EDUCATION

The University of Texas at Dallas

Aug 2025 - Present

Master of Science in Business Analytics and Artificial Intelligence; GPA: 4.0

Anna University

Oct 2021 - Apr 2025

Bachelor of Engineering in Computer Science; GPA: 3.5

Relevant Coursework: Machine Learning, Artificial Intelligence, Advance Statistics for Data Science, Cloud Computing Fundamentals, Data Analytics, Database Management Systems, Big Data

TECHNICAL SKILLS

Skills: Python, SQL, R, Pandas, NumPy, Scikit-learn, XGBoost, TensorFlow, PyTorch

Machine Learning & Statistics: Regression, Classification, Clustering, Model Evaluation, Feature Engineering, Cross-Validation, Hypothesis Testing, A/B Testing

Data & Tools : EDA, Data Cleaning, Visualization (Matplotlib, Seaborn, Tableau), Git, Jupyter, MySQL, PySpark, AWS

Certifications: Data Analytics Professional Certificate (DeepLearning.AI), Machine Learning Specialization (Coursera)

PROFESSIONAL EXPERIENCE

Pantech Solutions

Jul 2023 - Aug 2023

AI Intern, Chennai, India

- Preprocessed and engineered large-scale image datasets using Python, Pandas, and NumPy with cleaning and feature engineering, improving training efficiency by 20%.
- Built CNN-based deep learning models (TensorFlow, OpenCV) for face recognition and drowsiness detection, achieving 90%+ accuracy while reducing false-positive rates through threshold tuning.
- Benchmarked ML algorithms (Logistic Regression, SVM, KNN) using cross-validation on 10K+ image samples, improving F1-score by 12% through hyperparameter tuning.
- Evaluated models using precision, recall, F1-score, and ROC-AUC; visualized metrics with Matplotlib/Seaborn, improving result clarity by 25%.

RELEVANT PROJECTS

Predictive Modeling of Loan Interest Rates | *Python (Pandas, NumPy, SciPy, Statsmodels)*

- Performed regression-based risk modeling on 50K+ financial records to identify borrower risk trends and key loan drivers, using statistical modeling and regression analysis to improve prediction performance (R^2 : 0.21 to 0.35).
- Built structured data workflows for cleaning, validation, and feature engineering (type checks, ranges, duplicates) to create reliable, analysis-ready datasets.

HR Analytics Dashboard | *SQL, Tableau, Excel*

- Built automated SQL pipelines and Tableau dashboards to analyze 1,500+ employee records, uncovering attrition patterns and workforce KPIs while reducing reporting time by 40%.
- Designed cleaned reporting tables and validation logic to ensure consistent dashboard metrics and dependable HR data insights.

Tech Industry Data Analysis & Preprocessing | *Python, SQL, Web Scraping(Beautiful Soup)*

- Performed exploratory analytics across 100+ firms to identify hiring trends, role distributions, and industry patterns supporting data-driven workforce insights.
- Engineered multi-source data extraction and preprocessing workflows, applying normalization, deduplication, and quality checks to improve data completeness by 30%.

LinkedIn Job Market Analysis | *Python (Pandas), MySQL, Data Modeling, Tableau*

- Analyzed 124K+ job postings to uncover hiring trends across 50+ industries and 2,000+ cities using SQL analytics and Tableau visualizations.
- Designed and optimized a 10+ table normalized MySQL database supporting 124K+ records and multi-table joins and validation queries to maintain relational integrity and ensure accurate reporting pipelines.
