SUMMARY

Dynamic and results-oriented software engineer with extensive experience in full-stack development, project management, and the software development lifecycle. Skilled in designing, developing, and optimizing robust web and application solutions, leveraging expertise in ASP.NET, Java, C#, JavaScript, SQL, and modern frameworks. Proven track record in enhancing system performance, streamlining workflows, and delivering scalable, user-centric solutions in fast-paced environments. Adept at collaborating with cross-functional teams and stakeholders to drive projects to successful completion. Passionate about leveraging cloud technologies and data-driven methodologies to solve complex technical challenges and deliver impactful business results.

KEY SKILLS

- **Programming Languages:** C++, C#, Java, JavaScript, TypeScript
- **Frameworks & Technologies:** ASP.NET, Entity Framework, Vue.js, JSON, REST API, CSHTML, CSS, .NET Core, MVC, AWS, Web API, WinForms
- **Databases:** SQL, SQL Server, SSIS, Oracle PLSQL
- **Tools & IDEs:** Visual Studio (up to 2022), Jules, Jenkins, Postman, Splunk, Azure DevOps, Tableau, Spotfire, BitBucket, Microsoft TFS, Git, Confluence, Eclipse
- **Methodologies:** Agile, Software Development Life Cycle (SDLC), Technical Writing, Database Management
- **Soft Skills:** Leadership, Adaptability, Problem-Solving, Communication, Emotional Intelligence

LICENSES, CERTIFICATIONS, AND PROFESSIONAL DEVELOPMENT

- **Engineer In Training** – November 10, 2015
- **University of Maryland University College (UMUC) SPCH 100: Foundations of Oral Communication** – Summer 2016 (Final Grade: A)
- **ASP.NET Foundation** – August 2017
- **Core Java Concepts (E1)** – August 2017
- **Information Technology Infrastructure Library (ITIL) 2011 Foundation** – March 2018
- **Specialization: IBM Data Science** – September 15, 2024
- **Specialization: IBM AI Developer** – December 22, 2024
- **Specialization: AI For Business Specialization** – January 21, 2025
- **NVIDIA-Certified Associate: Generative AI LLMs** – March 29, 2025
- **NVIDIA-Certified Associate: AI Infrastructure and Operations** – May 17, 2025
- **GPU Programming Specialization (John Hopkins University)** – June 17, 2025
- **Specialization: IBM Generative AI Engineering** – July 4, 2025
- **IBM: Basics of Quantum Information** – August 3, 2025
- **IBM: Fundamentals of Quantum Algorithms** – September 26, 2025

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co. | Columbus, OH

September 2022 – June 2024

Software Engineer (Asset and Wealth Management)

Supervised the development of several data analysis applications for financial records, including databases and caches for these records, GUI for data querying, and the API and server monitoring services associated with relevant data servers.

- Provided full-stack development for the upgrading and maintenance of a financial data analysis desktop application using .NET Core with C# on Visual Studio and Toad SQL for tabular display of account data organized by account name

and category, showcasing the most recent account balances based on current market data, with some maintenance of the website version using Java on Eclipse SDK and Angular.js, along with BitBucket for version control and Confluence for online documentation.

- Enhanced and streamlined input pages and prompts for my team's application deployment pipeline, improving reducing deployment time by over 40%.
- Implemented full-stack enhancements for back-end and front-end processes, streamlining deployment pipelines and improving application efficiency.
- Monitored and optimized REST and Web API and server operations using Postman and JSON to ensure reliable data access and seamless user experience.
- Played a pivotal role in a large-scale data center migration, ensuring continued functionality and seamless connectivity of critical applications.
- Enhanced application performance by updating loading credentials, debugging runtime issues, and optimizing cache consistency, using Jules and Jenkins for continuous integration and deployment.
- Spearheaded upgrades to build pipelines, reducing build times and improving overall system reliability.
- Conducted sprint-based testing and monitored deployments using Splunk, Postman, JSON, and Jenkins, ensuring smooth post-deployment operations.
- Oversaw end-of-sprint releases for updates to the assigned application for improved load times and error reduction, including querying and reviewing data via Splunk to verify proper functionality of code changes post-deployment.
- Studied Amazon Web Services in preparation for using cloud technology (though I haven't used it in the industry yet).

