Data Analyst

PROFESSIONAL SUMMARY

- Experienced Data Analyst with over 9+ years of expertise in data extraction, transformation, and loading (ETL) using Informatica 10.5 PowerCenter
- Experience in ETL Informatica 10.5 PowerCenter with strong expertise in data extraction, transformation, and loading (ETL) from diverse source systems such as flat files, Excel, XML, Oracle, and SQL Server.
- Proficient in ETL processes using Informatica 10.5 versions 10.x/9.x/8.x (PowerCenter/Power Mart), including Designer, Workflow Manager, Workflow Monitor, and Server Manager.
- Extensive experience with Informatica 10.5 MDM (Master Data Management) for designing, developing, testing, reviewing, and optimizing MDM solutions.
- Skilled in using various BI tools such as Power BI and Tableau for data visualization and reporting.
- Skilled in creating Mappings, Trust and Validation rules, Match Path, Match Column, Match rules, Merge properties, and Batch Group creation.
- Competent in creating and maintaining entity objects, hierarchies, entity types, relationship objects, and relationship types using the Hierarchy tool in MDM HUB implementations.
- Proficient in installing, configuring, and maintaining core Informatica 10.5/MDM Hub components, including MDM Hub Console, Hub Store, Hub Server, Cleanse Match Server, Cleanse Adapter, and Data Modeling.
- Experienced in optimizing SQL scripts for improved performance in data warehousing environments.
- Implemented data warehousing methodologies using Informatica 10.5 Designer, Repository Manager, Workflow Manager, and Workflow Monitor.
- Published reports to Power BI Service, configured data refresh schedules, and managed access permissions for different user groups.
- Developed and implemented data quality rules using Informatica 10.5 Data Quality (IDQ) and cleaned data within the IDQ environment.
- Expertise in using SAS Data Step for data manipulation, cleaning, and preparation.
- Designed and developed dimensional data warehouses using Star and Snowflake Schemas, including SCD (Slowly Changing Dimensions) Type 1/2/3 mappings following Ralph Kimball methodology.
- Proficient in coding with Oracle (11g/10g/9i/8i) and SQL Server (2000/2005/2008), including SQL, PL/SQL procedures, functions, triggers, and exception handling.
- Developed and automated batch jobs using UNIX Shell scripts for data loading, pushing, and pulling from various servers.
- Expertise in using DAX (Data Analysis Expressions) for creating calculated columns, measures, and custom calculations.
- Integration of R and Python scripts for advanced data analysis and visualizations within Power BI.
- In-depth knowledge of OLAP/OLTP systems, including E-R modeling, and development of database schemas (Star Schema, Snowflake Schema, Conforming Dimensions, and SCDs) for relational, dimensional, and multi-dimensional modeling.
- Experienced in utilizing SQL and NoSQL databases for querying and data manipulation.
- Proficient in using Apache Hadoop and Spark for big data processing and analysis.
- Experience with data integration tools like Talend and Alteryx to streamline data workflows.
- Excellent communication and interpersonal skills can work effectively independently and as part of a team.

TECHNICAL SKILLS

Business Intelligence	Microsoft Power BI, Tableau, Cognos 11, BOBJ, SAS, SSRS.
ETL Tools	Informatica 10.5, DataStage, SSIS PowerCenter 10.x/9.x/8.x, Informatica 10.5 Data Quality
Languages	SQL, PL/SQL, HTML, JSP, Java Script., Python, R. Unix Shell Scripting
Databases	ORACLE 10g, 11g, 18c, DB2, MS SQL 2019, MS Access, Azure, PLSQL Developer, Oracle TOAD, SQL Navigator, SPARK, Management Studio
Data Modeling Tools	Erwin 4.1, Visio 2000, UML
Operating System	Microsoft 7/Vista/XP/2000/NT, UNIX, Sun Solaris 5, Linux

