

Muthu Chockalingam Supply Chain Analyst

mveerappan399@gmail.com | (682) 367-0838 | USA | LinkedIn

Summary

Versatile and detail-oriented Supply Chain Analyst with over 10 years of experience in supply chain operations, procurement, analytics, and ERP systems. Skilled in streamlining processes, leveraging data for strategic insights, and supporting digital transformation initiatives. Strong background in cross-functional collaboration, demand planning, and performance optimization to drive efficiency and improve end-to-end supply chain effectiveness.

Technical Skills

- **ERP & Supply Chain Systems:** SAP S4 HANA, SAP IBP, SAP MM, Oracle EBS, Transportation Management Systems (TMS), Warehouse Management Systems (WMS)
- **Data Analytics & Reporting:** Power BI, Excel Macros, SQL, Python, R, Predictive Analytics, KPI Dashboards, Statistical Analysis, Data Extraction (ETL)
- **Tools & Methodologies:** Value Stream Mapping, Lean Manufacturing, Six Sigma, Kaizen, Sales & Operations Planning (S&OP), Integrated Business Planning (IBP), Continuous Improvement
- **Procurement & Operations:** Strategic Sourcing, Category Management, Supplier Performance Metrics, Vendor Management, Contracting, Procurement Process Optimization, Inventory Planning
- **Planning & Compliance:** Capacity Planning, Demand Forecasting, Risk Assessment & Mitigation, Regulatory Compliance, Trade Compliance, ESG & Sustainable Supply Chain Practices
- **Soft Skills & Leadership:** Cross-Functional Collaboration, Stakeholder Engagement, Communication, Data Storytelling, Change Management, Problem-Solving, Critical Thinking, Time Management, Adaptability

Professional Experience

Senior Consultant, Supply Chain and Operations, Ernst & Young LLP 08/2019 – Present | TX, USA

- Directed Oracle EBS to SAP MM migration for Fortune 50 Oil and Gas client, managing ETL of ~10k materials, requirements, design documents, testing and hypercare, improving data accuracy and availability by 95%.
- Redesigned category taxonomy for Fortune 50 Oil and Gas client using industry standards, enhancing user experience, increasing spend visibility by 70%, and enabling standardized analytics and reporting across procurement and finance functions.
- Delivered \$600M spend analytics for global Oil and Gas client in craft labor, cleaned and normalized data, created PowerBI dashboards, and identified \$320M in spend with potential savings of over 50%.
- Standardized procurement policies and processes across Category Management, Sourcing, Contracting, Vendor Management, Purchasing and Payments, aligning 30+ business units and improving procurement efficiency and compliance by 40%.
- Assessed procurement organization, analyzed roles and FTE counts, identified gaps, and recommended structure changes, improving role clarity and reducing redundancies by 30% while enabling scalable support for future-state operations.
- Designed and implemented supplier management framework covering segmentation, onboarding, enablement, performance, innovation, risk and compliance, enhancing supplier collaboration and improving performance tracking and risk mitigation by 60%.
- Supported SAP S4 HANA and IBP transformation for global clients, led change management, stakeholder engagement, training and communications, increasing system adoption rates by 85% and improving global planning accuracy by 20%.

Supply Chain Analyst, TCS (Client: Renault Nissan Mitsubishi Alliance) 06/2011 – 07/2017 | Chennai, India

- Facilitated Sales and Operations Planning (S&OP) meetings, aligning cross-functional teams to balance supply and demand, successfully reconciled conflicting forecasts, ensuring accurate capacity planning and improved inventory control.
- Conducted detailed Value Stream Mapping to identify production bottlenecks. Implemented capacity enhancements, resulting in an 8% reduction in cycle time and increased throughput across manufacturing operations.
- Collaborated closely with Japanese clients as a key liaison. Built trust and diverted strategic projects to the India delivery center, enhancing client satisfaction and increasing revenue pipeline for TCS.
- Developed and tracked key supplier performance metrics (KPIs). Implemented lean manufacturing principles to optimize production processes, improving overall supplier efficiency and on-time delivery performance.
- Led a 15-member team in end-to-end supply chain operations, consistently achieved quality and delivery KPIs through robust process controls, workflow automation, and regular performance reviews.
- Analyzed historical sales data to forecast global spare parts demand. Ensured supply continuity by aligning procurement strategies with predictive analytics, reducing stockouts and excess inventory.
- Automated multi-source report generation using Excel Macros. Reduced lead time by 30%, improved data accuracy, and enabled faster decision-making for product lifecycle and supply chain management activities.

Education

Master's in Supply Chain Management (GPA 3.95) 08/2017 – 05/2019

University of Texas at Dallas, Texas, USA

Bachelor's in Mechanical Engineering (GPA 3.09) 08/2007 – 05/2011

College of Engineering, Guindy, Anna University, Chennai, India

Certification

APICS Certified Supply Chain Professional (CSCP)

SAP MM Certificate
