Experience

Data Analyst (Research Assistant)

Feb 2025 - Dec 2025

Lindsey Wilson University

Columbia, KY

- Optimized data quality and analytical accuracy by spearheading advanced ETL processes, leveraging **Python**, Pandas, NumPy, **SQL**, and R for data transformation and statistical analysis, resulting in 25% improvement in metric accuracy
- Streamlined data retrieval and reporting efficiency by implementing advanced data management protocols with **PostgreSQL** and **AWS**, achieving a 50% reduction in retrieval times and empowering stakeholders with actionable insights.

Analytics Engineer

Mar 2022 - Mar 2024

HCL Technologies

Bangalore, India

- Designed and maintained end-to-end **ETL/ELT pipeline** using **Python**, **SQL**, **PySpark**, **AWS (S3, Glue, Lambda)** to ingest, process and transform large-scale structured and semi-structured data into analytics-ready datasets consumed by Tableau dashboards and ad-hoc analytics.
- Built scalable data transformation and processing workflows in **Databricks** using **PySpark**, creating curated fact and dimension tables that significantly improved query performance and supported self-service analytics and enterprise reporting.
- Implemented and optimized **Snowflake** data warehouse solutions, including schema design, performance-tuned SQL transformations, and cost-efficient querying to support high-concurrency Tableau workloads and analytical use cases.
- Developed complex **SQL** logic (CTEs, window functions, aggregations) to produce business-ready analytical views and datasets, enabling accurate KPI tracking, trend analysis, and executive-level reporting in **Tableau**.
- Designed and delivered interactive Tableau dashboards and reports, partnering with business stakeholders to define metrics, validate data accuracy, and provide actionable insights that supported operational and strategic decision-making.
- Implemented data quality checks, validation frameworks, and monitoring workflows using Python and SQL, ensuring data consistency, reliability, and trust across Snowflake, Databricks pipelines, and Tableau dashboards in production.

Data Science Intern

Aug 2021 - Oct 2021

Compsoft technology Solutions group

Bangalore, India

- Conducted an extensive analysis of over 10,000 Twitter data, leveraging **Python**, **NLTK**, and **Scikit-Learn** to classify sentiments. Achieved an impressive 85% model accuracy, demonstrating expertise in feature engineering.

Technical Skills

Programming Languages : Python, C, R, SQL (TSQL, PL/SQL)

Big Data Technologies : Apache Spark, Spark SQL, PySpark, Snowflake, Databricks, Hadoop

Cloud Platforms : AWS (S3, Glue, Lambda, Redshift, Athena), Azure (ADF, ADLS, AZURE SQL)

Data Engineering & ETL : ETL / ELT pipelines, Data ingestion & Transformation, Data Modeling, Data Quality & Validation

Tools and Technologies : Business Intelligence (Tableau, Power BI), Advanced Excel, DAX, KPI Design

Other Skills : NumPy, Pandas, Statistical analysis, Machine Learning, Seaborn, Matplotlib, MS Access, SSMS,

SaaS, PostgreSQL, MySQL, SAS, SQL Server, MS Access, Git, GitHub, Docker, CI/CD, JIRA

Projects

Customer Churn Analysis | SQL Server, Power BI, DAX, Python, statistical analysis

- Designed Power BI dashboards to analyze churn metrics, leveraging SQL Server for ETL and data preparation.
- Developed a Random Forest model in Python to predict customer churn, integrating results into interactive visualizations.

Cloud Data Lakehouse ETL Platform | AWS, PySpark, Databricks, Snowflake, Python, SQL

- Built an end-to-end cloud ETL pipeline using AWS, PySpark, and Databricks with incremental processing and data quality checks, delivering analytics-ready fact and dimension tables in Snowflake for BI and analytics.

Sales Performance & Trend Analysis | SQL, Tableau, Python, Statistical Analysis, Advanced Excel

- Analyzed sales data using SQL and Python to identify trends and customer insights, and built Tableau dashboards with KPI tracking to support business and executive decisions.

Enterprise KPI Analytics & BI Platform | Snowflake, SQL, Tableau, Power BI, DAX, Python

- Built a centralized analytics data mart in Snowflake using optimized SQL transformations and designed KPI dashboards in Tableau and Power BI with DAX for executive and operational reporting.

Education

Lindsey Wilson University - Master's in Data Science

Aug 2024 - Dec 2025 | Columbia, KY

Coursework: Big Data, Statistics, Database Management Systems, Data visualization, Data Structures, Machine Learning

Visvesvaraya Technological University - BE Electronics and Communications Aug 2018 - Jun 2022 | Bangalore, India
