

SAI SUMEETH RAVI, PMP®

saisumeethravi26@gmail.com || (352) 577 4366 || Open to Relocate

SUMMARY

PMP-certified Supply Chain Consultant with 4+ years of experience driving end-to-end supply chain optimization through data analytics, ERP transformation, and process excellence. Skilled in leveraging **SAP systems** to streamline procurement, inventory, and logistics operations, enhancing efficiency, visibility, and cost control across global networks. Proficient in **Python, SQL, R, and Azure**, with a strong foundation in forecasting, data modeling, and performance analytics to enable data-driven decision-making. Experienced in **on-site industrial environments**, collaborating closely with procurement, production, and warehouse teams to implement automation, improve material flow, and optimize operations. Adept at leading cross-functional initiatives and applying **Lean Six Sigma** principles to boost agility, reduce stockouts, and strengthen supplier performance.

EDUCATION

Masters in Information Systems and Operations Management (Data Science) | UF, Gainesville, FL

Aug 2023 – May 2025

B. Tech in Industrial Engineering (Operations Research) | NIT Allahabad

Aug 2016 – June 2020

SKILLS

Technical languages: Python, SQL (Advanced), R, SAP ABAP, VBA, Java, C

Supply Chain Management: Demand Planning, Inventory Optimization, Procurement, Logistics, Vendor Management, Forecasting Models, EDI, SCNO, Supply Chain Heuristics, Operations Research, Process Engineering

SAP Expertise: SAP S/4HANA, SAP ERP (MM, SD, SCM), SAP Fiori, SAP APO, SAP Ariba

Visualization & BI Tools: Tableau, Power BI, Excel (PivotTables, Macros), Pandas, NumPy, Matplotlib, Seaborn

Machine Learning & AI: Scikit-learn (Regression, Clustering), PCA, Feature Engineering, OpenAI GPT Integration

Databases & Cloud Platforms: MySQL, Oracle DB, NoSQL, Azure, AWS

Statistics & Analytics: Hypothesis Testing, Regression Analysis, Correlation, A/B Testing, ANOVA, EDA

Tools & Methodologies: Git, Agile (Scrum), Jira, Project Management, Operations Research, SDLC, KPIs, SLAs, Change Management, Gen AI

WORK EXPERIENCE

Supply Chain Analyst: Medline | Aurora, CO

July 2025 – Present

- Supplier Performance Analytics:** Designed and monitored vendor performance dashboards across 20+ suppliers, applying statistical models to track >95% on-time delivery, quality compliance, and SLA adherence.
- Inventory Optimization:** Conducted SQL- and Excel-based data mining of purchasing and inventory datasets to optimize replenishment cycles, leading to an 18% reduction in stockouts.
- Automation & Reporting:** Built Excel macros and automated workflows to streamline recurring reporting tasks, eliminating 5+ hours of manual effort weekly while improving accuracy.
- Procurement Pricing:** Collaborated with the pricing and procurement teams to investigate and resolve pricing discrepancies, PO mismatches, and vendor billing issues, ensuring accurate cost allocation and contract compliance.

Supply Chain Analyst: McKesson | USA

Aug 2024 – May 2025

- AI-Driven Demand Forecasting:** Developed and deployed end-to-end machine learning pipelines in Python to forecast demand variability and inventory trends, leveraging models such as Linear Regression and K-Means to enhance supply chain responsiveness.
- Optimization Modeling:** Applied Principal Component Analysis (PCA) and silhouette scoring to uncover latent patterns in supplier and demand data, improving model interpretability and accuracy by 15%, leading to better replenishment and sourcing decisions.
- AI-Driven Vendor Insights:** Integrated Open AI API to analyze supplier and customer feedback, reducing analysis time by 80% and improving vendor decision-making.
- Supply Market Intelligence:** Developed automated web-scraping systems using Python and Selenium to collect real-time data on pharmaceutical raw material pricing, distributor lead times, and logistics trends, enabling dynamic demand forecasting and proactive inventory planning.

SAP and Supply Chain Consultant: Orion Technolab | India

Apr 2021 - Aug 2023

- SAP S/4HANA Analytics:** Leveraged S/4HANA capabilities including Core Data Services (CDS) Views, AMDP, and Fiori Analytics to develop integrated dashboards for end-to-end visibility across demand, inventory, and logistics operations.
- SAP MM Implementation:** Led end-to-end configuration and deployment of SAP MM to optimize procurement and materials management processes, reducing purchase order cycle time by 20% and enhancing vendor performance visibility.
- Demand & Network Planning:** Applied SAP APO algorithms and advanced optimization techniques to balance inventory across five distribution centres, increasing forecast accuracy by 22% and lowering freight costs by 15%.
- KPI Visualization:** Built Tableau and Power BI dashboards for key KPIs (OTIF, inventory turns, forecast bias), improving reporting transparency and reducing lag time by 30%.
- Continuous Improvement:** Implemented Lean Six Sigma methodologies to identify and eliminate warehouse inefficiencies, enhancing order fulfilment lead times by 18% and driving operational excellence.
- Cross-Functional Collaboration:** Partnered with procurement, production, and logistics teams to tailor SAP-driven solutions to business objectives, achieving full stakeholder satisfaction and seamless project execution.
- Root Cause Analysis:** Facilitated structured problem-solving sessions using Fishbone (Ishikawa) and Pareto analysis to address recurring supply bottlenecks, implement sustainable corrective actions, and ensure long-term performance stability.
- Decision Intelligence:** Designed real-time analytical models that synchronized purchasing, production, and logistics data, enabling proactive decision-making and reducing supply chain latency by 25%.

Software Developer (SAP ABAP & S/4 HANA): Orion Technolab | India

Sep 2020 – Mar 2021

- Data Migration:** Contributed to the data migration project from ECC (Oracle DB) to S/4 HANA, helped improve system performance, and assisted in the smooth transition using ABAP/SQL Programming for 1M+ records, ensuring 98% accuracy.
- Application Development:** Developed custom SAP reports and enhancements using **Object-Oriented** programming (OOABAP), improving system performance and report generation efficiency.

CERTIFICATIONS

- Project Management (PMP):** Project Management Professional - PMI, Google Project Management Professional
- MicroMasters in Supply Chain Management** – MIT, CSPO – Supply Chain Strategy, Lean Six Sigma White Belt
- Tableau:** Tableau Certified Desktop Specialist
- Snowflake:** Snowpro Core Certification (COF - CO2)
- MS Azure Cloud:** Azure Data Fundamentals DP-900, Azure Fundamentals AZ-900
