Bloomington, IN | 930-904-4979 | krishapatelkp05@gmail.com | www.linkedin.com/in/krisha-p5

EDUCATION

Indiana University Bloomington

Master of Science, Data Science

Aug 2024 - Present

University of Mumbai

Bachelor of Engineering

Aug 2019 - May 2023

TECHNICAL SKILLS

- **Programming Tools:** Python, R, SQL, Java, C/C++, MATLAB, Git
- **Data Science & AI:** Data Cleaning (Pandas, NumPy, PySpark), Data Visualization, Predictive Analytics, ML, Deep Learning, NLP, GenAI, Time Series Forecasting, Statistics
- **Databases:** MySQL, PostgreSQL, MongoDB, Microsoft SQL Server
- **Cloud & Big Data:** AWS, Azure, GCP, Hadoop, SAP BW/HANA, Elastic
- **BI & Visualization:** Tableau, Power BI, Looker, Kibana, Advanced Excel
- **Frameworks & Libraries:** TensorFlow, Keras, PyTorch, Scikit-learn, Hugging Face Transformers

EXPERIENCE

Indiana University Bloomington

Data Science Research Assistant

IN, USA · Jan 2025 - Present

- Conducted statistical and geospatial analysis on a 200-hour corpus of Black English using Python and R; developed interactive heatmaps for data visualization of language variation and social conditioning factors.
- Collaborated with cross-functional teams to generate data-driven insights for NSF grant proposals and academic publications; applied ML and NLP techniques to analyze language change and socio-psychological patterns.
- Designed and automated end-to-end acoustic data pipelines using Python and pandas for data cleaning, reducing manual processing by 50% and accelerating linguistic research insights for NSF grant proposals.

Capgemini Technology Services India Limited

Data Analyst

Mumbai, IND · Jun 2023 - Aug 2024

- Extracted, transformed, and analyzed large-scale SAP SD datasets using SQL and advanced Excel to optimize order-to-cash processes and revenue tracking; designed automated ETL pipelines, reducing manual reporting by 40%.
- Developed SQL queries and SAP BW/HANA reports to improve sales analytics, pricing strategies, and invoicing accuracy; built predictive models using Python (scikit-learn, pandas) to forecast sales trends, improving accuracy by 18%.
- Developed Power BI and Tableau dashboards and configured Looker views for real-time business insights; collaborated on SAP S/4HANA migration, leading data validation and reconciliation, reducing invoice discrepancies by 25%.

Sahu Technologies

Data Analyst Intern

Mumbai, IND · Dec 2022 - Jan 2023

- Applied advanced statistical methods, including hypothesis testing, to extract actionable insights from large datasets and support business strategy.
- Optimized SQL queries to reduce execution time by 20%; engaged in database design improvements for faster, scalable operations.
- Built and presented Tableau dashboards to visualize complex metrics for cross-functional teams.

Python Developer/Analyst Intern

Mumbai, IND · Oct 2021 - Dec 2021

- Designed and optimized web-based dashboards using Python (Flask, Dash) and Power BI/Tableau, ensuring interactive, responsive data visualization.
- Conducted data cleansing, transformation, and integration using Pandas and NumPy, improving data accuracy and workflow efficiency.
- Developed SQL queries and Python scripts for data manipulation, exploratory analysis, and trend identification, reducing manual processing by 30%.

PROJECTS

Disease Prediction using Machine Learning

May 2023

- Developed ML models (logistic regression, decision trees, random forests) to predict disease onset based on patient data, achieving 87% accuracy.
- Performed data preprocessing, statistical analysis, and visualization in Python (pandas, scikit-learn), enabling early detection and improved patient outcomes.

AI Application for Upsell and Cross-sell of Solutions as per the Customer Behaviour using SVM

Dec 2022

- Built AI-driven recommendation system analyzing client behavior for personalized product suggestions using Python (Tensor Flow, Keras).
- Implemented collaborative and content-based filtering to improve recommendation relevance; integrated real-time data feeds to provide timely, personalized experiences.