Tata Consultancy Services | Milford, OH; Florence, KY, Collegeville, PA; Columbus, OH

July 2017 – June 2022

Software Application Developer (Consultant)

Developed and modified multiple data analysis programs on various projects as a consultant for the following clients:

- Proctor & Gamble – Software Engineer (August 2017 – June 2018)
- CitiGroup – Embedded Software Developer (July 2018 – June 2019)
- GlaxoSmithKline – Software Application Developer (July 2019 – August 2020)
- Humana – Software Application Developer (September 2020 – April 2021)
- CareSource – Software Application Developer (May 2021 – December 2021)
- CVS Health – Software Application Developer (January – May 2022)

My experience for all contracts for this role is as follows:

- Delivered full-stack development for enterprise clients, designing both web and desktop applications using .NET MVC, C# using Visual Studio, Entity Framework, SQL Server, Oracle PL/SQL, JavaScript, TypeScript, CSHTML, and Vue.js.
- Implemented a complete software development life cycle (SDLC) for at least two web- and desktop-based applications for presenting insights from analytical and testing data.
- Enabled user customization and dynamic workflows by building features tailored to different user roles, including buyers and administrators.
- Developed web applications for tabular data visualization and manipulation of healthcare and pharmaceutical data, integrating SQL Server and Oracle SQL databases with .NET MVC architecture using Entity Framework and creating dynamic search and filter functionalities.
- Constructed interactive dashboards using Tableau and Spotfire to visualize trends in earnings, staffing, operational performance, and medical information.
- Optimized REST and Web APIs and integrated JSON data formats to improve healthcare application responsiveness and maintain consistency across systems by over 25%.
- Facilitated project planning and resource management by overseeing work item tracking and team collaboration via TFS Server.
- Conducted detailed data analysis and system debugging using Visual Studio, reducing errors and increasing application stability.
- Leveraged Azure DevOps, Git, and Microsoft TFS for version control and continuous improvement.

Software Analyst (Underwriting, Reserving & Control – Contract)

Performed SQL data pulling for recovery of specific information such as policy holder names, status, regions, and policy and complaint types.

- Designed and implemented SQL queries to extract policyholder and underwriting data.
- Conducted spreadsheet-based calculations to organize and analyze business-critical metrics for various policy categories.
- Developed database-driven functions in C# using Visual Studio and SQL to streamline policy retrieval and test case validation.
- Performed unit testing of core system functionalities, ensuring alignment between individual components and overall process flows, improving system functionality by at least 15%.
- Analyzed data discrepancies and implemented fixes, improving the system's ability to process audit records efficiently.
- Integrated front-end components with back-end logic, ensuring seamless connectivity and functionality between systems.

EDUCATION

The Ohio State University | Columbus, OH

- Doctor of Philosophy (Ph.D.), Civil Engineering – August 2013 to May 2015
- Master of Science (M.Sc.), Civil Engineering – September 2011 to May 2013
- Bachelor of Science (B.Sc.), Computer Science and Engineering – March 2007 to June 2011

MISCELLANEOUS INFORMATION

- Served as a volunteer instructor for multiple Disadvantaged Business Enterprise (DBE) tutorship sessions under the leadership of Dr. W.C. Benton, Jr., the Edwin D. Dodd Professor of Management and Professor of Operations and Supply Chain Management at Fisher College of Business at the Ohio State University.
- Youngest Ph.D. graduate from the Civil Engineering department at the Ohio State University (graduated in May 2015 at age 21).
- Ph.D. Dissertation: "[While Stands the Colosseum: A Ground-Up Exploration of Ancient Roman Construction Techniques Using Virtual Reality](#)"
- Interested in historical structures, architecture, and engineering; have previously traveled to a dozen different foreign countries, including France, Germany, Italy, Spain, Portugal, England, Japan, and Indonesia, my ancestral country.
 - Also interested in graphic modeling of ancient structures, and has created digital work for excavations in Isthmia, Greece and the Colosseum of Rome, Italy.
- Skilled with Adobe Design Premium for cinematic and graphic design, artistic and architectural pencil-and-paper drawing, Autodesk Maya, Cinema4D, and video editing.
- Born and raised in Hilliard, Ohio.
