

PROFESSIONAL SUMMARY

Results-oriented Data Analyst with 4+ years of experience delivering scalable data solutions, predictive analytics, and real-time reporting across telecom, energy, and financial domains. Skilled in building multi-cloud data pipelines and analytics layers using **Databricks SQL**, **Google BigQuery**, and modern cloud platforms, and translating insights into **executive data storytelling**. Experienced in automated dashboarding, **A/B test reporting**, and statistical methods including **regression analysis** to drive strategic decision-making. Adept in Python, SQL, and data platforms including AWS, Azure, GCP, **Snowflake**, and **Microsoft Excel**.

TECHNICAL SKILLS

Data Analytics & Programming: Python, SQL, Databricks SQL, T-SQL, Pandas, NumPy, Scikit-learn, Microsoft Copilot
Data Visualization & BI Tools: Tableau, Power BI, Looker, Grafana, Lucidchart, Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query)
Experimentation & Business Analytics: A/B Test Reporting, Executive Data Storytelling, KPI Design, Trend & Root Cause Analysis
Statistical & Predictive Modeling: Regression Analysis, Statistical Modeling, Naive Bayes, K-Means Clustering, Anomaly Detection
Cloud Platforms & Warehousing: AWS (Redshift, Glue, S3), Azure (Synapse Analytics), GCP (Google BigQuery), Snowflake, Multi-Cloud Integration
ETL & Workflow Orchestration: Apache NiFi, Talend, Informatica, Apache Airflow
DevOps & CI/CD: Git, GitLab, Jenkins, CI/CD Pipelines, Version Control
Monitoring & Observability Tools: Splunk, Prometheus, Grafana
Data Management & Engineering: Data Warehousing, Data Marts, Data Pipelines, Schema Design, Data Governance
Project Collaboration & Documentation: JIRA, Agile/Scrum, BRD Writing, User Stories, JAD Sessions

PROFESSIONAL EXPERIENCE

Data Analyst | Databricks, USA | July 2024 – Present

- Designed and deployed scalable ETL pipelines using Apache NiFi, Informatica, Talend, and Airflow, increasing data processing efficiency by 35% across high-volume telecom datasets.
- Architected and implemented multi-cloud pipelines across AWS (Redshift, Glue), Azure (Synapse), and GCP (**Google BigQuery**), enabling real-time reporting and cross-functional analytics.
- Built optimized analytics queries and reporting layers using **Databricks SQL**, improving dashboard performance and reducing query latency for operational KPI reporting.
- Collaborated with DevOps teams to implement CI/CD workflows for automated ETL deployment, reducing deployment errors by 45% and shortening release cycles.
- Automated reporting processes using Microsoft Copilot, Python, and **Microsoft Excel**, reducing manual reporting time by 40% and improving accuracy.
- Delivered **A/B test reporting** and experiment readouts for churn/fraud initiatives, summarizing results and recommendations through clear **executive data storytelling**.
- Built and deployed ML models (Naive Bayes, K-Means) using TensorFlow and DataRobot for churn prediction and fraud detection, increasing marketing campaign ROI by 20%.
- Applied statistical techniques including **regression analysis** to quantify key drivers of churn, network quality, and campaign performance.
- Integrated performance monitoring tools (Splunk, Prometheus, Grafana) to monitor network KPIs across 10+ telecom regions, reducing incident response time by 30%.
- Developed scalable Looker dashboards and reusable data marts, enabling self-service access and reducing ad hoc BI requests by 50%.
- Created anomaly detection frameworks and asset reliability dashboards to drive proactive infrastructure management.
- Produced system architecture diagrams and visual workflows using Lucidchart to support cross-team alignment.

Data Analyst | Gartner, Bangalore, India | June 2021 – Dec 2022

- Conducted exploratory and predictive analysis using Python and SQL to detect fraud patterns and optimize asset maintenance, improving model accuracy by 20%.
- Built statistical models including **regression analysis** to identify factors impacting asset downtime, failure rates, and operational efficiency.
- Created and maintained 10+ dashboards in Power BI and Tableau to monitor performance across 200+ substations and field assets.
- Defined and tracked KPIs related to asset lifecycle, downtime, and reliability to support investment strategies and planning.
- Refactored ETL pipelines and data models with engineers, reducing discrepancies by 25% and improving schema consistency across 15+ data sources.
- Facilitated stakeholder workshops and delivered insights using structured **executive data storytelling** (slides/dashboards), improving decision alignment.
- Authored BRDs, epics, and user stories to support agile analytics development with strong data governance.
- Implemented CI/CD practices using Jenkins and GitLab for version-controlled analytics workflows.
- Conducted training sessions for 30+ business users to promote dashboard adoption and data literacy.

Data Analyst | Sigma InfoTech Salon, India | Nov 2020 – May 2021

- Designed SQL-based fraud detection models using z-score and time-series trend techniques, reducing reporting errors by 12%.
- Automated high-risk transaction monitoring in T-SQL, cutting manual compliance workload by 40% and accelerating investigations.
- Built 5+ real-time Tableau dashboards to support regulatory reporting, reducing audit cycle times by 30%.
- Used Python statistical methods (hypothesis testing, control limits, moving averages) to reduce false positives and improve analyst efficiency.
- Produced recurring compliance summaries using **Microsoft Excel** and dashboards to support audit readiness and stakeholder reporting.

EDUCATION

Master of Science (M.S.) in Computer Science — Rivier University, Nashua, NH, USA | Sep 2023 – May 2025
Bachelor of Science (B.Sc.) — Kalinga University, Naya Raipur, Chhattisgarh, India | Jul 2018 – Jun 2021

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- AWS Certified Data Analytics
- Microsoft Certified
- TensorFlow Developer Certificate
