SUMMARY

Business Analyst with experience of 4+ years, translating customer, transaction, and market data into actionable insights. Strong in SQL, Tableau/Power BI, and Excel automation to build KPI dashboards, segmentation, and performance deep-dives that improve product and business outcomes.

EXPERIENCE

*BlackRock, USA, **Business Analyst***

Jun 2024 - Present

Analyzed client + transaction + market datasets to identify trends, demand shifts, and performance drivers across product categories and channels.

Built and maintained Tableau + Excel KPI dashboards to track product/segment performance, adoption, retention, and key business signals.

Developed customer segmentation (behavior/needs-based cohorts) to inform product lineup decisions and targeted recommendations.

Produced assortment performance deep-dives (what to expand, reduce, or reposition) based on profitability, engagement, and trend momentum.

Designed test-and-learn measurement (A/B or pre/post) to evaluate pilot changes and quantify lift vs. baseline.

Automated weekly/monthly reporting using Power Pivot / VBA, reducing manual effort and improving data consistency.

Presented insights to both technical and non-technical audiences using simple narratives + visuals, driving faster decisions.

Flagged risks and opportunities through variance and trend monitoring; delivered actionable recommendations backed by data.

*Hexaware Technology, India, **Business Analyst***

Jan 2019 - Jul 2022

Analyzed 10M+ customer/transaction rows using SQL + Excel (Power Query, Pivot Tables) to identify assortment gaps, improving in-stock alignment by 6–10%.

Performed item performance deep-dives (Top/Bottom SKUs, cannibalization, seasonality) and recommended SKU rationalization, cutting low-velocity items by 8–12%.

Implemented forecast vs actual and variance analysis for store/channel performance; improved demand signal accuracy by 5–8% using time-series features.

Presented insights to technical and non-technical leaders using storytelling dashboards + executive summaries; influenced \$0.5M–\$2M annualized opportunity pipeline.

Tracked initiative performance (new item launches, substitutions, delists) and created post-mortem reports to standardize learnings and scale wins across categories.

Built reusable SQL datasets/views for assortment KPIs (item/store/channel level), improving analytics reusability and reducing ad-hoc requests by 20–30%.

Tracked initiative performance (new item launches, substitutions, delists) and created post-mortem reports to standardize learnings and scale wins across categories.

EDUCATION

University of Colorado Denver, United States

Masters in Information Science

Jawaharlal Nehru Technological University, India

LICENSES & CERTIFICATIONS

AWS Certified Cloud Practitioner

LogRhythm Security Analyst (LRSA) Certification

Agile Software Development' by University of Minnesota

SKILLS

SDLC • Agile/Scrum • Waterfall • Kanban • Business Process Modeling (BPM) • SQL (Advanced) • Python (for Data Analysis) • Excel VBA • FRD • BRD
