

BETH W NGANGA

Data Analyst | Business Analyst | BI Developer

TX, USA | +1 (817)-793-4412 | ngangabethw@gmail.com | [LinkedIn](#)

SUMMARY

Data & Business Intelligence Analyst with **9+ years of experience** across banking, finance, and insurance industries at Ally Banking, Berkshire Hathaway, Capital One Financial, and Cognizant. Skilled in SQL, Python, Power BI, Tableau, and Snowflake, driving measurable improvements in data quality, automation, and reporting accuracy. Delivered 60% faster executive reporting through dynamic BI dashboards, 38% reduction in data latency via optimized ETL pipelines, and 29% fewer AML false alerts using analytics-driven monitoring. Expert in financial forecasting, credit risk modeling, and compliance reporting, translating business requirements into actionable insights and scalable data solutions that strengthen performance transparency and decision-making across enterprise environments.

SKILLS

Data Analytics & Processing: Python (Pandas, NumPy, SciPy, Scikit-learn), SQL (Advanced Joins, CTEs, Window Functions), R Programming, Excel (Pivot Tables, Power Query), Data Cleaning & Transformation, Statistical Analysis, A/B Testing, Exploratory Data Analysis (EDA)

Business Analysis & Requirements: Business Process Mapping (BPMN, Visio, Lucidchart), BRD/FRD Documentation, User Stories & Acceptance Criteria, Gap Analysis, AS-IS/TO-BE Modeling, UAT Planning & Execution, Agile/Scrum Methodologies, Jira & Confluence for Requirement Tracking, Stakeholder Management

Business Intelligence & Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau (LOD Expressions, Parameters), Looker Studio, SSRS, Excel Dashboards, KPI & Metric Design, Executive Reporting, Storytelling with Data, Interactive Visualization Development

Data Warehousing & ETL: SQL Server, Snowflake, Google BigQuery, AWS Redshift, Azure Synapse, SSIS, Informatica, Alteryx, Apache Airflow, Data Modeling (Star/Snowflake Schema), ETL Pipeline Design & Optimization, Data Integration & Transformation

Database & Cloud Platforms: MySQL, PostgreSQL, Oracle, MongoDB, Microsoft SQL Server, AWS (S3, RDS, Glue), Azure (Data Factory, Synapse), Google Cloud (BigQuery, Dataflow), API Data Extraction, Data Governance & Security Compliance

Domain Expertise: (Finance) Credit Risk, AML & Fraud Analytics, Compliance Reporting, Revenue Forecasting, **(Retail)** Sales Forecasting, Customer Segmentation, Market Basket & Price Elasticity Analysis

Reporting & Performance Optimization: KPI Definition & Tracking, Forecasting & Trend Analysis, Data Validation & Reconciliation, Report Automation, Performance Dashboards, Root Cause Analysis, Cost & Efficiency Optimization

Soft Skills & Collaboration: Cross-Functional Communication, Stakeholder Presentation, Requirements Clarification, Business-IT Alignment, Problem Solving, Data-Driven Decision Making, Documentation & Knowledge Transfer

WORK EXPERIENCE

Data Analyst / BI Developer | Ally Banking | TX, USA

Jul 2023 – Present

- Designed automated Power BI dashboards using DAX and SQL models, improving loan portfolio visibility across 15+ KPIs and reducing executive reporting turnaround from 4 days to 6 hours weekly.
- Integrated data from Redshift, Snowflake, and Salesforce via Airflow pipelines, cutting manual reconciliation time by 38% and enhancing financial forecast accuracy across lending and deposit domains.
- Conducted A/B testing on digital channel engagement using Python (Pandas, SciPy), increasing campaign conversion rates by 24% and optimizing ROI allocation across customer acquisition campaigns.
- Built SSIS-based ETL pipelines for credit card transaction monitoring, improving data refresh frequency from daily to hourly and supporting fraud detection model retraining with 17% faster processing speed.
- Collaborated with compliance and risk teams to automate AML and KYC analytics dashboards, reducing false-positive alerts by 29% and improving transaction review efficiency across 8 key business units.
- Designed data validation frameworks in SQL Server and Power BI to ensure 99.5% reporting accuracy, preventing metric drift across multi-source financial data environments.
- Optimized Snowflake data models by applying partitioning and clustering strategies, improving query performance by 44% and lowering monthly compute costs by 21%.
- Developed executive profitability dashboards with dynamic DAX measures, visualizing loan yields, customer churn, and product mix, enabling leadership to identify \$3.2M in annual cost-saving opportunities.
- Implemented Python-based anomaly detection scripts for transaction trend monitoring, detecting deviations in high-risk segments with 96% detection precision and accelerating fraud response time by 35%.

