

## Data Analyst

**Name:** Vaishnavi Aare

**Email.Id:** vaishnavivarma.0909@gmail.com

**Ph. No:** 603-551-0535

**LinkedIn:** [www.linkedin.com/in/vaishnaviaare](http://www.linkedin.com/in/vaishnaviaare)

---

### **PROFESSIONAL SUMMARY:**

- 5 years of experience as Data Analyst with functional and industry experience with accomplished process and project responsibility such as Data analysis, design, development, user acceptance & performance management.
- Strong professional experience with emphasis on Analysis, design, development, testing, maintenance and implementation of Data Mapping, Data Validation, and Requirement gathering in Data warehousing Environment.
- Experience in data warehousing applications using ETL tools and programming languages like python, R, Java, Scala, Matlab, SQL/PLSQL, Oracle and SQL Server databases and SSIS.
- Experience in handling huge set of data using cloud clusters like Amazon Web Services (AWS), MS Azure, Amazon, Redshift, Hadoop and archiving the data.
- Performed Data analysis and Data profiling using complex SQL on various sources systems including Oracle and Teradata.
- Experience in providing custom solutions like Eligibility criteria, Match and Basic contribution calculations for major clients using Informatica and reports using Power BI, Tableau, Looker, QlikView.
- Experience in Data Analysis, Data Profiling, Data Migration, Data Integration and validation of data across all the integration points.
- Proven ability to work with large, structured & unstructured datasets, performing data cleaning, feature engineering, and exploratory data analysis (EDA).
- Familiarity with ETL (Extract, Transform, Load) processes, tools like Apache NiFi, Apache Airflow, or dbt (Data Build Tool) are crucial for working with data pipelines.
- Experienced in Big Data technologies including Apache Hadoop and Apache Spark with expertise in data extraction and exploratory analysis.
- Designed and developed weekly, monthly reports by using MS Excel Techniques (Quip, Zoho Sheet or WPS Spreadsheets. Charts, Graphs, Pivot tables) and Power point presentations
- Experience with Data analysis and SQL querying with database integrations and data warehousing for large financial organizations.
- Strong working experience in Data Cleaning, Data Warehousing and Data Massaging using Python Libraries and My SQL.
- Experienced in A/B testing, customer analytics, product analytics, and financial data modeling.

### **TECHNICAL SKILLS:**

Programming: Python (Pandas, NumPy, Scikit-learn), R, SQL (Advanced), DAX

Data Visualization: Power BI, Tableau, Looker

Cloud Analytics: AWS (Redshift, Athena, Glue), GCP BigQuery, Azure Synapse

Databases: MySQL, PostgreSQL, SQL Server, MongoDB

Big Data: Spark, PySpark, Databricks

ETL/ELT: dbt, Airflow, SSIS, Talend

Tools: Excel (Power Query, Power Pivot), Git, JIRA, Confluence

Concepts: EDA, Statistical Modeling, A/B Testing, Predictive Analytics

### **EDUCATION:**

Master of Science in Business Analytics

Southern New Hampshire University, USA

Bachelor of Engineering in Electronics & Communication

TKR College of Engineering & Technology, India

## **PROFESSIONAL EXPERIENCE:**

**Client: HCA Healthcare, Nashville, TN**

**July 2024- Present**

**Role: Data Analyst**

### **Responsibilities:**

- Implemented and followed Agile development methodology within the cross-functional team and acted as a liaison between the business user group and the technical team.
- Conducted exploratory data analysis (EDA) to identify trends and patterns in business operations.
- Analyzed and compared data consistency across sectors, using advanced Data Visualization tools like Power BI, Tableau to identify trends and discrepancies.
- Utilized SQL, Python, R, and Tableau for advanced data processing and predictive analytics, enabling proactive risk identification and improved safety monitoring.
- Centralized sales and inventory data storage using Azure services to enhance scalability and improve real-time analytics capabilities for decision-making.
- Conducted predictive analytics using machine learning models (Scikit-learn, TensorFlow),
- Developed ETL pipelines with Informatica to automate retail data integration from various systems, supporting seamless data flow and accurate analysis for merchandising.
- Automated data workflows with Apache Airflow, orchestrating complex data movement across cloud platforms.
- Utilized Docker and Kubernetes for containerized workload deployment, ensuring scalability and auto-scaling.
- Implemented natural language processing (NLP) with Python (NLTK) to analyze patient feedback, extracting actionable insights to enhance patient care strategies and improve service quality.
- Conducted A/B testing to optimize marketing campaign effectiveness
- Automated MS Excel spreadsheets and converted data into an MS Access database, Pass-Through SQL Queries from MS SQL.

**Client: First Horizon Bank – Charlotte, NC**

**Dec 2023 – June 2024**

**Role: Data Analyst**

### **Responsibilities:**

- Supported the design and enhancement of KPI dashboards in Tableau under senior analyst guidance to track customer experience, branch performance, and marketing metrics for retail banking teams.
- Assisted in integrating data from multiple banking and business systems into DOMO, performing data validation and reconciliation to ensure report accuracy.
- Participated in cross-functional requirement discussions with business analysts and stakeholders to understand reporting needs and document analytical requirements.
- Conducted data profiling and basic data modeling on customer, branch, and marketing datasets to support standardized enterprise reporting.
- Assisted with ETL workflows using AWS Glue, including data extraction, transformation logic, and schema validation in a cloud environment.
- Supported optimization of Power BI dashboards by applying best practices in data modeling and improving query performance.
- Contributed to descriptive and predictive analytics initiatives by preparing datasets, validating model outputs, and documenting analytical findings.
- Worked with cloud-based analytics platforms to analyze large datasets and support reporting and insights generation.
- Collaborated closely with senior analysts, BAs, and PMs to translate functional specifications into data queries, dashboards, and reports.
- Assisted in data migration and cleanup activities across Oracle, Postgres, MSSQL, and legacy systems using

established ETL processes.

- Enhanced existing Tableau dashboards by adding filters, drill-downs, and parameterized views based on business feedback.
- Helped enable self-service BI by organizing datasets, improving report templates, and maintaining basic documentation for end users.

**Client: Zaggie, Hyderabad, India.**

**Aug 2020 - July 2023**

**Role: Data Analyst**

**Responsibilities:**

- Evaluated new applications and identified system requirements.
- Visualized KPI metrics like resource utilization, net profit margin, gross profit margin and burn rate using Tableau.
- Conducted data extraction, transformation, and loading (ETL) processes using tools like Apache NiFi and Talend to ingest healthcare data from disparate sources.
- Designed and implemented data models using tools like Erwin and SQL Server Management Studio to ensure efficient storage and retrieval of banking data.
- Worked with ETL developers for testing, mapping data and aware of data models to translate and migrate data.
- Created Requirements Traceability Matrix (RTMs) using Rational Requisite Pro to ensure complete requirements coverage with reference to low level design document and test cases.
- Achieved in using advanced SQL queries and analytic functions for date calculations, cumulative distribution and NTILE calculations.
- Used advanced Excel formulas and functions like Pivot Tables, Lookup, If with and/index, match for data cleaning.
