Professional Summary

Data Analyst with senior-level expertise in designing automated data pipelines and interactive reporting solutions. Delivered a real-time portfolio data pipeline that cut daily refresh time from 4 hours to 30 minutes and built Power BI dashboards that accelerated investment decisions by 70%. Previously streamlined month-end financial close at Mphasis, reducing processing time by 80% through Alteryx automation. Seeking to apply advanced analytics and visualization skills to drive strategic insights and operational efficiency.

Skills

- **Visualization & Reporting:** Power BI, Tableau, Excel (Power Query, Pivot Tables, VBA automation), Qlik
- **Databases & Cloud Platforms:** Snowflake, SQL Server, MySQL, PostgreSQL, Azure Data Lake, AWS (S3, Lambda)
- **Core Competencies:** Data extraction and aggregation, Automated reporting, KPI development, Scorecards, Performance reviews, Process improvement, Data quality management, Predictive modeling
- **Data Analytics & Programming:** SQL, Python (pandas, numpy, scipy), R, VBA
- **ETL, Data Modeling & Integration:** Alteryx, Azure Data Factory, Databricks, Apache Spark, ETL/ELT development, Data Lakes, Data Warehousing
- **Collaboration & Version Control:** JIRA, Git/GitHub, Confluence, Agile methodologies

Work Experience

State Street

Apr 2025 - Present

Data Analyst

USA

- Designed and deployed automated data pipeline extracting real-time portfolio data from Bloomberg and FactSet APIs into SQL Server, Azure Databricks, and Snowflake, reducing daily data refresh time from 4 hours to 30 minutes (85% improvement)
- Engineered and refined data modeling layers in Snowflake, Databricks, and SQL Server to establish a single source of truth and support robust analytics for a two-sided marketplace.
- Developed interactive Power BI and Tableau dashboards tracking portfolio performance KPIs (returns, Sharpe ratios, VaR, sector exposures) with 15-minute auto-refresh during market hours, enabling 70% faster investment decision-making for portfolio managers
- Created standardized Excel VBA templates connected to Snowflake for scenario analysis, reducing modeling time by 65% and enabling analysts to run complex what-if analyses with minimal manual effort
- Created and maintained ETL/ELT pipelines and supported predictive analytics development, deploying forecasting models and automating insights delivery.
- Collaborated with portfolio management and risk teams to understand operational pain points, translating business requirements into scalable analytical solutions that enhanced real-time visibility into multi-billion dollar portfolios

Mphasis

Jan 2021 - Jul 2023

Data Analyst

India

- Designed Alteryx-based automation workflow integrating data from 15+ source systems using SQL, transforming month-end financial close process from 10 days to 2 days (80% reduction) and enabling faster strategic decision-making for global finance controllers
- Built unified treasury reporting solution connecting Bloomberg Terminal (FX rates, market prices), FactSet (credit analytics), and Snowflake databases through Azure Data Factory pipelines, improving liquidity visibility by 70% and shifting updates from weekly to daily
- Transformed variance reporting by creating interactive Power BI dashboards with drill-down capabilities and embedded Power Query logic in Excel templates, reducing manual reconciliation work from 40 hours to 14 hours monthly (65% improvement)
- Developed Python-based treasury forecasting models (pandas, statsmodels) deployed on AWS (Lambda, S3) to simulate 20+ funding scenarios simultaneously, enhancing forecast accuracy by 60% and supporting multi-condition treasury planning
- Instituted high-integrity data processes and modeled Azure Data Lake and Snowflake data warehouses to ensure accurate, scalable storage in support of analytics and reporting initiatives.
- Supported team adoption of Power BI and Alteryx by creating reference guides, templates, and providing hands-on mentorship to colleagues transitioning from manual Excel workflows to automated reporting solutions, resulting in faster report generation and reduced manual effort

Certifications

- Microsoft Power BI Data Analyst (PL-300): In Progress
- Google Data Analytics Professional Certificate

Education

California State University, Fullerton

Master of Science, Information Systems

Fullerton, CA, USA

Gandhi Institute of Technology and Management

Bachelors of Technology, Computer Science, Business Systems

Hyderabad, TS, IND
