

Sai Jagadesh Satagopam

Supply Chain Analyst

Location: Hartford, CT, USA | Phone: +1 (203) 290-7744 | Email: saisatagopam.17@gmail.com | [linkedin.com/in/sai-satagopam](https://www.linkedin.com/in/sai-satagopam)

SUMMARY

Supply Chain Analyst with 3+ years of experience in **procurement**, **logistics**, and **inventory management**. Technical proficiency includes SAP MM, Ariba, Oracle OTM, SQL, and Python. Skilled in demand **forecasting**, **spend analysis**, and **BOM management** within **automotive** and **energy sectors**. Experienced in utilizing **Power BI** and **Tableau** for data-driven operational analysis.

WORK EXPERIENCE

General Motors

Hartford, CT

Supply Chain Analyst

September 2025 – Present

- Reconfigured multi-modal freight routes for EV battery components using Oracle Transportation Management (OTM), effectively reducing transit costs by \$60,000 in the first quarter of operations.
- Synthesized production volume data using Python and predictive modeling to align Tier 1 supplier output with daily assembly schedules, preventing 4 potential line stoppages due to parts shortages.
- Audited semiconductor supply compliance against ISO quality standards to mitigate risk, resulting in the successful recovery and allocation of 5,000 critical microchip units for the Ultium platform.
- Standardized the Bill of Materials (BOM) update process within the Teamcenter PLM system, which synchronized engineering changes across departments and saved the planning team 8 hours of manual cross-referencing weekly.
- Mobilized a cross-functional task force comprising logistics, engineering, and finance stakeholders to resolve a sudden raw material disruption, securing alternative sourcing channels within 48 hours to maintain production continuity.

Adani

India

Supply Chain Procurement Analyst

May 2022 – July 2023

- Architected a strategic sourcing framework for renewable energy components using Ariba Sourcing, which consolidated supplier negotiations and directly reduced material procurement costs by \$150,000 annually.
- Cataloged and analyzed vendor performance data across 50+ key suppliers using SQL and Tableau, identifying critical service gaps that led to the termination of underperforming contracts and improved on-time delivery by 3 days.
- Expedited the procurement cycle for heavy machinery spare parts by implementing a Kanban inventory system, cutting the requisition-to-pay timeline by 2 weeks for urgent maintenance requests.
- Harmonized communication channels between engineering, finance, and external logistics providers to manage import documentation for international shipments, successfully avoiding \$10,000 in customs penalty fees.
- Revitalized the purchase order approval workflow by integrating ERP automation tools, which removed manual data entry bottlenecks and saved the procurement team 15 hours of administrative work per week.
- Benchmarked global commodity price trends against internal spending patterns to renegotiate long-term agreements for raw materials, securing a fixed-price contract that protected the budget against a \$30,000 market fluctuation.

Adani

India

Supply Chain Analyst Intern

December 2021 – May 2022

- Spearheaded a comprehensive logistics audit using SAP MM and Excel Pivot Tables to identify bottlenecks in raw material procurement for thermal power projects, resulting in a reduction of lead time by 5 days per shipment cycle.
- Orchestrated cross-functional collaboration between procurement, inventory, and vendor management teams to streamline the dispatch scheduling process, effectively saving the department \$12,000 in monthly demurrage and detention costs.
- engineered a robust inventory tracking dashboard using Power BI to visualize stock levels across 3 regional warehouses, which eliminated stockouts for critical components and improved order fulfillment rates by delivering 200+ additional units on schedule.
- Negotiated strategic vendor contracts by leveraging historical pricing data and demand forecasting models, successfully securing fixed rates that cut annual operational expenditures by approximately \$45,000.

TECHNICAL SKILLS

- ERP & Supply Chain Systems:** SAP ERP (MM, PP, SD modules), SAP Ariba, Oracle SCM Cloud, Oracle Transportation Management (OTM), Siemens Teamcenter (PLM), Coupa, JDA/Blue Yonder, Salesforce.
- Data Analysis & Visualization:** Advanced Excel (VBA, Macros, Pivot Tables, Power Query), SQL (Data Querying), Microsoft Power BI (DAX), Tableau, Python (Pandas/NumPy for Forecasting), Google Analytics.
- Supply Chain Operations:** Demand Forecasting & Planning, Inventory Management (JIT, EOQ, Safety Stock), Logistics Optimization, Warehouse Management Systems (WMS), Multi-modal Freight, Import/Export Compliance (Incoterms), Bill of Materials Management.
- Procurement & Sourcing:** Strategic Sourcing, Vendor Relationship Management (VRM), Contract Negotiation, Spend Analysis, RFP/RFQ/RFI Lifecycle Management, Supplier Risk Assessment, Cost Benefit Analysis, Category Management (Direct & Indirect).
- Process Improvement & Methodologies:** Lean Six Sigma, Kaizen, Root Cause Analysis, Agile Supply Chain, Continuous Improvement, KPI Development, Total Quality Management (TQM), ISO Standards Compliance.

EDUCATION

University of New Haven

New Haven, CT

Master of Science in Engineering & Operations Management

August 2023 - May 2025

CERTIFICATION

- Six Sigma Green Belt – Certified
- Power BI – Professional Certification
- Microsoft Excel – Advanced Certification
- Amazon Web Services (AWS) – Cloud Practitioner
- SolidWorks – Certified User
- ANSYS – Certified Fundamentals