Packages	MS Office (MS Access, MS Excel, MS PowerPoint, MS Word)
RDBMS	Oracle11g/10g/9i, SQL Server 2000/2005/2008, Teradata
Job Scheduling Tools	AutoSys, Control M
Other tools	Apache Hadoop, Spark, Talend, Alteryx, DAX, Scikit-learn, TensorFlow, Power Exchange

PROFESSIONAL EXPERIENCE

The University of Texas **Nov 2024 to present**

Role: Data Modeler / Sr Data Analyst

Responsibilities:

- Designed and developed conceptual, logical, and physical data models to support data warehousing and business intelligence initiatives.
- Collaborated with stakeholders to gather and analyze business requirements and translate them into optimized data structures.
- Experienced in writing complex Teradata SQL queries, performance tuning, and working with large-scale enterprise datasets
- Proficient in using Big Data ecosystems like Hadoop, Hive, Spark, and HDFS for processing and analyzing large-volume datasets.
- Maintained detailed audit trails by documenting all data-related activities, access changes, and resolution steps within ServiceNow.
- Skilled in building data pipelines leveraging distributed computing frameworks to support high-volume ETL workflows.
- Used Java for building data processing logic, custom ETL components, automation scripts, and integration workflows.
- Developed Java-based user exits and validations within MDM and data integration platforms to ensure data quality and consistency.
- Used Microsoft Fabric to ingest, clean, and transform large datasets using Dataflows and pipelines for analysis.
- Built and optimized database schemas to improve data integrity and retrieval performance.
- Tracked and managed incoming data and report requests through ServiceNow to ensure timely fulfillment.
- Identified, logged, and resolved data issues using ServiceNow incident and ticket management workflows.
- Developed and managed ETL (Extract, Transform, Load) processes to integrate data from multiple sources into a centralized data warehouse.
- Ensured data quality and consistency by implementing data governance standards and performing regular validation checks.
- Created and maintained data dictionaries and metadata documentation to support data understanding and usage across teams.
- Reviewed and approved data access requests, ensuring proper permissions and compliance with data governance policies.
- Built Lakehouse models and optimized queries with SQL/Notebook environments to improve reporting accuracy and performance.
- Hands-on experience with Teradata utilities such as BTEQ, FastLoad, and FastExport for efficient data movement and processing.
- Monitored team and individual workload using ServiceNow dashboards and assigned tasks as needed.
- Provided technical guidance on improving data architecture, enhancing reporting capabilities, and streamlining data management processes.
- Assisted in data migration and validation during system upgrades and transitions.

Environment: Oracle, MySQL, SQL Server, Informatica 10.5, Talend, SSIS, Erwin, Power Designer, SQL, PL/SQL, Python, Tableau, Power BI, Linux

Bank of the West, San Francisco, CA **Aug 2021 – Oct 2024**

Role: Sr Data Analyst / Data Modeler

Responsibilities:

- Collaborated with the Data Steward Team to design, document, and configure Informatica 10.5 Data Director, supporting the management of MDM data.
- Managed data integration using Integration Hub, including Reference Data Management (RDM), User Management, UI Configuration, and handling LCA and workflow.
- Designed, analyzed, and developed processes to incorporate customer, account, product, employee data, and their hierarchical relationships.

