SUMMARY:

Sales Operations and Business Analyst with over 4 years of experience supporting finance, sales, and retail analytics. Strong background in rebate and incentive analysis, data validation, partner reporting, and resolving payment discrepancies. Skilled in SQL, Python, Excel, BI tools, and CRM/ERP data, with a proven ability to ensure data accuracy, streamline processes, and communicate insights to business and partner stakeholders.

TECHNICAL SKILLS:

Data Visualization:	Power BI, Tableau, Excel, Power BI Service, Report Server
Data Quality & Analysis:	Python (Pandas, NumPy, SciPy, Scikit-learn, Stats models, Matplotlib, Seaborn, Plotly, Regex, Requests, Jupyter), SQL (Analytical queries, CTEs, Window functions), Statistical Analysis, Data Wrangling, Data Profiling, DAX, M Query, Data validation, anomaly detection, QA frameworks, data labelling, classification projects, root-cause analysis
Database Technologies:	MS SQL Server, Oracle, MySQL, Snowflake, PostgreSQL, Azure Synapse
Machine Learning & Gen AI:	Supervised & Unsupervised Models (Regression, Classification, Clustering), Feature Engineering, Model Evaluation, Cross-Validation, Time Series Forecasting, Generative AI Tools (OpenAI, Azure OpenAI), LLM Prompt Engineering, Embeddings, Vector Search, Model deployment using Azure ML
ETL & Data Integration:	Informatica, SSIS, ADF, DBT, Talend, Alteryx
Cloud & DevOps:	Azure (Databricks, ML Studio, Functions, Logic Apps), GitHub, Azure DevOps
Agile & Collaboration:	JIRA, Confluence, MS Teams, SharePoint

PROFESSIONAL EXPERIENCE:

Southside Bank, Tyler, TX | Business Analyst

Feb 2024 – Present

- Worked with Salesforce data exports (Opportunities, Accounts, Contacts) for reporting, validation, and dashboard automation.
- Designed and maintained Power Automate flows for approvals, notifications, and data movement between SharePoint, Excel, and Power BI.
- Monitored and troubleshoot automation flow failures resolved data mismatches, and documented fixes to improve reliability.
- Reviewed and validated sales, rebate, and incentive-related datasets to ensure accuracy and compliance with financial rules.
- Analyzed Salesforce CRM data (Opportunities, Accounts, pricing data) to support sales operations reporting and partner insights.
- Investigated and resolved data and payment discrepancies by reconciling claims, transactions, and supporting documentation.
- Extracted, cleansed, and standardized large datasets using SQL, Python, and Excel to maintain high data integrity.
- Built classification and regression models to predict customer behaviour and risk trends.
- Leveraged Azure Machine Learning for model training, versioning, and evaluation.
- Deployed ML models with MLflow tracking and automated retraining pipelines.
- Integrated Azure OpenAI for generating business insights and automated report summaries.
- Built RAG (Retrieval Augmented Generation) pipelines using Azure OpenAI + vector embeddings.
- Developed document intelligence workflows using LLMs to extract insights from PDFs and emails.
- Used embeddings-based semantic search to enhance internal analytics searchability.
- Developed Snowflake and Synapse-based data models to improve reporting speed.
- Built reusable data pipelines using Azure Data Factory and Databricks.
- Built and automated Power BI dashboards to track sales performance, incentives, and operational KPIs.

- Partnered with sales, finance, and operations teams to resolve issues, improve processes, and support automation initiatives.
- Documented data definitions, validation rules, and reporting logic for auditability and stakeholder clarity.

Ideabytes Software | Hyderabad, India | Business Analyst

Jun 2021 – Jul 2023

Client: Carter's

- Built ML prototypes for customer segmentation, churn prediction, and lifetime value scoring.
- Built Python automation for anomaly detection and data classification tasks.
- Supported retail and eCommerce analytics initiatives, focusing on sales performance, incentives, and operational metrics.
- Cleaned and reconciled multi-source datasets to support accurate reporting and downstream financial analysis.
- Used SQL and Python to identify trends, anomalies, and gaps in sales and partner data.
- Designed regression models to analyse factors influencing customer conversions.
- Used Python automation for data validation, anomaly detection, and pipeline efficiency.
- Implemented AI-powered insight summaries for business teams using OpenAI APIs.
- Built forecasting scripts for inventory and store performance.
- Collaborated with business and technical teams to test automation workflows and address data gaps.
- Developed Power BI and Tableau dashboards for executive and self-service reporting.
- Improved data quality through validation checks, UAT support, and process documentation.
- Ensured data accuracy via UAT, business rule documentation, and automated quality checks.

Education:

Webster University, Texas USA

- MS in Information Technology Management

St. Mary's Group of college, Hyderabad IN

- B. Tech in Computer Science and Engineering
