

Education

University of Washington, Seattle, WA Bachelor of Computer Science – GPA 3.7/4.0	December 2025
Bellevue College, Bellevue, WA Associate in Arts & Sciences Degree (DTA) – GPA 4.0/4.0	March 2023
Science & Research University, Tehran, Iran Bachelor of Biomedical Engineering - 19.75/20.0	June 2021

Projects

NextQ Hire — Interviewer AI Assistant Project Lead/Full-Stack Developer	January 2025- June 2025
• Defined problem statement and success metrics after interviewing 10 hiring managers/non-expert interviewers. • Lead a 4-member team to build a human+AI platform that augments interviewer questions with resumé-based and live interview follow-up questions. • LLM resumé review addressed prep inconsistency by collaboratively refining question sets with interviewers based on resumés and job description (Tech Stack: Node.js/Express, React, Gemini API, Firebase) • Captured interview audio and surfaced context-aware follow-up question every 10s, improving conversational flow and technical depth of assessment. (Tech Stack: AssemblyAI, WebRTC, BlackHole/VoiceMeeter) • Prototype usability testing with 10 people demonstrated 75% reduction in interviewer prep time and 30% increase in interviewer confidence in final candidate assessment. • Produced time-stamped transcripts and concise AI summaries for each session, cutting post-interview evaluation time by 50%. (Tech Stack: Firebase, single-pass LLM, React)	

MemorAI — AI Flashcard Generator Creator & Full-Stack Developer	January 2025 - March 2025
• Built a web platform that converts dense PDFs, PPTXs, and images into fully editable flashcard decks via vision models and a hierarchical LLM pipeline. • Engineered the AI workflow: vision models rasterize and extract text/visual cues, then layered LLM prompts distill concepts into structured JSON blobs (FastAPI, Ollama on Modal GPUs). • Optimized cloud GPU infrastructure to generate 500+ editable flashcards per upload in ≤ 60 s via human–AI collaboration, cutting study prep time by 40% and eliminating manual notes in prototype testing.	

Experience, Activities & Extracurriculars

Volunteer Tutor & Program Facilitator — Hamsaninm Organization, Tehran & Seattle	2018 – 2024
• Conduct needs assessments with students (including those with learning or physical disabilities) to define learning objectives. Designed personalized math & physics modules to boost comprehension and engagement. • Collaborated with parents, therapists, and org staff to set goals, track progress via regular quizzes and feedback loops, and refine lessons based on assessments and goals.	

Awards & Accomplishments

Dean's List, University of Washington Recognized for academic excellence across multiple consecutive quarters.	2024-2025
Capstone Excellence Award, HAI Course Recognized for original concept, creative design, and high-quality implementation of the NextQ Hire platform.	2025

Skills & Interests

Languages: English(fluent), Persian(fluent), Arabic (intermediate)
Programming Languages: Python, Java, C/C++, JavaScript/TypeScript, SQL (Postgres), Dart
Frameworks & Libraries: React, Material-UI, Node.js/Express, Flask, FastAPI, JUnit, Pandas, NumPy, Flutter
Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse
AI & LLM Integration: Prompt engineering, LLM tool integration(model context protocol) for custom use cases
Interests & Volunteer: community service, animal welfare, STEM tutoring (6 yrs with diverse/disabled learners)
