Summary

Senior Supply Chain Analyst skilled in demand forecasting, inventory optimization, and data analysis using SAP S/4HANA, Oracle ERP, Power BI, and SQL. Led integration of Blue Yonder WMS with SAP to cut order cycle time by 18% and improve operational visibility. Proven track record in automating inventory workflows and implementing real-time system integrations to enhance supply chain efficiency.

Skills

- **Supply Chain Planning & Execution:** Demand Forecasting, Inventory Optimization, Procurement Analysis, Vendor Performance Management, Supply planning & Fulfilment Support, Planning Experience, Procurement Experience
- **Warehouse Management & Logistics:** Blue Yonder (JDA) Warehouse Management (WMS), Enterprise Supply Planning (ESP), Luminate Warehouse Tasking, WM/EWM, Inbound & Outbound Operations, Wave Processing, Inventory Control
- **Data Analysis & Reporting:** Power BI, Tableau, Microsoft Excel(Advanced), SQL/PLSQL, Jasper Reports, Page Builder, JDA Integrator, Analytical Skills
- **ERP & SCM Systems:** SAP S/4HANA, Oracle ERP, Manhattan Associates, Dell Boomi, MuleSoft
- **Technical Tools & Programming:** MOCA Commands, Ledit, Microsoft SQL Server, Database Scripting & Troubleshooting
- **Process Improvement & Quality Management:** Lean Six Sigma (Green Belt), DMAIC, Root Cause Analysis (RCA)

Experience

CVS Health

Jul 2024 - Present

Senior Supply Chain Analyst

- Led workstreams for a warehouse optimization project, applying Lean Six Sigma methods and planning experience to integrate Blue Yonder WMS with SAP S/4HANA, which increased operational visibility and cut order cycle time by 18%
- Leveraged analytical skills to develop and maintain MOCA commands, SQL/PLSQL scripts, and Page Builder dashboards to automate inventory workflows and improve system data accuracy
- Collaborated with IT, logistics, and procurement teams, applying procurement experience, to implement real-time integrations between Blue Yonder, SAP, and third-party logistics systems using Dell Boomi and MuleSoft, which enabled seamless data flow and reduced integration errors
- Designed and maintained Power BI and Jasper Reports dashboards that visualized KPIs such as fulfillment rates, supplier reliability, and stock accuracy, helping managers make quicker decisions
- Analysed warehouse operations through root cause analysis (RCA), optimizing wave processing, picking, and replenishment strategies for faster throughput
- Applied Lean Six Sigma-driven process improvements, increasing overall supply chain responsiveness and minimizing inventory discrepancies across distribution centers

Infosys BPM

Jan 2021 - Dec 2021

Supply Chain Analyst (Systems and Analytics)

- Supported Integrated Supply Planning & Analytics initiatives by contributing planning experience to Oracle ERP and SAP S/4HANA process alignment that improved forecast accuracy and reduced procurement delays by 15%
- Developed automated Power BI and Tableau dashboards that gave real-time visibility into demand, inventory, and supplier KPIs across regional operations, enabling quicker decision-making
- Optimized procurement and replenishment cycles by applying procurement experience to analyze SKU-level trends with SQL and Python, using data-modeling and predictive-analytics techniques, which shortened order lead times
- Assisted system integrations through Dell Boomi to connect ERP and warehouse management platforms, ensuring seamless data flow and order traceability
- Analyzed warehouse operations with root-cause analysis (RCA) and WM/EWM data, optimizing wave processing, picking, and replenishment strategies, which increased throughput
- Documented business process flows and system enhancement requirements using Jasper Reports and Page Builder, which created a digital platform that cut manual effort and increased data accuracy

Blue Dart

Nov 2018 - Dec 2020

Warehouse & Logistics Optimization Analyst

- Supported the Warehouse Process Modernization, deploying Manhattan WMS and automation tools that streamlined inbound/outbound workflows and improved order accuracy by 17%
- Assisted in redesigning warehouse layouts and storage strategies using AutoCAD and heat-mapping, which optimized space utilization and reduced travel time for picking operations
- Implemented barcode scanning and handheld device solutions to enhance inventory visibility and minimize cycle count discrepancies across multiple distribution centers

- Analysed transportation and routing data using Excel VBA and Tableau dashboards, achieving a reduction in last-mile delivery costs through optimized route planning
- Monitored key warehouse KPIs (throughput, dwell time, dock utilization) using Microsoft SQL Server dashboards, identified performance gaps, and applied DMAIC improvements that reduced average dwell time and increased dock utilization

Trigent

Jan 2016 - Oct 2018

Inventory & Procurement Optimization Specialist

- Supported the Procurement Process Automation, applying procurement experience to implementing SAP MM and custom Excel-based tools that streamlined purchase requisitions and reduced procurement cycle time by 20%
- Developed inventory control models using VBA macros and data visualization dashboards to monitor stock levels, reorder points, and supplier performance, which increased visibility into inventory and helped prevent stockouts
- Optimized procurement planning by conducting ABC and XYZ analysis, improving material availability and reducing excess inventory
- Coordinated with finance and production teams, using planning experience to align procurement forecasting with project demand, enhancing material flow and minimizing stockouts
- Created automated reporting templates integrating SQL queries and pivot-based summaries, improving data accuracy and visibility for management reviews

Projects

Data-Driven Demand Planning

2023

- Developed and implemented predictive analytics models to enhance demand forecasting accuracy, improving inventory turnover and reducing stockouts
- Integrated SAP MM and SD modules to align procurement with real-time demand signals, increasing supply chain responsiveness

Supplier Risk Management System

Infosys

- Designed and implemented a supplier risk management system leveraging Oracle ERP and Power BI dashboards to enhance supplier performance tracking and risk visibility
- Applied Lean Six Sigma methodologies to identify and mitigate high-risk suppliers, improving overall supply chain reliability

Education

California State University

Aug 2022 - May 2024

Master of Science, Engineering Management

Northridge, CA

Bapatla Engineering College

Aug 2012 - May 2016

Bachelor of Technology, Mechanical Engineering

Bapatla, India
