

Swapnil Gorasiya

Supply Chain Analyst

TX, United States | swapnil.g@careersmails.com | +1 (945) 340-7576 | [LinkedIn](#)

SUMMARY

Supply Chain Analyst with 4+ years of experience supporting data-driven planning, inventory control and logistics operations across global environments. Strong hands-on background in SQL, advanced Excel, SAP ERP, Power BI, Tableau and Oracle ERP, with proven ability to analyze demand patterns, capacity constraints and cost drivers. Experienced in production planning, S&OP, inventory optimization, procurement and warehouse operations, applying Lean and Six Sigma methods to improve efficiency and delivery performance. Expert at building clear performance dashboards, tracking KPIs and translating complex data into practical recommendations for finance, sourcing, and operations teams. Known for steady execution, analytical rigor and consistent support of service levels, cost control and supply chain reliability.

SKILLS

Supply Chain Analytics: Data Analysis, Predictive Analytics, Data Visualization, Root Cause Analysis, Problem-Solving, Decision-Making.
ERP Systems & Tools: SAP ERP, Oracle ERP, TMS, WMS, Microsoft Excel, Power BI, Tableau, SQL.

Supply Chain Optimization: Inventory Optimization, Logistics Management, Transportation Planning, Distribution Network Optimization, Capacity Planning, Production Planning, Lead Time Optimization, Lean Manufacturing, Six Sigma, and Process Improvement.

Planning & Forecasting Techniques: Demand Forecasting, Strategic Planning, KPI Tracking, Performance Measurement, Cost Reduction, On-Time Delivery, S&OP.

Supply Chain Management: Supply Chain Analysis, Supply Chain Visibility, Global Supply Chain Management, Reverse Logistics, Supply Chain Risk Management, Procurement Strategies, Supplier Relationship Management, Warehouse Operations.

Project & Communication Skills: Project Management, Communication Skills, Collaboration, Customer Satisfaction, Lead Manufacturing.

WORK EXPERIENCE

DarioHealth, USA | Supply Chain Analyst

Mar 2025 - Present

- Performed detailed analysis of demand forecasts and inventory patterns using SQL and advanced Excel models, identifying seasonal demand shifts and capacity risks that drove a 17% improvement in production output within six months.
- Improved production sequencing by aligning ERP and MRP planning data with real customer demand, shortening manufacturing lead times by 12% and lowering inventory carrying costs by 7%.
- Led coordination efforts across engineering, manufacturing, and quality teams to roll out pull-based inventory practices, cutting surplus stock levels and improving shop-floor space utilization.
- Embedded Lean and Six Sigma principles into operational workflows, increasing equipment availability by 13% while reducing process inefficiencies by 10%.
- Designed interactive Power BI dashboards to monitor metrics such as forecast variance, equipment downtime, and scrap levels, enabling faster, insight-driven supply chain decisions.
- Partnered with finance and sourcing stakeholders to refine demand planning and replenishment cycles, improving material readiness and elevating service performance during peak demand windows.

Cybage Software, India | Supply Chain Analyst

Jan 2020 - Jun 2023

- Simplified analysis of high-volume product and sample datasets using advanced Excel techniques, strengthening data reconciliation, improving visibility into variances, and supporting financial tracking for global planning initiatives.
- Created a forward-looking sample demand model based on historical consumption patterns, improving projection accuracy by 9% and lowering overall sample expenditure by 6% through closer coordination with finance and logistics.
- Drove adoption of an integrated Sales and Operations Planning (S&OP) framework, improving delivery reliability by 13% and increasing agility in responding to demand fluctuations.
- Managed end-to-end procurement and distribution activities within SAP ERP, shortening supplier lead times and improving cost control across the supply chain.
- Built dynamic Tableau dashboards to track operational KPIs including fulfillment performance, order precision, and logistics efficiency, enabling faster and more informed decisions.
- Led supplier performance initiatives and introduced replenishment collaboration models, improving material availability and reducing stockout frequency by 11%.
- Guided the rollout of a new Warehouse Management System, streamlining outbound logistics, lowering transportation costs by 8%, and improving order accuracy by 6%.
- Applied Lean and quality management practices to stabilize inbound production flows, reducing processing costs by 9% and improving consistency in finished goods quality.

EDUCATION

Master in Information Technology and Management | The University of Texas at Dallas, Dallas, TX

Bachelor in Computer Science and Engineering | Indrashil University, Kadi, Gujarat, India
