Languages (Spoken): English (Fluent), Spanish (Fluent)

EXPERIENCE

Research and Data Analyst Intern, San Francisco District Attorney

June 2025-August 2025

- Manipulated and analyzed large datasets to ensure accuracy, integrity, and completeness, identifying operational insights and presenting strategic recommendations to leadership and senior stakeholders.
- Automated data processing tasks using **Python, R, and SQL**, reducing manual effort and errors by 15 hours a week.
- Built dashboards and visual reports using Excel, Tableau, and Power BI to communicate findings and support pricing and operational decisions.
- Identified and translated user requirements into improved processes, enhancing efficiency and usability while maintaining data integrity.
- Applied knowledge of relational databases, security best practices, and compliance standards to ensure reliable and compliant data management.

Building Attendant, City of San Ramon

July 2018-Present

- Analyzed program needs and recommended new and innovative program ideas
- Provided feedback regarding program goals and objectives, budget development, and activity schedules
- Supported Implementation and Transition - Provided administrative and analytical support for implementation, validation, transition, and project closeout activities, including documentation and handoff to steady-state operations.

Business Development Representative, Oracle Netsuite

October 2021–October 2022

- Built and documented configuration strategies to simplify software rollout.
- Partnered with Finance, Operations, and department leaders to align HR data and Data in general with broader organizational analytics and business objectives.
- Monitored and analyzed market trends, competitor pricing, and economic conditions to ensure competitive loan pricing strategies.
- Ensured that pricing policies comply with industry regulations and company standards.

Business Analyst Intern, Blue Shield of California

June 2020-April 2021

- Reviewed and validated 1,000+ member profiles monthly to avoid coverage interruptions.
- Translated complex data into clear, actionable insights for stakeholders at all levels.
- Effectively built SQL queries and wrote R code functions to automate tasks.
- Supported business initiatives through data analysis, effective written and oral communications, including an ability to synthesize information from a variety of sources

PROJECTS

Monthly Crime Statistics Report Code

Automation Report

- Assisted with the development, implementation, and automation of business and reporting solutions.

Charter Flight Service Database — SQL

SQL Database

- Designed Schema for relational databases using principles and best practices in Management Information Systems
- Experience with SQL queries, scripting, and troubleshooting user-reported issues
