

Nageswara Rao Pathi

Data Analyst

Missouri, USA | +1(551) 277-4463 | nageswararao.aiworks@gmail.com | [LinkedIn](#)

SUMMARY

- Data analyst of 4 years of experience leveraging Python, SQL, R, Pandas, Tableau, Power BI, Agile SDLC, EDA, and analytics to derive actionable insights, automate reporting, and support data-driven decisions.
- Expertise in statistical analysis, hypothesis testing, regression, classification, clustering, forecasting, model evaluation, applying Scikit-learn, TensorFlow, SciPy, and machine learning pipelines for predictive insights and recommendations.
- Proficient in ETL workflows, data pipelines, data integration, data warehousing, and transformation using Snowflake, AWS, and Azure for accurate data delivery supporting business intelligence.
- Communicates with stakeholders, gathers requirements, maintains documentation, presents data stories, collaborates cross-functionally, manages timelines, addresses issues, and translates complex analyses into actionable insights.

SKILLS

Methodologies:	SDLC, Agile, Waterfall
Programming Language:	Python, SQL, R, Scala, SAP, SAS
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook
Database:	MySQL, PostgreSQL, MongoDB, SQL Server
Cloud Platform:	Amazon Web Services (AWS), Microsoft Azure
Other Technical Skills:	SISS, SSRS, Machine Learning Algorithms, ETL Tools, EDA, Ad hoc Analysis, Statistics, MapReduce, Snowflake, Alteryx, Probability distributions, Confidence Intervals, Advance Analytics, SAS, MS Visio, Hypothesis Testing, Regression Analysis, Linear Algebra, Data Mining, Data Visualization, Data warehousing, Data transformation, Data Storytelling, Data Integration, Data Interpretation, Data Pipeline, Association rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Git, GitHub, JIRA
Soft Skills:	Effective Communication, Problem-Solving, Time Management, Stakeholder Management, Presentation Skills, Risk Management, Flexibility, Networking, Optimization Techniques, Verbal and Written Communication, Analytical Thinking.

EXPERIENCE

Oracle Health Data Analyst USA	Aug 2024 – Present
• Led readmission risk analytics initiative to improve patient flow and LOS outcomes across 2K annual admissions, enabling clinical leadership to reduce readmission rates by 14% through a standardized decision support framework. • Performed EDA using Python to clean patient-level attributes and put into practice Pandas to engineer structured feature sets across 12K+ inpatient encounters, supporting accurate variable selection for predictive modeling. • Developed predictive models using Scikit-learn to classify high-risk cohorts and used SciPy to optimize regression parameters, improving model forecasting accuracy by 27% and supporting proactive resource allocation. • Conducted hypothesis testing and probability distribution with confidence interval analysis, and applied clustering and classification to segment cohorts, improving outcome interpretation accuracy by 36% for clinical decision-making. • Engineered HIPAA-compliant ETL pipelines using SAS for claims processing and SQL Server for structured data retrieval, integrating outputs into AWS to reduce manual handling effort by 32% across reporting workflows. • Executed model experimentation in Jupyter Notebook and automated iterative runs through GitHub Actions and built Power BI dashboards used by 25+ clinical leaders to assess patient risk scores and LOS trends. • Loaded modeled patient-risk outputs into Amazon Redshift to support cross-unit reporting and utilized data storytelling to enable physicians and nursing leadership to align care planning decisions across three hospital units.	

Accenture Data Analyst India	Sep 2020 – Jun 2023
- Gathered business requirements and coordinated stakeholders across 5 business units to define forecasting objectives, improving planning alignment by 47% and establishing budgeting and performance evaluation standards. - Developed data acquisition workflows using SQL on PostgreSQL to extract financial records and configured Azure pipeline automation, increasing refresh efficiency by 22% and supporting quarterly forecasting cycles. - Processed records using Python to clean and validate values and utilized Alteryx workflows to standardize formats across 1.2M ledger entries, preparing model-ready datasets that supported accurate forecasting analyses. - Conducted regression to model cost-revenue relationships and employed time series analysis to identify seasonal patterns, improving forecasting reliability by 39% and enabling leadership to evaluate performance conditions. - Integrated finance data using data warehousing practices and implemented Snowflake pipelines consolidating 18 data sources, supporting unified KPI logic and financial reporting across dashboards and analytical layers. - Designed Tableau dashboards visualizing profitability and cost variance insights and created reports used by 30+ finance stakeholders, improving trend evaluation by 15% and supporting planning and review discussions. - Performed ad hoc analysis using SSRS to investigate cost variances and maintained reproducible workflows using Git and Visual Studio Code, supporting standardized analytical development and structured collaboration across teams. - Delivered insights using analytical thinking and A/B testing results, enabling leadership to improve decisions and revenue strategy adjustments by 21% across quarterly review cycles and forecasting discussions.	

EDUCATION

Master of Science in Computer & Information Science	Aug 2023 – May 2025
Southeast Missouri State University, Cape Girardeau, Missouri	
Bachelor of Technology in Computer Science and Engineering	Jul 2018 – Jun 2022
Bharath University, Chennai, India
