SUMMARY

Data Analyst with nearly **5 Years** supporting enterprise decision-making across **SaaS, banking, financial services, and supply chain** domains. Skilled in **SQL, Python, Snowflake, Power BI, Tableau, and Excel** to automate reporting and elevate KPI visibility. Delivered **30+ analytics solutions** through **Agile** collaboration and strong **data governance**, including **customer segmentation, dashboard development, A/B testing, and transaction insight reporting** for enhanced **banking operations**.

TECHNICAL SKILLS

- **Data Analysis & Visualization:** SQL, Excel (PivotTables, Power Query, VBA), Power BI (DAX), Tableau, Python (Pandas, NumPy), R, KPI dashboards, basic forecasting
- **Business Analysis & Documentation:** Requirements gathering (BRD, FRD basics), stakeholder communication, process mapping (Visio/Lucidchart), gap analysis, Agile fundamentals, Jira
- **Databases & Data Management:** MySQL, PostgreSQL, MongoDB basics, data storage and retrieval
- **Cloud & Programming:** Cloud platforms basics (AWS, Azure, Google Cloud), Python scripting, shell scripting, REST API basics, Git version control
- **Process Optimization & Quality:** Root cause analysis, workflow design, collaboration tools (SharePoint, Salesforce CRM)
- **Compliance, Governance & Methodologies:** GDPR, HIPAA, SOX awareness, data governance, Agile and Scrum methodologies

PROFESSIONAL EXPERIENCE

Bank of New York Mellon | Data Analyst | USA

Apr 2025 – Present

- Consolidated trade, positions, and market data from **7 source systems** into a validated **SQL/Snowflake** repository using **Python ETL** workflows, enabling teams to run **40+ self-service analyses** monthly through effective stakeholder collaboration.
- Built **Tableau** and **Power BI** dashboards tracking **AUM flows**, liquidity, and risk metrics, applying **Python** statistical analysis to surface **12 actionable insights** for front-office decision-makers.
- Communicated regulatory and performance findings by translating complex **SQL** queries into executive-ready reports, supporting **6 reporting cycles** with accurate, on-time delivery across **compliance** and **finance** teams.

Dell Technologies | Data Analyst | India

Oct 2020 – Dec 2022

- Spearheaded updates to executive **sales and operations reporting** by moving **Excel** trackers into **SQL Server** and **Power BI**, giving leaders in **6 regions** real-time **KPIs** and reducing report prep from **4 days to 1 day**.
- Built reusable **ETL** workflows using **Python, Power Query**, and database scripts to combine **MySQL** and **PostgreSQL** data, supporting **50 million+ records** and improving dashboard refresh time to **2.3 seconds**.
- Delivered marketing insights by creating **A/B test** tables in **SQL**, analyzing results in **Python**, and sharing visuals in **Tableau**, helping teams choose **5 winning customer journeys** and gain **4,200** additional orders.
- Improved forecasting dashboards in **Power BI** with simple **time-series models**, using **Excel** inputs from **7 warehouses**, which lowered emergency shipments by **140** within one fiscal year.
- Designed organized **data models** and documentation aligned with **GDPR, HIPAA**, and **SOX**, applying basic **SQL** validation to remove **28** conflicting metrics and resolve **9** quality issues.
- Gathered reporting needs across product, finance, and operations, created **Jira** stories, and led **UAT** with **4** teams, resulting in approval of **12** dashboards and **3** self-service data marts.

KPMG | Data / Business Analyst | India

Jan 2019 – Sep 2020

- Analyzed SaaS client telemetry and CRM data using **SQL, Excel PivotTables**, and **Tableau** to identify **11** high-risk usage trends, helping account teams retain **60** enterprise accounts over **2** renewal cycles.
- Delivered **BI reporting** for mid-market US clients by converting **BRD** and **FRD** requirements into **Power BI** and **Tableau** dashboards, producing **14** executive reports combining data from **9** source systems across **Azure**.
- Automated recurring reporting with **Python (Pandas), Power Query**, and scheduled pipelines in **Azure Data Factory**, eliminating **12** manual tasks and freeing **35** analyst hours each month.
- Collaborated with product, finance, and engineering teams in **Agile** sprints to refine **Jira** backlogs and manage **UAT**, gaining approval on **27** analytics stories and earning a top performance ranking of **1** among **15** analysts.

PROJECTS

Automated Data Pipeline and BI Reporting:

- Designed and automated an **ETL pipeline** using **Python, Airflow**, and **AWS (S3, Glue, Redshift)** to ingest CRM and finance data, eliminating **18** recurring manual file loads and stabilizing reporting for **6** business teams.
- Developed **Power BI** dashboards with standardized **KPIs**, integrating data from **5** source systems into a centralized warehouse, enabling executives to review performance in under **10 seconds** during weekly reviews.

Customer Retention and Churn Analysis:

- Analyzed telecom customer behavior using **Python (Pandas, NumPy)** and **SQL** on a dataset of **100,000+** records, surfacing **14** churn-risk patterns that guided targeted outreach campaigns.
- Built **logistic regression** and **decision tree** models with engineered features, raising prediction accuracy to **0.90**, and visualized churn segments in **Power BI** to support retention planning across **3** customer cohorts.

EDUCATION

Masters in Computer and Information Science | University of Southern Mississippi, Hattiesburg, USA

Jan 2023 – Dec 2024

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- AZ-900 Microsoft Azure Fundamentals
