk and compliance reporting.
- Designed interactive Power BI dashboards to track loan portfolio performance, credit risk KPIs, and NPL ratios, ensuring transparency for senior management.
- Improved front-end dashboard performance by optimizing SQL and DAX queries in Power BI, reducing refresh times by 35% and enhancing usability for risk and compliance teams.
- Strengthened back-end data warehouse efficiency by tuning Redshift queries and restructuring S3 storage with partitioning, compression, and lifecycle policies, resulting in 25% lower storage costs
- Integrated predictive credit risk model outputs (R, Python, XGBoost) into dashboards, visualizing loan default probabilities and stress test scenarios for executive decision-making.
- Automated recurring risk and compliance dashboards with Power BI service and Airflow scheduling, cutting manual reporting workload by 40%.
- Built time-series forecasting models in Python (ARIMA, Prophet, Exponential Smoothing) to predict revenue and loan growth under multiple economic scenarios, supporting executive strategic planning.
- Implemented data quality checks and anomaly detection models using Python and Scikit-learn to enhance accuracy in AML/KYC compliance monitoring.
- Implemented role-based access controls and encryption policies across AWS Redshift and S3, ensuring GDPR, SOX, and financial data security compliance.

Data Analyst | LTIMindtree – India

June 2020 – July 2023

- Improved inventory turnover ratio by 30% using Prophet and ARIMA forecasting models in Python to predict seasonal demand for raw materials and components, enabling optimized procurement cycles.
- Reduced stockouts and overstocks by 20% through automated safety stock models and dynamic reorder logic, ensuring uninterrupted availability of critical supplies while lowering overall carrying costs significantly.
- Built interactive Tableau dashboards to monitor supply chain KPIs such as OTIF, fill rates, and inventory turns, providing real-time insights for data-driven decision-making across project sites.
- Conducted ABC analysis of SKUs and performance studies on spare parts, improving stock allocation strategies and

enabling more effective sourcing decisions for high-value and high-velocity items.

- Executed A/B testing on procurement strategies and vendor contracts, achieving a 12% reduction in lead times while enhancing supplier reliability and strengthening overall procurement performance.
 - Designed ETL pipelines using SQL, SSIS, Talend, and Azure Data Factory to integrate data from SAP and Oracle SCM, ensuring unified reporting and accurate analysis across multiple supply chain systems.
 - Collaborated with cross-functional teams to implement Lean Six Sigma initiatives, streamlining procurement approvals and eliminating bottlenecks, leading to a 10% reduction in cycle times.
 - Applied Industry 4.0 and IIoT analytics by integrating sensor data into predictive models, improving spare parts planning, reducing machinery downtime, and enhancing supply chain resilience.
-

EDUCATION

Master of Science, Information Systems- Saint Louis University, St. Louis, MO, USA

Bachelor of Technology- Acharya Nagarjuna University College of Engineering and Technology, Guntur, Andhra Pradesh, India