- Worked with ETL Developers to create External Batches, executing mappings and Mapplets using Informatica 10.5 Workflow Designer, integrating data from Oracle, DB2, flat files, and SQL databases into landing tables of Informatica 10.5 MDM Hub.
- Designed and implemented data governance frameworks to ensure compliance with banking regulations and internal data policies.
- Developed data quality standards, monitoring processes and reduced data discrepancies to a large extent.
- Conducted gap analysis and audits to assess data governance maturity and recommend actionable improvements.
- Integrating SAS with external databases (e.g., Oracle, SQL Server) for efficient data extraction and analysis.
- Conducted data analysis for source and target systems, with a strong understanding of Enterprise Data Warehousing concepts, staging tables, Dimensions, Facts, and Star Schema.
- Validated data in source and target systems using PL/SQL queries.
- Proficient in integrating Excel with Power Query for advanced data transformation and ETL processes.
- Developed SQL queries to retrieve information from the database as per requirements, validating master data in MDM against the source.
- Part of the DCA team identifying gaps between source and MDM repository, planning and executing ETL transformations to correct over 5 million records across various facts and dimensions.
- Designed and collaborated in the development of user exits using Java and external front-end applications built over the entity 360 layouts for MDM Data consumption.
- Leveraged advanced analytics tools such as Python and R for data analysis and modeling.
- Utilized business intelligence tools like Power BI and Tableau for creating interactive dashboards and reports.
- Employed cloud-based data storage and analysis platforms such as AWS Redshift, Google Big Query, and Microsoft Azure.
- Applied big data technologies like Apache Hadoop and Spark for large-scale data processing and analysis.
- Integrated data workflows using tools like Talend and Alteryx to streamline data management processes.
- Implemented machine learning models using Scikit-learn and TensorFlow to drive predictive analytics and insights.

Environment: Informatica power Center 10.4 (power Center Repository Manager, Designer, Workflow Manager, and Workflow Monitor), Informatica 10.4 MDM 10.4 HF2, Power Mart, Informatica Power Exchange, Oracle 19c, PL/SQL, Data Warehouse, Autosys, SQL, UNIX Shell Scripts, Linux, Java, Scala, Hadoop, AWS.

Prudential Financial, Newark, NJ

July 2019 – July 2021

Role: Sr Data Analyst / Data Modeler

Responsibilities:

- Designed, developed, and implemented ETL processes to extract, transform, and load (ETL) data from inbound flat files and various source systems into databases using Informatica power Center.
- Worked extensively with transformations such as Source Qualifier, Expression, Aggregator, Router, Filter, Update Strategy, Connected and Unconnected Lookup, Sorter, Normalizer, SQL Transformation, and Sequence Generator.
- Collaborated with the Data Steward Team to design, document, and configure Informatica 10.5 Data Director to support MDM data management.
- Assisted ETL Developers in creating External Batches to execute mappings and mapplets using Informatica 10.5 Workflow Designer, integrating data from Oracle, DB2, flat files, and SQL databases into landing tables of Informatica 10.5 MDM Hub.
- Configured match rule set properties in MDM by enabling search by rules according to business requirements.
- Used Informatica Repository Manager to maintain repositories of various applications, create users and user groups, and manage security access control.
- Developed mappings to move data from landing to staging using various cleanse functions.
- Wrote SQL queries to retrieve information from databases based on requirements.
- Created mappings to load Fact and Dimension tables, including SCD Type 1 and SCD Type 2 dimensions, and incremental loading, performing unit tests on the mappings.
- Interacted with business users and data architects to implement changes to data warehouse design continuously.
- Extracted data from Oracle and SQL Server, using Teradata for data warehousing.
- Created sessions to extract, transform, and load data into the data warehouse.
- Designed, developed, and tested software (Informatica PL/SQL, UNIX shell scripts) for maintaining data marts (extracting, transforming, loading data).

- Developed mappings and workflows according to business logic, quality, and coding standards using Informatica 10.5 power Center.
- Migrated mappings and sessions from development repositories to production repositories.
- Participated in the full Software Development Life Cycle (SDLC), including business requirements analysis, preparation of technical design documents, data analysis, logical and physical database design, coding, testing, implementation, and deployment to business users.
- Designed, developed, and tested PL/SQL stored procedures and packages for ETL processes.
- Created UNIX shell scripts for ETL jobs, session log cleanup, dynamic parameter management, and maintained shell scripts for data conversion.
- Leveraged modern data analytics tools such as Python and R for data analysis and modeling.
- Utilized cloud-based data storage and analysis platforms like AWS Redshift, Google Big Query, and Microsoft Azure.
- Applied big data technologies like Apache Hadoop and Spark for large-scale data processing and analysis.
- Integrated data workflows using tools like Talend and Alteryx to streamline data management processes.

