New York, NY | [LinkedIn](#) | gajjiguru01@gmail.com | +1 (937) 604-3796

SUMMARY:

Data Analyst with 3+ years of experience in health insurance and US healthcare analytics. Strong in SQL and Python with hands-on experience building scalable pipelines, improving data reliability, and optimizing performance for reporting and analytics workloads. Experienced working with claims, eligibility, enrolment, provider, and prior authorization data, with a solid understanding of HIPAA-aligned data handling. Known for partnering with cross-functional teams to translate business needs into trusted datasets, clear insights, and measurable outcomes.

SKILLS:

- **Certifications:** Google Data Analytics Professional Certificate – Google, AWS Certified Developer - Associate
- **Programming & Scripting:** Python, SQL (MySQL, PostgreSQL, Redshift), R, SAS, MATLAB
- **Data Analysis & Modeling:** Pandas, NumPy, SciPy, Scikit-learn, OpenCV
- **Data Visualization & BI Tools:** AWS Quick Sight, Tableau, Power BI, Looker, Microsoft Excel
- **Database Management:** SQL (Oracle, Redshift), NoSQL (MongoDB), Hadoop, Spark
- **Cloud & DevOps:** AWS (EC2, S3, RDS), Azure, Google Cloud, Docker, Kubernetes, Terraform
- **Analytics & Reporting:** Data Mining, Forecasting, Data Visualization, Data Modelling, KPI Analysis, Ad Hoc Analysis

EXPERIENCE:

Data Analyst – LTI Mindtree., USA

May 2024 - Present

- Built and maintained **data pipelines for healthcare datasets** including eligibility, enrolment, claims, provider, and prior authorization, processing **120M+ records per month** with **99.5%** reliability and reducing reporting cycle time by **28%**.
- Implemented a curated **healthcare data model** connecting member, claim, claim line, and provider entities across **30+ source feeds**, cutting downstream transformation effort by **30%** and improving analytics delivery speed by **25%**.
- Optimized **Spark** and **SQL** jobs for claims analytics using partition tuning and incremental loads, reducing average runtime by **49%** from **75 minutes to 38 minutes** and lowering compute costs by **22%**.
- Created **automated data quality checks for eligibility gaps**, invalid **NPIs**, **ICD/CPT** formatting, and duplicate claim lines, covering 70+ validations and reducing data incidents by **45%** while improving **SLA** adherence from **90% to 98%**.
- Applied **HIPAA-focused controls including PHI masking**, role-based access, and audit logging across **12+ sensitive datasets**, achieving **zero audit findings** and eliminating unauthorized-access incidents in quarterly reviews.
- Delivered high-performance aggregates for allowed amount, paid amount, denial rates, and utilization trends used by **150+ weekly active users**, improving dashboard load time by **24%** and reducing ad hoc requests by **18%**.

Data Analyst – Bajaj Insurance., India

Jan 2022 - Jul 2023

- Built **health insurance dashboards** for claims **TAT**, approval rate, denial rate, loss ratio, and hospital performance, reducing manual reporting time by **40%** and improving leadership decision turnaround by **27%**.
- Analysed **450K+ health claims** to identify cost drivers such as high-cost procedures, repeat admissions, and out-of-network utilization, helping reduce avoidable leakage by **7%** and improving cashless approval efficiency by **10%**.
- Created **SQL** datasets for pre-authorization and cashless claims tracking across **20+ hospitals**, improving provider reconciliation accuracy from **91% to 98%** and reducing mismatch tickets by **33%**.
- Developed fraud, waste, and abuse flagging rules using patterns like duplicates, unusually frequent visits, and abnormal billing behaviour, improving investigation hit rate by **15%** and lowering false positives by **12%**.
- Segmented **150K+ policyholders** by renewal behaviour and **health risk indicators** to support retention outreach, contributing to a **6% increase in health policy renewals**.
- Standardized definitions for claims settled, pending aging, denial reasons, and network utilization across monthly **MIS** reporting, reducing metric disputes by **28%** and **improving stakeholder alignment by 20%**.

EDUCATION:

Wright State University, Ohio

Master of Science in Computer Science

Aug 2023 - Apr 2025

GPA - 3.90

Sree Venkateswara college of Engineering, India

Bachelor of Science in Computer Science

Jul 2019 - May 2023

GPA - 3.70

ACADEMIC PROJECT:

Denial Intelligence Accelerator, Healthcare Claims Analytics Project

- Built a unified claims analytics layer by joining eligibility, claim header, claim line, and provider data across 8+ entities, reducing analysis prep time by 45% and improving reporting consistency by 30%.
- Automated denial reason drilldowns by plan, provider, and procedure category, cutting root-cause turnaround from 2 days to 4 hours and improving denial trend detection by 25%.
- Delivered self-serve dashboards for denial rate, paid rate, allowed vs paid variance, and aging, increasing stakeholder adoption to 40+ monthly users and reducing ad hoc requests by 35%.

Provider Network Value Optimizer, Cost and Quality Performance Project

- Built a provider network performance mart from 1M+ claim lines to compare in-network vs out-of-network utilization, cutting monthly provider reporting effort by 60%.
- Built cost and quality KPIs (cost per episode, high-cost procedures, denial rate, readmission signals), flagging 15+ high-impact providers and reducing out-of-network spend by 9%.
