Summary

Data Analyst with 3+ years of experience in transforming raw data into business insights through SQL, Python, Power BI, Tableau, and ETL workflows. Skilled in building interactive dashboards, automating reporting, and improving data accuracy and efficiency. Proven record of optimizing processes by up to 40%, reducing costs by 15%, and enabling data-driven decisions across operations and business functions.

Core Skills

Databases & Programming: SQL, Python (Pandas, NumPy), Excel (Power Query, Pivot Tables)

Visualization & BI: Power BI, Tableau, Data Storytelling, Business Statistics

Data Platforms & ETL: Snowflake, Redshift, BigQuery, Spark, ETL Pipelines, Workflow Automation

Cloud & Security: Azure, AWS, IAM, Encryption, Access Control

Analytics & Reporting: KPI Tracking, Statistical Modeling, A/B Testing, Data Modeling, Business Intelligence

Collaboration: JIRA, Agile/Scrum, Stakeholder Communication

Professional Experience

Softwarebloc, USA | Feb 2025 – Present

Data Analyst

- Analyzed business and operational datasets using SQL and Python, uncovering insights that improved reporting accuracy by 30%.
- Built Power BI dashboards tracking KPIs across finance and operations, reducing manual reporting time by 35%.
- Collaborated with stakeholders to define requirements and deliver tailored reports supporting strategic decisions.
- Standardized reporting templates and automated refresh schedules, cutting turnaround time from 3 days to 1 day.
- Presented findings to leadership, influencing initiatives that improved process efficiency by 20%.

Tech Stack: SQL, Python, Power BI, Excel, Tableau.

Allvy Software Solutions Pvt. Ltd. | Dec 2020 – Dec 2022

Data Analyst

- Conducted data analysis on operational datasets using SQL and Python, identifying trends that boosted reporting accuracy by 25%.
- Designed Power BI dashboards for KPI tracking, enabling business units to reduce decision-making cycles by 15%.
- Automated recurring reporting workflows with Python, cutting manual effort by 40%.
- Partnered with cross-functional teams to gather requirements and translate them into actionable dashboards.
- Developed reusable reporting frameworks that saved 10 developer hours per sprint.

Tech Stack: SQL, Python, Power BI, Tableau, Snowflake, Azure.

Arete IT Services Pvt. Ltd. | May 2019 – Aug 2019

Data Analyst Intern

- Cleaned and transformed raw datasets using Excel and Python, improving analysis readiness by 30%.
- Built Tableau dashboards to visualize customer and operational trends, improving visibility into KPIs.
- Delivered ad-hoc reports and weekly performance summaries that guided management decisions.
- Conducted exploratory data analysis to support forecasting models with 15% greater accuracy.
- Documented data quality issues and collaborated with analysts to resolve inconsistencies.

Tech Stack: Excel, Python, Tableau, SQL.

Softbot Info Systems | May 2018 – Aug 2018

Data Analyst Intern.

- Automated reporting workflows in Excel and Python, reducing manual workload by 50%.
- Conducted keyword and traffic trend analysis, identifying optimization opportunities that increased visibility by 20%.
- Developed real-time visual reports for tracking KPIs across campaigns and operations.
- Created data-driven insights that supported decision-making for digital optimization.
- Improved reliability of reporting by implementing validation checks and monitoring scripts.

Tech Stack: Python, Excel, SQL, Data Visualization Tools.

Education

New Jersey Institute of Technology | Jan 2023 – Dec 2024

Master of Science, Information Science | GPA: 3.6/4.0

Relevant Coursework: Data Mining, Machine Learning, Predictive Analytics, Cloud Computing, Data Visualization.

Koneru Lakshmaiah College of Engineering | Sep 2017 – May 2021

Bachelor of Technology, Computer Science | GPA: 3.3/4.0

Markable Projects:

- Cloud Connect** – Communication Hub: Built an Azure-hosted platform with messaging, video calls, and real-time notifications using Django Channels.
- Supply Chain Optimization (Data Analytics):** Analyzed 10 years of logistics data with SQL & Tableau, improving forecasting accuracy and reducing transport risks by 10%.
- Django-based Credit Application Platform:** Designed a secure credit application system with role-based access, deployed on Azure Blob Storage.