Environment: Informatica 10.5 power Center 10.1/9.6.1 (power Center Repository Manager, Designer, Workflow Manager, and Workflow Monitor), Informatica 10.5 MDM, Power Mart, Informatica 10.5 Power Exchange, Oracle11g/10g, PL/SQL, Data Warehouse, Oracle11g, Autosys, SQL, UNIX Shell Scripts, Linux.

Qwest Communications International, Denver, CO

April 2017- June 2019

Role: Data Analyst / Data Modeler

Responsibilities:

- Developed Data Flow diagrams and Test plans, spanning from OLTP systems to staging to Data warehouse.
- Designed and developed Informatica Mappings from OLTP to Stage and Stage to DWH, utilizing Informatica 10.5 Transformations such as Source Qualifier, Joiner, Expression, Router, Aggregator, Connected and Unconnected Lookup, Normalizer, and Update Strategy.
- Designed relational data warehouse with constraints for importing data, implementing primary keys, foreign keys, stored procedures, triggers, views, and functions.
- Created Data Flow Mappings to extract data from source systems and load it to staging areas.
- Updated data into Data Warehouse using Slowly Changing Dimensions (Type 2) Transformation.
- Developed strategies for Incremental data extractions and data migration, assisting in designing Logical/Physical Data Models.
- Expertise in Excel Pivot Tables for dynamic data summarization, reporting, and analysis.
- Applied Data Masking techniques for preserving referential integrity of user data.
- Built Unix Shell scripts for PL/SQL programs, scheduling them on Control M.
- Participated in the design, development, and testing of PL/SQL stored procedures and packages for ETL processes.
- Developed UNIX script and Autosys scheduler jobs to execute batch jobs and perform File and Data Archival tasks.
- Prepared Unit Test plans and efficient unit test documentation along with Unit test cases for developed code.
- Validated data in source and target systems using PL/SQL queries.
- Assisted in migrating mappings and sessions from development repository to production repository.
- Utilized modern ETL tools and technologies to streamline data integration processes and optimize performance (e.g., Talend, Apache Spark).

Environment: Informatica power Center 9.5.1, Power Exchange 9.5.1, AS-400(DB2), Oracle 11g, SQL/P SQL, SQL Server 2005/2K, AIX, Windows XP, LINUX, UNIX, Control M.

Client: CVS Health, Richardson, TX.

April 2015 – March 2017

Role: ETL Developer.

Responsibilities:

- Conducted requirement gathering, data analysis, and user meetings, translating user inputs into ETL design documents.
- Created and maintained entity objects, hierarchies, entity types, and relationship objects using Hierarchy tool for MDM HUB implementation.
- Contributed to the development and implementation of the MDM decommissioning project using Informatica Power Center, reducing implementation and development costs and time.
- Implemented data cleansing using Informatica cleanse functions.
- Proficient in using Excel for data cleaning, transformation, and manipulation.

- Conducted data analysis for source and target systems, demonstrating a strong understanding of Data Warehousing concepts, staging tables, Dimensions, Facts, Star Schema, and Snowflake Schema.
- Optimized ETL loads and redesigned ETL interfaces to ensure accurate data delivery for business needs.
- Utilized mapping parameters and variables, session parameters, PMCMD commands, and email tasks.
- Managed Informatica 9.6 administration tasks including code migration, user creation, folder creation, and handling shortcuts across shared and non-shared folders, also wrote Autosys scripts for workflow scheduling.
- Rectified PLSQL procedures to ensure accurate data retrieval.
- Developed reports incorporating Conditional blocks/Variables and associated them with queries to display data based on specified conditions.

Environment: Informatica power Center 8.6, Oracle, TOAD, SQL*Loader PL/SQL Toad, Autosys, UNIX, Azure Cloud and Python.

EDUCATION DETAILS

- Master's Degree in English
- Bachelor's Degree in Psychology
