SUMMARY

Healthcare Data Analyst with 3+ years of experience in claims processing, healthcare informatics, and regulatory compliance. Expertise in leveraging Python, SQL, and BI tools to analyze complex healthcare datasets, improve patient care outcomes, and enhance operational efficiencies. Adept at building predictive models, data visualization, and automating ETL pipelines to optimize healthcare claims data workflows. Proven track record in ensuring HIPAA, HITECH, and HL7 compliance while managing EHR, Medicaid claims, and Medicare claims. Passionate about transforming raw data into actionable insights to drive informed healthcare decision-making.

SKILLS

Programming & Scripting: Python, R, SQL, SAS, PySpark

Data Analysis & Visualization: EDA, Tableau, Power BI, Advanced Excel, ggplot2, Matplotlib, Seaborn, EPIC

Big Data & Cloud Technologies: Azure Data Factory, AWS Redshift, Google BigQuery, Hadoop, Snowflake

Databases & Data Management: MySQL, PostgreSQL, SQL Server, Oracle, MongoDB

ETL & Data Pipelines: Apache Kafka, Airflow, Informatica, Talend, ERP

Healthcare Compliance & Standards: HIPAA, HITECH, HL7, ICD-10, CPT, EHR, EMR, DRG Codes, FHIR, OpenMRS, Claims Data

Healthcare Analytics: Predictive Analytics, Risk Adjustment Modeling, Patient Outcome Analysis

Project Methodologies: Agile (Scrum, Kanban), Waterfall, SDLC

EXPERIENCE

Syneos Health, United States

August 2024 – Present

Healthcare Data Analyst

- Led end-to-end healthcare data analytics projects using Python, SQL, and BI tools, enabling data-driven decision-making and reducing operational costs by 30%.
- Built predictive models to analyze patient readmission trends, optimizing treatment plans and improving patient outcomes by 25%.
- Developed interactive dashboards in Tableau & Power BI, allowing stakeholders to track KPIs and financial performance, leading to a 40% efficiency improvement in resource allocation.
- Ensured HIPAA & HITECH compliance by designing secure data governance policies, reducing compliance risks by 20%.
- Managed EHR data and claims processing projects utilizing HL7, FHIR, and OpenMRS, ensuring seamless data exchange across systems.
- Optimized SQL queries and database performance, reducing data retrieval time by 45% and improving real-time analytics capabilities.
- Led data validation and anomaly detection initiatives, improving data quality and integrity by 35% for accurate patient insights.
- Collaborated with cross-functional teams including clinicians, data scientists, and IT teams to streamline healthcare data pipelines.

Citus Infotech, India

January 2021 – November 2022

Healthcare Data Analyst

- Designed and implemented automated ETL workflows, reducing manual data processing time by 50% and improving data pipeline efficiency.
- Developed real-time analytics dashboards to monitor Medicaid and Medicare claims payment models, leading to a 30% improvement in financial forecasting.
- Applied machine learning algorithms to identify high-risk patients, enabling early intervention strategies and reducing readmissions by 18%.
- Leveraged SQL, Python, and SAS for advanced claims analytics, ensuring 100% data accuracy and compliance with regulatory standards.
- Conducted ICD-10 and CPT coding analysis, improving revenue cycle management and billing accuracy by 22%.
- Managed healthcare interoperability projects, integrating data from various hospital systems and ensuring seamless data flow for clinicians.
- Designed HIPAA-compliant data storage solutions, mitigating security vulnerabilities and enhancing data confidentiality measures.
- Automated claims processing reports, improving operational efficiency and reducing errors by 28%.

EDUCATION

Master's in Information Technology and Management (MIS)

December 2022 – December 2024

Illinois Institute of Technology, Chicago, Illinois
