

Uttnej Uppugandla Data Analyst

Wilmington, DE | +1 (302) 268-5643 | uppugandlauttnej@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with 4 years of experience transforming complex business questions into actionable insights through advanced SQL, cloud data platforms, and interactive BI dashboards. Skilled in statistical analysis, KPI standardization, and data governance to deliver accurate, trusted, and impactful data-driven decisions across finance, marketing, and operations.

TECHNICAL SKILLS

Data Analysis & Querying: SQL (Advanced Queries, CTEs, Window Functions), Ad-hoc Analysis, Exploratory Data Analysis (EDA), Trend & Variance Analysis, Root-Cause Analysis

BI & Visualization: Tableau, Power BI, Amazon QuickSight, Grafana, Executive Dashboards, Self-Service Analytics, Data Storytelling

Databases & Data Platforms: Snowflake, AWS Redshift, Azure Synapse Analytics, Google BigQuery, Clickhouse

Programming & Analytics: Python (Pandas, NumPy), Statistical Analysis, Hypothesis Testing, Data Preparation & Transformation

Cloud & Analytics Ecosystems: AWS, Azure, Google Cloud Platform (GCP), Databricks, Apache Kafka (Analytics Consumption)

Data Quality & Governance: Data Validation & Reconciliation, Data Profiling, Informatica, Collibra, Data Lineage, Metric Definitions & Documentation

AI-Assisted Analytics: Text & Sentiment Analysis, OpenAI GPT APIs, LangChain

PROFESSIONAL EXPERIENCE

Data Analyst | Deloitte

August 2024 – Present | DE, USA

- Partner with business and executive stakeholders to gather analytical requirements, define problem statements, and translate complex business questions into structured data analysis and actionable insights.
- Define, standardize, and document KPI logic and metric definitions to ensure consistent reporting and a single source of truth across finance, audit, marketing, and leadership teams.
- Design and maintain interactive **Tableau** and **Amazon QuickSight** dashboards for C-suite and leadership teams, enabling real-time visibility and self-service analytics for business users.
- Conduct ad-hoc and exploratory **SQL analysis** across **AWS Redshift, Azure Synapse, and GCP BigQuery** to identify trends, anomalies, and root causes in enterprise datasets.
- Performed **statistical analysis and hypothesis testing** to validate trends, assess impact, and support data-driven business recommendations.
- Implemented **data validation, reconciliation, and quality checks** to ensure accuracy, consistency, and trust in datasets used for executive reporting and decision-making.
- Delivered executive-ready insights through dashboards, written summaries, and presentations, collaborating with risk advisory and data governance teams to identify inefficiencies and improvement opportunities.

Data Analyst | Infosys

January 2021 – July 2023 | Hyderabad, India

- Worked with business stakeholders to understand reporting needs and translate business requirements into SQL-based analysis and BI solutions supporting marketing, finance, and operations teams.
- Extracted and analyzed large-scale datasets using **SQL and Snowflake** to perform customer segmentation and behavioral analysis for campaign planning and performance evaluation.
- Developed and standardized reusable **SQL query frameworks** using joins, CTEs, and window functions to support complex business logic and consistent reporting practices.
- Designed and maintained **KPI dashboards** in **Power BI and Grafana**, integrating data from finance, sales, and supply chain systems to support executive reviews and operational monitoring.
- Conducted **exploratory, trend, and variance analysis** on operational and cost data using **Python (Pandas, NumPy)** to identify patterns and optimization opportunities.
- Supported near real-time analytics by collaborating with data engineering teams on datasets processed through **Databricks and Kafka**, enabling faster visibility into operational performance.
- Implemented **data quality, profiling, and validation checks** using **Informatica and Collibra**, ensuring accurate, governed datasets aligned with enterprise data governance and audit standards.

EDUCATION

Masters of Science in Information Technology

Wilmington University

August 2023 – May 2025

New Castle, DE

CERTIFICATIONS

Google - Data Analytics Professional Certificate

Microsoft - Power BI Data Analyst Associate
