

Sai Sasya Sunke

Data Analyst

MO | 801-214-1539 | saisasyas00@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 3+ years of experience delivering end-to-end analytics solutions across healthcare and consulting environments. Strong background in SQL, Python, R, and statistical modeling, with hands-on experience building automated ETL pipelines, performing exploratory and regression analysis, and translating complex business problems into actionable insights. Proven ability to optimize data workflows and reporting performance, including reducing manual data preparation by 40%, improving dashboard refresh times by 25%, and enhancing executive visibility through KPI-driven Power BI and Tableau dashboards. Experienced in large-scale data processing using Apache Spark and Spark SQL, designing analytical data marts, and supporting data-driven decision-making through clear stakeholder communication. Adept at working with cross-functional teams to define metrics, ensure data quality, and deliver scalable analytics solutions aligned with business objectives.

SKILLS

Data Analysis & Statistical Modeling: Advanced SQL, Python (Pandas, NumPy, SciPy), R (statistical analysis, exploratory data analysis), hypothesis testing, regression analysis, trend analysis, variance analysis, anomaly detection

Data Engineering & ETL: ETL pipeline design, data ingestion frameworks, data transformation logic, data validation and reconciliation checks, data quality controls, batch data processing, large-scale data handling, pipeline optimization

Databases & Data Storage: MySQL, SQL Server, Snowflake, relational database design, indexing strategies, query optimization, structured data modeling, semi-structured data handling, analytical data marts

Big Data & Distributed Processing: Apache Spark, Spark SQL, distributed data processing, cloud-based data processing workflows, performance optimization for large datasets, scalable analytics pipelines

Visualization & Business Intelligence: Tableau, Power BI (DAX, data modeling, KPI frameworks), Microsoft Excel (advanced formulas, pivot tables, analytical validation), executive and operational reporting, dashboard performance optimization

Cloud & Analytics Platforms: AWS data analytics ecosystem, Databricks analytics workflows, cloud-based data processing environments, exposure to multi-cloud analytics setups

Analytics Delivery & Stakeholder Management: Business requirement translation, KPI definition, executive presentations, cross-functional collaboration, stakeholder communication, decision support analytics

EDUCATION

Master of Science in Applied Computer Science
Southeast Missouri State University

May 2025

EXPERIENCE

Cigna, MO | Nov 2024 - Current | Data Analyst

- Built and maintained complex SQL and Python-based analytical workflows to analyze healthcare operations, utilization trends, and cost drivers, enabling data-backed decisions across business teams.
- Designed automated ETL pipelines using Python and SQL to ingest, validate, and transform multi-source healthcare datasets, reducing manual data preparation effort by 40%.
- Performed statistical analysis and hypothesis testing to evaluate operational changes and program effectiveness, directly supporting leadership decision-making on process improvements.
- Developed Power BI dashboards with optimized data models and DAX measures to track KPIs related to utilization, variance, and trend analysis, improving executive visibility into performance by 30%.
- Optimized SQL queries and indexing strategies on large relational datasets, improving report and dashboard refresh times by 25%.
- Partnered with business stakeholders to translate ambiguous requirements into well-defined analytical metrics and reporting frameworks, strengthening trust in data-driven recommendations.

Infinite Infolab, India | Jan 2021 - July 2023 | Data Analyst

- Analyzed large structured and semi-structured datasets using SQL, Python, and R to uncover trends, anomalies, and performance gaps across client-facing analytics projects.
- Built end-to-end ETL pipelines for batch data processing, including ingestion, transformation, validation, and reconciliation checks, improving data accuracy and consistency by 35%.
- Performed exploratory data analysis, regression modeling, and variance analysis to support client forecasting and operational optimization initiatives.
- Designed analytical data marts and optimized relational database schemas, enabling faster downstream reporting and reducing query execution times by 30%.
- Developed Tableau dashboards for operational and executive audiences, standardizing KPI definitions and improving reporting turnaround time by 40%.
- Leveraged Apache Spark and Spark SQL for distributed data processing on high-volume datasets, enabling scalable analytics workflows that handled millions of records per run.
- Collaborated closely with cross-functional teams and clients to refine business questions, present insights, and deliver decision-support analytics that drove measurable process improvements.

CERTIFICATION

Introduction to Structured Query Language (SQL) – University of Michigan (Coursera)

Intermediate Relational Database and SQL – Coursera Project Network (Coursera)

Advanced Relational Database and SQL – Coursera Project Network (Coursera)

Manipulating Data with SQL – Coursera Project Network (Coursera)

Visualizing Data with Tableau (Visualizing GitHub Trips with Tableau) – Coursera Project Network (Coursera)
