PROFESSIONAL SUMMARY

Data Analyst with 4 years of experience delivering business intelligence, reporting, and analytics solutions across enterprise environments. Proven ability to drive end-to-end data analysis initiatives, build high-impact dashboards, and automate reporting workflows using Power BI, SQL, and Python. Consistently improved operational efficiency by reducing reporting turnaround by 45% and increasing data accuracy by 35%. Trusted partner to business stakeholders, translating requirements into clear, data-driven insights.

TECHNICAL SKILLS

- **Business Intelligence & Reporting:** Power BI (DAX, Power Query, Data Modeling, Power BI Service), Tableau, Looker Studio, Excel (Advanced Formulas, VBA), KPI Dashboards, Executive & Operational Reporting.
- **Data Analysis & Databases:** SQL Server, PostgreSQL, Complex SQL Queries, Data Validation, Data Reconciliation, Data Quality Checks.
- **ETL & Data Integration:** Azure Data Factory (ADF), Knime, SSIS, Data Ingestion, Transformation, Scheduled Pipelines.
- **Programming & Automation:** Python (Pandas, NumPy), Power Automate, API Integrations.
- **Excel & Productivity:** Excel (Pivot Tables, Power Pivot, XLOOKUP/VLOOKUP), Reporting Automation.
- **Cloud & Platforms:** Microsoft Azure (ADF, Blob Storage), Google Cloud Platform (BigQuery – working knowledge).
- **Tools & Methodologies:** Git, Agile / Jira, Business Requirements Analysis, UAT Support, Stakeholder Collaboration.

PROFESSIONAL EXPERIENCE

Bank of America

Data Analyst

Jul 2024 - Present

Dallas, TX

- Delivered executive Power BI dashboards providing leadership visibility into financial and operational KPIs.
- Conducted business requirements analysis and partnered with stakeholders to design scalable analytics solutions.
- Automated ETL pipelines using Azure Data Factory and Python, reducing manual reporting effort by 45%.
- Optimized DAX calculations and data models, improving dashboard performance by 30%.
- Built Knime validation workflows processing over 1M records, increasing data accuracy by 35%.
- Published governed datasets to Power BI Service, supporting enterprise reporting and UAT cycles.
- Performed ad-hoc and trend analysis to identify performance drivers and reporting gaps.
- Applied data governance controls to ensure consistency, audit readiness, and regulatory alignment.

Standard Insurance Inc

Data Analyst

Jan 2024 - Jun 2024

Dallas, TX

- Developed Power BI dashboards for forecasting and trend analysis, improving prediction accuracy by 18%.
- Automated data ingestion and report delivery, reducing manual effort by 40%.
- Designed financial data models and complex SQL queries to support multi-source actuarial reporting.
- Built Knime ETL pipelines consolidating disparate datasets into a unified reporting layer.
- Integrated Azure Blob data feeds, improving vendor data availability by 30%.
- Implemented data governance and quality checks, reducing reporting errors by 25%.
- Performed ad-hoc analysis to support finance teams with risk and exposure insights.
- Authored QA documentation and supported UAT cycles for reporting releases.

United Health

Data Analyst

Sep 2022 - Dec 2023

Remote (USA)

- Built Power BI dashboards tracking claims turnaround, provider performance, and operational KPIs.
- Automated compliance reporting using Python, reducing audit preparation time by 30%.
- Cleansed and transformed HIPAA-compliant datasets, improving reporting accuracy by 35%.
- Developed anomaly detection scripts to support ad-hoc analysis of claim outliers.
- Standardized regulatory reports, improving compliance delivery timelines by 20%.
- Partnered with compliance teams to validate audit-ready datasets under data governance standards.
- Wrote complex SQL queries to reconcile claims data across multiple systems.
- Supported UAT and production releases for analytics enhancements.

Accure Systems

Data Analyst

Jan 2021 - Dec 2021

Hyderabad, India

- Automated SAP and Excel data extraction using Python, reducing preparation time by 40%.
- Developed Power BI and Tableau dashboards enabling clear data storytelling for sales analytics.
- Built Power Automate workflows to eliminate manual refresh and report distribution tasks.
- Designed Knime pipelines integrating multi-source operational data.
- Implemented Python validation checks, reducing SAP data mismatches by 30%.
- Collaborated with business teams to gather requirements and define KPIs.
- Performed trend analysis to identify sales performance patterns.
- Maintained documentation and supported UAT activities for reporting solutions.

EDUCATION

University of North Texas, Denton, TX

Jan 2022 - Dec 2023

M.S., Business Analytics

GITAM University, India

Aug 2017 - Jul 2021

B.Tech, Computer Science & Engineering
