

KAVYA KUNDETI

Denton, TX | kundeti.kavya02@gmail.com | +1(314)-723-2833 | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Data Analyst with 3+ years of experience across banking, healthcare, and technology domains delivering analytics solutions in regulated, enterprise environments
- Strong expertise in Python and SQL for data validation, cleansing, transformation, and multi-source ETL pipelines processing 50K+ records monthly
- Proven ability to build and optimize Power BI and Excel dashboards to track KYC, operational, clinical, and financial KPIs for business stakeholders
- Hands-on experience supporting NLP and ML workflows, including labeling 60K+ structured and unstructured records to improve model accuracy and performance
- Experience developing and supporting FastAPI microservices with Pydantic validation to enhance data ingestion quality and reduce downstream processing issues
- Skilled in working with large-scale datasets (500K+ records) using PostgreSQL to enable accurate reporting and ad-hoc business analysis
- Delivered measurable impact through data quality improvements, automation, and workflow optimization, reducing errors, delays, and manual effort
- Microsoft Certified Power BI Data Analyst Associate, Google Advanced Data Analytics Certified, and Deloitte Data Analytics Job Simulation credential holder

SKILLS

- **Programming & Query Languages:** Python, SQL, Git/GitHub
- **Data Analysis & Processing:** Pandas, NumPy, Data Validation, Data Quality Audits, ETL Pipelines, Data Profiling, Statistical Analysis
- **Business Intelligence & Visualization:** Power BI (DAX, Power Query), Excel (Pivot Tables, VLOOKUP, Power Pivot), Tableau, Matplotlib, Seaborn
- **Databases & Cloud Platforms:** PostgreSQL, Snowflake, Data Modeling (Star & Snowflake Schemas), AWS S3
- **APIs & Backend Development:** FastAPI, RESTful APIs, Pydantic, Jupyter Notebooks
- **Machine Learning & NLP Support:** Snorkel, Label Studio, Apptek, Scikit-learn
- **ETL & Automation Platforms:** Informatica, Alteryx, Python ETL Pipelines, Google Apps Script
- **Testing, QA & Governance:** UAT, Regression Testing, Data QA Frameworks, Audit Readiness, Data Lineage, PII Handling
- **Methodologies & Collaboration:** Agile (Scrum, Kanban), SDLC, JIRA, Cross-functional Collaboration, Confluence, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Wells Fargo – Remote, United States

Data Analyst | June 2024 – Present

- Validated and cleansed client and KYC data using Python and SQL, boosting accuracy and ensuring regulatory compliance.
- Labeled 50K+ structured and unstructured records via Snorkel, Datasaur, and Label Studio to enhance NLP model training.
- Optimized annotation workflows in Apptek, reducing sentiment tagging and keyword extraction time by 40%.

- Created 10+ Power BI and Excel dashboards monitoring KYC metrics and party hierarchies for compliance officers, enabling faster identification of high-risk accounts and reducing audit preparation time by 15%.
- Partnered with engineers and compliance teams to integrate CI/CD pipelines, cutting model deployment defects by 30%.
- Delivered 100% on-time audit support by standardizing SOPs and improving client data governance processes.

Key Achievements:

- Enhanced KYC data accuracy by 40% and reduced onboarding delays by 25% by implementing scalable QA frameworks.
- Boosted NLP model performance by 35% by refining data labeling strategies and improving annotation quality.

Legato Health Technologies – Bengaluru, India

Analyst | Feb 2022 – July 2023

- Built Python ETL pipelines to extract, transform, and load patient demographic data from multiple CSV sources, processing 50K+ records monthly with 98% accuracy
- Developed FastAPI endpoints with Pydantic validation schemas for provider data ingestion, improving data reliability by 25% and reducing downstream processing errors
- Designed and maintained 5+ Power BI dashboards tracking operational KPIs such as appointment volumes, claim submissions, and provider enrollment for stakeholder reporting
- Wrote optimized SQL queries on PostgreSQL datasets containing 500K+ healthcare provider records to support monthly reporting and ad-hoc business analysis
- Conducted systematic data quality audits using Python and SQL, identifying 200+ duplicate and inconsistent records and supporting remediation efforts
- Labeled 10K+ medical records for NLP model training, contributing to an increase in automated coding accuracy from 75% to 82%

Key Achievements:

- Reduced manual data entry errors by 30% by implementing automated validation rules and data quality checks in the provider onboarding workflow
- Improved Power BI dashboard refresh times from 5 minutes to 2 minutes by optimizing SQL queries and enabling incremental refresh

EDUCATION

- **Master of Science in Information Systems** | Saint Louis University | Saint Louis, MO | 08/2023 - 12/2024

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- Google Advanced Data Analytics Professional
- Deloitte: Data Analytics Job Simulation
