PROFESSIONAL SUMMARY

Software Developer with **6 years of experience** designing, developing, and maintaining scalable enterprise applications using **Java, Spring Boot, HTML5, CSS3, JavaScript, and modern frontend frameworks**.. Strong expertise in building **RESTful microservices**, cloud-native applications on **AWS**, and implementing secure, automated CI/CD pipelines. Experienced in Agile development environments with a focus on performance optimization, secure coding practices, and reliable production deployments.

TECHNICAL SKILLS

- **Programming Languages:** Java (11/17), JavaScript (ES6+), TypeScript, Python, SQL
 - **Backend Development:** Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, Microservices
 - **Frontend Development:** HTML5, CSS3, JavaScript, Angular, React.js, Redux, TypeScript, Bootstrap, Tailwind CSS, Material UI
 - **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda, API Gateway, CloudWatch), Docker, Kubernetes (EKS), Jenkins, GitHub Actions, CI/CD Pipelines, Terraform
 - **Databases & Messaging:** PostgreSQL, MySQL, MongoDB, Oracle, Redis, Kafka, RabbitMQ
 - **Security & Quality:** OAuth2, JWT, Role-Based Access Control, OWASP Top-10, JUnit, Mockito, TestNG, REST Assured, SonarQube
 - **Monitoring & Tools:** ELK Stack, Prometheus, Grafana, Postman, Git, JIRA, Confluence
 - **Methodologies:** Agile / Scrum, SDLC, Code Reviews, Cross-Functional Collaboration
-

PROFESSIONAL EXPERIENCE

Wawanesa Group

Software Developer

Sep 2022 – Present

- Design, develop, and maintain Spring Boot microservices supporting enterprise insurance platforms, ensuring scalability and modular architecture.
- Build and enhance responsive frontend interfaces using HTML5, CSS3, JavaScript, and Angular, ensuring cross-browser compatibility and accessibility.
- Implement RESTful APIs with proper validation, exception handling, and API versioning to support internal and external consumers.
- Develop and enhance Angular-based dashboards using modular components, lazy loading, and responsive UI practices.
- Apply Spring Security, OAuth2, and JWT-based authentication to enforce secure role-based access control.
- Optimize application performance by tuning Hibernate/JPA mappings, SQL queries, indexing, and caching strategies on PostgreSQL.
- Build and maintain CI/CD pipelines using Jenkins and GitHub Actions to automate build, test, and deployment workflows.
- Containerize applications using Docker and deploy workloads to Kubernetes (EKS) for consistent environment management.
- Provision and manage cloud infrastructure on AWS using Terraform, supporting EC2, EKS, RDS, S3, and IAM services.
- Integrate AWS Lambda and API Gateway to support serverless APIs and asynchronous processing.
- Implement centralized logging and monitoring using ELK Stack, Prometheus, Grafana, and CloudWatch for proactive alerting and troubleshooting.
- Collaborate with QA teams to develop automated unit and integration tests using JUnit, Mockito, and REST Assured.

- Participate in code reviews, ensuring clean code, security best practices, and adherence to team standards.
- Actively contribute to Agile/Scrum ceremonies, including sprint planning, backlog refinement, and retrospectives.
- Support production releases and assist with incident investigation and root-cause analysis.
- Maintain technical documentation including Swagger (OpenAPI) specifications and deployment runbooks.

Capri Global

Software Developer

Jan 2017 – Nov 2019

- Designed and developed RESTful APIs using Spring Framework and Hibernate for insurance policy and claims management systems.
- Built responsive UI components using HTML5, CSS3, JavaScript, and React.js for customer-facing web portals.
- Integrated MongoDB for document storage and Redis caching to improve application performance under high load.
- Implemented AWS S3 and API Gateway workflows for document handling and asynchronous backend processing.
- Containerized backend services using Docker and deployed applications to Kubernetes environments.
- Created automated test suites using JUnit, TestNG, and REST Assured, improving regression coverage and stability.
- Enforced code quality standards through SonarQube analysis and peer code reviews.
- Implemented centralized logging and monitoring using the ELK Stack, improving troubleshooting efficiency.
- Participated in Agile ceremonies including sprint planning, stand-ups, retrospectives, and backlog grooming.
- Authored and maintained Swagger (OpenAPI) documentation to support integration and onboarding.

EDUCATION

- **Master of Science in Computer Science**

Southern Arkansas University - Magnolia, AR
