- Collaborated with clients, conducting regular requirement reviews for requested features including real-time truck tracking, Google & Facebook API integration, calendar scheduling and QR code generation for client engagement.
- Web app engineered using HTML5, Microsoft .NET, JavaScript, Python, Google Maps API and AWS services (RDS, Lambda),

creating a solution that meets industry standards.

- Finally product officially endorsed and owned by WSFTA, continuing to operate website currently for food truck vendors.

Web Developer Intern, Poulsbo Historical Society – Poulsbo, WA – ([View Online](#))

Oct 2021 – Jan 2023

- Updated and optimized website in accordance with desired museum brand and following guidelines set by Board of Directors, ensuring consistent quality in site.
- Aided in museum event marketing, and updated website UI for to maintain consistency between devices, resulting in a 25% website traffic increase over a yearly period.
- Integrated a WordPress-powered calendar widget, streamlining event planning and improving maintainability for future staff.
- Mentored senior members staff in WordPress development, providing hands-on-training and ensuring ease of maintainability for future website updates

Projects

Contoso Coffee Website

[Kubernetes Contoso Coffee](#)

- Upgraded the Contoso Coffee Azure Maps web app to display location data from PostgreSQL via a C# web API.
- The project was upgraded from a purely static site to Azure Static Web Apps to the front-end; Azure App Service and Azure Database for PostgreSQL for the backend; then converted into containers and deployed to Azure Kubernetes Service.
- The app displays the locations coffee shops in the Washington state, and can be expanded to worldwide locations.

Art Portfolio Website

[art.weaselycreations.com](#)

- Developed and deployed personal art portfolio using AWS hosting and GitHub Actions, enabling continuous integration and deployment for seamless updates.
- Showcases personal artwork, featuring a dedicated contacts page, bio and storefront for handmade paintings and prints.
- Implemented an e-commerce shop with Stripe Checkout, facilitating secure transactions for purchasing handmade art.

Center School Video Game Club Website

[Video Game Club Website](#)

- Volunteered design and develop a promotional website for The Seattle Center School High School Video Game Club, enhancing student engagement.
- Created an interactive museum experience showcasing video game history, integrating embedded media and utilizing PHP for visitor data tracking.
- Website was created using PHP, HTML5 and CSS, incorporating Microsoft Excel data gathering integration for real-time data recording and monitoring, improving content insights and analytics.
