

Mohith Raghudeep Reddy Chowdavaram | Data Analyst

USA | +1(315)-741-8705 | cmohithreddy2808@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Data Analyst with 3+ years of experience delivering end-to-end data solutions, including data collection, cleaning, validation, analysis, and visualization. Proficient in SQL, Python, Excel, Tableau, Power BI, and cloud platforms (AWS, Azure) to extract insights, automate reporting, and optimize workflows. Experienced in statistical analysis, predictive modeling, and dashboard development to support strategic decision-making. Skilled in collaborating with cross-functional teams to translate complex data into actionable insights, improve operational efficiency, and enhance reporting accuracy.

SKILLS

Data Analysis & Programming: SQL (queries, joins, CTEs, data extraction), Python (Pandas, NumPy, automation scripts), Excel (advanced formulas, pivot tables, macros, VLOOKUP/XLOOKUP), Data Cleaning & Preprocessing

Business Intelligence & Visualization: Tableau, Power BI, Dashboarding & Reporting, KPI Tracking, Data Storytelling

Databases & Cloud Platforms: SQL Server, IBM Netezza, Synapse, AWS, Azure

Analytics & Statistical Techniques: Descriptive, Diagnostic, Predictive Analysis, Exploratory Data Analysis (EDA), Trend & Pattern Analysis, Correlation & Regression, Customer & Campaign Analytics, ROI Metrics

Automation & Workflow Optimization: SQL & Python automation, Reporting Workflow Optimization, Process Documentation

Domain Exposure: Financial Services Analytics (Loans, Credit Risk, Product Performance), Healthcare Analytics (Employee Benefits, Healthcare Costs), Retail & Media Analytics (if applicable)

Soft Skills & Business Competencies: Analytical Problem Solving, Attention to Detail, Cross-Functional Collaboration (Marketing, Product, Finance, HR), Adaptability, Time Management

EXPERIENCE

- Data Analyst (Intern) | Capital One Financial | TX, USA

Jun 2025 - Present

 - Collected, cleaned, and approved large and complex datasets related to employee healthcare benefits and health plan utilization using SQL and Python, improving overall dataset accuracy and reliability by 20%.
 - Analyzed trends in healthcare costs, utilization patterns, and benefit usage across multiple employee groups, identifying actionable optimization opportunities that reduced internal healthcare expenses by 15%.
 - Planned and developed interactive Tableau dashboards to visualize employee health metrics, benefits engagement, and cost trends, enabling HR and finance teams to make informed, data-driven decisions.
 - Executed predictive and statistical analysis on healthcare plan utilization, supporting proactive adjustments to benefits offerings and better resource allocation across the organization.
 - Computerized recurring healthcare reporting processes using Python scripts and Power Automate, reducing manual reporting effort by 30% and accelerating the delivery of insights to key stakeholders.
 - Collaborated closely with cross-functional teams, including HR, finance, and technology, to evaluate healthcare program performance and provide actionable recommendations to enhance employee wellness initiatives.
- Data Analyst | HCL | India

May 2022 - Dec 2023

 - Gathered, cleaned, and confirmed structured and unstructured data from multiple sources, improving dataset accuracy by 30% and reducing processing errors.
 - Developed and optimized SQL queries for data extraction, transformation, and manipulation across SQL Server, IBM Netezza, and Synapse databases, enhancing query efficiency by 25%.
 - Created interactive Power BI and Tableau dashboards to track key metrics, enabling stakeholders to monitor KPIs and make data-driven decisions in real time.
 - Carried out statistical and diagnostic analyses to identify trends, patterns, and anomalies, supporting revenue growth and operational improvements.
 - Mechanized recurring reporting processes using Python scripts and Power Automate, reducing manual effort by 40% and accelerating report delivery timelines.
 - Collaborated with cross-functional teams and global clients to gather requirements and deliver actionable insights, ensuring alignment with business objectives.
 - Supported predictive analytics initiatives such as sales forecasting and churn analysis, contributing to strategic planning and marketing campaigns.
- Junior Data Analyst | DMI Finance | India

May 2021 - Apr 2022

 - Accumulated, cleaned, and authenticated customer and loan-related datasets using SQL and Excel, improving overall data accuracy and reducing errors by 35% during reporting cycles.
 - Developed and systematized SQL queries for recurring data extraction and reporting tasks, reducing report preparation time by 25% and increasing workflow efficiency.
 - Performed exploratory and diagnostic analyses on customer engagement and loan portfolio metrics, identifying trends and patterns that informed product and marketing strategies.
 - Built and enhanced interactive Excel dashboards and summary reports to monitor key operational and financial KPIs, enabling faster review cycles and better decision-making.
 - Collaborated with product, marketing, and finance teams to perform campaign-level and portfolio analysis, delivering actionable insights that improved inquiry-to-application conversions by 10%.
 - Standardized and organized raw datasets while removing duplicates and inconsistencies, strengthening the foundation for accurate financial reporting and advanced analytics initiatives.

EDUCATION

Master’s in Information Technology | Webster University | USA

Dec 2025

Bachelor’s in Computer Science and Engineering | Visvesvaraya Technological University | India

May 2023

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Google – SQL, R, Tableau, and visualization. (Oct 2023)
- Enterprise Data Analysis and Data Science Methodologies (Level 2) – IBM (Jun 2022)
- Big Data Analysis with R Programming & ML with Python – Ether global Services Pvt Ltd (May 2022)

PROJECTS

- E-commerce Sales Performance Dashboard | SQL, Power BI

 - Designed a Power BI dashboard to track e-commerce sales, identify top customers and products, and monitor sales against the budget, utilizing SQL for data modeling, cleansing, and transformation.
- NYC School Performance Dashboard | SQL, Python, Tableau

 - Built interactive Tableau dashboards presenting key KPIs to analyze demographics’ impact on performance across 5000+ NYC high schools by cleaning and transforming data with SQL and Python.
- Manufacturing Operational Cost Optimization | Excel, SQL

 - Optimized manufacturing operational costs by analyzing 100+ production scenarios using SQL for data extrac-tion and Excel for regression analysis and Solver-based optimization.
