

Jiaqi (Bettie) Cheng

(510) 918-5343 | jiaqi-chengoffer@berkeley.edu | Berkeley, CA 94709 | www.linkedin.com/in/jiaqi-cheng-data

EDUCATION

University of California, Berkeley (Berkeley, CA)

Jul 2024 - Aug 2025

Master of Analytics, IEOR

Relevant Coursework: Optimization Models | Stochastic Processes | Time Series Analysis | Machine Learning and Statistical Learning | Applied Data Analytics | Data Engineering and SQL | Supply Chain Analytics

Universiti Putra Malaysia (Serdang, Malaysia)

Oct 2020 - Jun 2024

Bachelor of Science in Statistics with Honors

SKILLS

AI & NLP: AI-Augmented Development (Cursor), Transformer Models (BERT, FinBERT), Prompt Engineering

Programming/Data Analysis: Python (Pandas, Scikit-learn, PyTorch), SQL, R

Modeling: Time Series Analysis, Regression, Tree-based Models, Optimization (Gurobi), Statistical Tools (SAS)

Tools/Visualization: Tableau, Power BI, Streamlit, VS Code, Git, Jira

EXPERIENCE

Geopogo (California, USA)

Feb 2025 - Present

Data Analyst

- Designed and automated end-to-end data pipelines using Python and SQL for geospatial and rendering datasets, leveraging AI-assisted coding tools (e.g., Cursor) to improve data reliability in 3D visualization workflows and reduce manual data checks by ~30%.
- Built Tableau and Power BI dashboards to track user behavior, retention, and feature usage, helping product and engineering teams better understand feature adoption and user drop-offs across key workflows.
- Analyzed user flows and backend logs to identify retention gaps and friction points, including notable drop-offs at certain steps, and shared clear takeaways that informed UX tweaks and product planning.
- Worked closely with engineers and PMs to align on data needs, clean up inconsistent logging, and support product decisions in a fast-moving environment.

Capgemini Consulting (China) Co., Ltd. (Beijing, China)

Aug 2022 - Oct 2023

Data Science Intern

- Contributed to multiple data-driven projects including Gilead Sciences Innovation Competition, BMW Charge, and Digital Talent Development, cleaning and organizing large-scale customer and transaction datasets (100k+ records) using SQL and Python to support reporting and presentations.
- Built dashboards and automated reporting pipelines to summarize analysis results and share insights with both technical and non-technical stakeholders, helping teams better understand performance and customer behavior.
- Supported agile ceremonies (grooming, sprint planning, reviews, retrospectives), identified risks early, and helped align the scrum team on scope, priorities, and deliverables across R&D and product teams.
- Coordinated day-to-day project work across data, product, testing, and O&M teams, tracking progress with basic KPIs and supporting stable, on-time delivery of project milestones.

Bank of China (Beijing, China)

Jul 2022 - Aug 2022

Data Analytics Intern

- Built loan-default prediction models and conducted diagnostic analysis on historical banking data, supporting day-to-day credit-risk decisions.
- Automated SQL data-quality checks to improve accuracy and reliability of modeling workflows.
- Analyzed banking/credit datasets for risk and fraud, presenting findings for ongoing risk analysis.

Ping An Insurance Company of China (Beijing, China)

Jul 2021 - Oct 2021

Data Analytics Intern

- Analyzed large-scale insurance and claims data using Python, R, and SQL to detect anomalies and fraud patterns, supporting risk monitoring processes.
- Developed risk-scoring models and evaluated insurance product risk levels through statistical analysis, providing insights for product and sales strategy adjustments.
- Conducted customer segmentation and forecasting using predictive models, delivering targeted insights to support marketing optimization and operational efficiency.

PROJECT EXPERIENCE

U.S. Real Estate Market Data Analysis and Forecasting System Jan 2025 - May 2025

- Collected and processed 1M+ U.S. housing records via Dewey API, engineered spatial and property-level features and developed predictive pricing models using Python to quantify regional pricing drivers and risk patterns.
- Integrated Zillow and public market indicators to analyze real estate trends, built interactive visualizations in Tableau, and developed a Streamlit app for user exploration and evaluation of investment feasibility across U.S. regions.

Shein Supply Chain Management Analysis Jan 2025 - May 2025

- Designed a flexible production and logistics framework for Shein, integrating the EOQ model to optimize manufacturing and transportation planning under demand variability.
- Compared Shein's cost efficiency with Zara, Amazon, and other fast-fashion brands, analyzing differences in payment cycles and inventory pressure, and identifying levers with ~10-15% potential inventory cost savings.

Macroeconomic Variable Analysis on Labor Demand Jan 2025 - Apr 2025

- Built time-series and VAR models to examine the impact of GDP, CPI, and CCI on labor demand and business cycles.
- Applied Granger causality tests to identify leading relationships between macroeconomic variables and employment trends, supporting short-term labor market analysis.

Financial Market Sentiment and NLP Forecasting Sep 2024 - Feb 2025

- Modeled stock trends with ARIMA and LSTM using market and sentiment data for short-horizon forecasting.
- Applied BERT and FinBERT to extract news sentiment and integrate it into exploratory forecasting workflows.

Yelp Restaurant Review Rating Prediction Aug 2024 - Dec 2024

- Built supervised learning models on 6,272 training and 2,688 test observations to predict restaurant ratings.
- Evaluated out-of-sample performance with OSR² and translated findings into customer satisfaction insights.

Internet Business and Data Analytics Project Oct 2021 - Nov 2021

- Completed a transaction risk control analysis project using SQL, summarizing large-scale business data to support fraud and risk assessment scenarios.
- Mastered the business analysis process, became more proficient in structured query logic, and deepened understanding of data processing methods, binning, categorical variable filtering, data cleansing.

Leader of the Advanced Algorithmic Specialization Group Jun 2021 - Jul 2021

- Explained Green's Theorem, integration regions, and constraint-based problem solving to group members.
- Guided peers through structured problem-solving sessions and prepared solution notes for new learners.

HONORS & PRIZES

- Learning Role Model in the Spring Vine Growth Program of China Social Assistance Foundation May 2023
- Honorary title of Youth Star in "Charming Football" National Volunteer Recruitment Program Feb 2023
- Outstanding Volunteer of Ice Sports Publicity Activities, awarded by the Institute of Regional Reform and Development of the Chinese Academy of Management Dec 2022
- First Prize in the 2022 Emergency Rescue Exercise Competition for College Students Sep 2022
- Award of Excellence in the 2022 National Live Streaming Competition Aug 2022
- Top 5% in the 2020 Virtual Language Pentathlon Dec 2020
- First Prize in Mathematics in the National Selection Competition for the "Elite Cup" Dec 2017
- National Competition for Disciplinary Literacy and Creative Knowledge
- First Prize in the CCTV National English TV Contest (National Finals) Dec 2017

VOLUNTEER EXPERIENCE

- Volunteer, Automation and Artificial Intelligence Knowledge Popularization Volunteer Program Jul 2023
- Volunteer, 2023 National Youth Environmental Protection Volunteer Program Jun 2023
- Volunteer, 2022 National College Students' Ice Sports Volunteer Promotional Activities Dec 2022
- Volunteer, 2022 Energy Saving and Low Carbon Volunteer Activity for Universities Jun 2022
- Volunteer, WHO Emergency Standard Operating Procedures (SOPs) May 2022
- Volunteer, United Nations International Children's Emergency Fund (UNICEF) Jul 2021 - Apr 2022