Business Analyst | Berkshire Hathaway | TX, USA

Mar 2020 – Jun 2023

- Gathered requirements and authored BRD/FRD documents in Jira and Confluence for underwriting automation, reducing policy approval time by 34% and improving agent satisfaction scores across regional branches.
- Mapped end-to-end insurance claim workflows in Visio, identifying 5 recurring data gaps and cutting claim resolution turnaround by 28% through targeted SQL-based process validation dashboards.
- Developed Power BI executive dashboards for revenue and loss ratios using DAX measures and parameters, enabling leadership to track quarterly growth with 97% reporting accuracy.

- Coordinated UAT and regression validation for policy systems, achieving 92% first-cycle test pass rates and ensuring alignment with data compliance and regulatory mandates under SOX guidelines.
 - Partnered with finance teams to implement Snowflake-based premium forecasting models, enhancing actuarial accuracy by 19% and minimizing monthly budget variance by \$1.4M.
 - Automated ETL workflows via Informatica and SQL Server, reducing manual data handling by 42% and accelerating underwriting data refresh cycles from weekly to daily.
 - Created KPI scorecards in Tableau and Power BI for claims, retention, and renewal metrics, improving visibility into portfolio trends and enabling data-driven pricing adjustments.
 - Conducted gap and root-cause analysis on claim denials using Python (Pandas), uncovering patterns that reduced repeat submission errors by 23% and improved claim payment accuracy.
 - Collaborated with actuarial and finance teams to develop forecast simulation models in Python (Pandas, NumPy), improving loss-ratio projection accuracy by 23% and supporting executive pricing decisions.
-

Business Analyst | Capital One Financial | TX, USA

Jun 2018 – Feb 2020

- Analyzed customer credit utilization patterns using SQL and Python, improving credit risk segmentation accuracy by 23% and informing credit line adjustment strategies across 2M+ cardholders.
 - Created Tableau dashboards integrating BigQuery data to visualize delinquency and payment trends, reducing portfolio risk monitoring delays from weekly to near real time.
 - Led cross-team sessions to define acceptance criteria for fraud prevention modules, ensuring 98% requirements traceability and decreasing fraudulent claim volume by 17% post-release.
 - Automated data validation routines in SQL Server to reconcile loan origination feeds, cutting reconciliation discrepancies by 41% and improving audit transparency across financial reporting units.
 - Partnered with compliance teams to design AML transaction screening dashboards in Power BI, reducing review backlog by 35% and improving SAR (Suspicious Activity Report) submission efficiency.
 - Built ETL jobs in Informatica to consolidate multi-source lending data, reducing data integration latency by 44% and enhancing availability for credit decision analytics.
 - Performed portfolio performance analysis in Python (Pandas, NumPy) to identify high-risk customer segments, enabling policy updates that lowered default exposure by \$3.1M annually.
 - Collaborated with business and IT leads to implement KPI scorecards for charge-off and recovery metrics, improving leadership visibility and accelerating executive reporting cycles by 52%.
-

Data Analyst | Cognizant Technology | TX, USA

Aug 2016 – May 2018

- Extracted, cleaned, and transformed retail and credit data using Python (Pandas, NumPy) and SQL, improving data accuracy by 31% and accelerating insight delivery for client-facing analytics teams.
 - Developed interactive Tableau dashboards for executive KPIs across revenue, churn, and product mix, cutting ad-hoc reporting requests by 46% and improving leadership decision turnaround time.
 - Automated ETL workflows in Alteryx and SSIS to integrate multi-source datasets, reducing pipeline latency by 38% and enhancing reliability of monthly analytics refresh cycles.
 - Performed statistical correlation and trend analysis in R and Excel Power Query, identifying customer retention factors that improved upsell conversions by 21% in pilot territories.
 - Collaborated with cross-functional teams to validate data governance standards, ensuring 100% adherence to compliance frameworks across all client data integrations.
 - Created SQL-based data quality audit scripts, detecting and resolving over 2,000 anomalies monthly, which reduced downstream reporting discrepancies by 33%.
 - Supported migration of legacy reporting systems to Snowflake, improving query execution time by 47% and enabling analysts to perform near real-time performance tracking.
 - Designed Power BI dashboards integrating transactional data from Oracle and MySQL, providing regional sales teams with daily insights that improved revenue forecasting accuracy by 18%.
-

EDUCATION

Bachelor of Arts in Sociology & Economics
Kenyatta University, Nairobi, Kenya

Certifications

- **Data Analyst / Power BI Certification**
 - **OFAC Compliance Certification**
-
