

NILAM PATEL

Senior Data Analyst

📞 248-225-1353 @ nilamj54@gmail.com 🔗 <https://www.linkedin.com/in/nilam-patel-77418075/>

SUMMARY

Senior Data Analyst with 10+ years of experience in data analytics, relational database management, ETL development, and business intelligence (BI) solutions. Extensive hands-on expertise in Informatica PowerCenter, SSIS, SQL Server, and end-to-end data integration, migration, and transformation processes. Strong experience in requirements gathering, data profiling, data cleansing, data validation, and data analysis across enterprise data platforms. Proven ability to design, develop, test, and support ETL pipelines in both development and production environments. Skilled in writing and optimizing SQL queries, stored procedures, views, and performance tuning for large-scale data extraction, transformation, and aggregation. Experienced in developing interactive dashboards and reports using Power BI, delivering actionable insights and supporting data-driven decision-making. Demonstrated success in client-facing roles, stakeholder communication, and translating business requirements into technical solutions. Strong background in SDLC, Agile methodologies, production support, issue resolution, and managing multiple projects in fast-paced environments with a focus on accuracy, scalability, and on-time delivery.

EXPERIENCE

Sr. Data Analyst

Aflac

📅 2022 - 2025 📍 Las Vegas, NV

- Designed and developed ETL workflows integrating data from Genelco (Mainframe), GE Hub (Snowflake), CRM systems into centralized staging to Wynsure
- Led data analysis, integration, and migration ensuring accurate policy ID migration and reliable enterprise reporting
- Advanced data profiling, quality assessment, reconciliation, validation; fixed data issues, enhanced accuracy, completeness
- Designed and optimized SQL queries, stored procedures, and views to support efficient data extraction, transformation, aggregation, and ad-hoc analysis across large datasets
- Developed interactive Power BI dashboards and reports visualizing trends, data quality metrics, KPIs, and migration status, enabling data-driven decision-making
- Conducted root cause analysis on data discrepancies and migration errors, collaborating with business, engineering, and offshore teams to ensure timely resolution and minimal disruptions while operating in Agile and Waterfall environments
- Partnered with business analysts to refine reporting requirements and deliver scalable ETL solutions tailored to business needs
- Authored Low Level Design (LLD) and Source to Target Mapping (STM) documents defining ETL logic and transformation rules
- Coordinated with offshore development teams to address development and data related issues to ensure timely delivery of project milestones

SKILLS

Languages

SQL HTML Java Python

Data Warehousing & ETL Tools

Informatica PowerCenter SSIS

Snowflake

Reporting & Visualization Tools

SSRS Power BI

Methodologies

Agile SDLC

Productivity Tools

Microsoft Office Suite (Excel Word

PowerPoint Outlook)

KEY ACHIEVEMENTS

Enhanced Data Quality

Reduced reporting errors by 25% through rigorous data quality initiatives.

Streamlined ETL Processes

Increased ETL efficiency by 30%, supporting faster data delivery across teams.

Data Profiling Processes

Developed 50+ unique data profiling enhancing decision-making speed for executives.

STRENGTHS

Advanced SQL

Data Modeling

Stakeholder Management

Cross-Functional Collaboration

Team Leadership

EXPERIENCE

Data Analyst

Assurant

📅 2018 - 2022 📍 Atlanta, GA

- Performed data validation, profiling, reconciliation, and root cause analysis on incoming client data to improve data quality, reporting accuracy, and overall data reliability
- Led business analysis and client implementations
- Translated requirements into scalable solutions
- Designed, developed, and automated ETL workflows and reports using SSIS, SSRS, and SAS, improving data processing efficiency and reducing manual reporting effort
- Migrated client setups from mainframe to SSIS (DTM Front End) standardizing implementation rules and data process workflows to ensuring data accuracy, integrity, auditability, and scalability
- Processed monthly client files through mainframe workflows, analyzed post-processing errors to pinpoint data and formatting and communicated detailed finding to clients to correct and resubmits the file for successful processing

Data Analyst

MYZEAL IT Solutions LLC

📅 2015 - 2018 📍 Atlanta, GA

- Designed and implemented SSIS ETL and data migration packages to transition legacy data from Oracle Database to SQL Server 2012, ensuring data accuracy, integrity, and audit compliance
- Validated, reconciled, and analyzed data with Excel (pivot tables, formulas, conditional formatting) for reporting accuracy and decision-making
- Developed and maintained SQL Server Reporting Services (SSRS) reports based on business and functional requirements for operational and management reporting
- Collaborated with clients, business analysts, and technical teams to gather, analyze, and translate business requirements into detailed technical and analytical specifications
- Conducted ETL performance tuning, troubleshooting, and debugging to optimize data integration workflows and improve processing efficiency and reliability
