

Ashok Kumar Parihar | Data Analyst

MI, USA | +1(313)-213-3109 | ashokparihar2110@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 4+ years of experience in analytics, reporting, automation, visualization, and customer-focused insights across healthcare and technology domains. Skilled in SQL, Python, Power BI, Tableau, and cloud-based data platforms to deliver actionable business, marketing, and operational intelligence. Experienced in customer behavior analysis, KPI tracking, performance optimization, and hypothesis driven decision support. Adept at converting complex datasets into practical insights that improve efficiency, customer engagement, reporting accuracy, and business outcomes.

SKILLS

Programming & Scripting: Python (Pandas, NumPy, Matplotlib), R, SQL (PostgreSQL, MySQL, T-SQL), Advanced Excel (VBA, Macros), Shell Scripting
Data Visualization & BI Tools: Power BI, Tableau, Looker Studio, DAX, Excel Dashboards, Data Storytelling
Statistical & Analytical Techniques: Exploratory Data Analysis (EDA), Hypothesis Testing, Regression Analysis, Predictive Analysis, Forecasting, Time Series, A/B Testing, Segmentation, Clustering, Correlation
Databases & Warehousing: SQL Server, Snowflake, Databricks, BigQuery, Oracle, Amazon Redshift, MongoDB
ETL & Data Engineering: Alteryx, SSIS, Talend, Informatica, dbt (added), Apache Airflow (added), AWS Glue (added), Azure Data Factory, Data Migration, Pipeline Orchestration
Cloud Platforms: AWS (S3, Redshift, Lambda, Athena), Azure (Synapse Analytics, Data Factory), GCP
Data Modeling: Star/Snowflake Schema, Dimensional Modeling, Data Marts, Data Lakes, Normalization & Denormalization
Tools & IDEs: Jupyter Notebook, VS Code, Git, GitHub, Bitbucket, Jenkins
Reporting & Automation: KPI Dashboards, Executive Reporting, Scheduled Reporting, Automated Alerts, Power Automate, Email Automation
Soft Skills: Business Communication, Requirements Gathering, Stakeholder Engagement, Cross-Functional Collaboration, Presentation Skills

EXPERIENCE

Data Analyst Cigna Healthcare MI, USA	Nov 2024 - Present
- Analyzed large scale operational, financial, and customer utilization datasets using SQL and Python, delivering customer behavior insights and utilization trends to support marketing, care optimization, and service performance initiatives. - Designed and optimized complex SQL queries and Python-based validation scripts, reducing data processing time by 30% while improving data quality and reporting reliability. - Developed and maintained Power BI and Tableau dashboards to track KPIs, customer engagement, service adoption, and performance comparisons across regions and product lines. - Performed hypothesis-driven analysis and A/B testing on service delivery and engagement strategies, statistically validating outcome differences and supporting data backed decision making. - Conducted trend, variance, and regression based analyses to identify performance drivers and forecast operational bottlenecks, improving turnaround time by 15%. - Executed customer segmentation and utilization pattern analysis to compare behavior across demographics and plans, influencing targeted outreach and operational planning. - Partnered with business, marketing, and clinical stakeholders to define KPIs and translate analytical findings into actionable recommendations. - Presented insights through executive ready dashboards data storytelling, enabling leadership to evaluate performance optimize service strategies. - Implemented continuous process improvements data governance practices, strengthening analytics accuracy and compliance across reporting workflows.	
Data Analyst Innovaccer India	Sep 2021 - Jun 2023
- Managed the end-to-end analytics lifecycle across customer, product, and operational datasets using SQL, Python, and cloud platforms (AWS, Azure) to support product analytics and business intelligence initiatives. - Automated ETL workflows and analytical pipelines using Python and SQL, reducing processing time by 35% and ensuring scalable, reliable reporting for marketing and product teams. - Built interactive Power BI and Tableau dashboards to monitor customer engagement, product performance, funnel metrics, and growth KPIs. - Conducted customer segmentation, cohort analysis, and behavioral trend modeling to support customer retention, feature adoption, and go-to-market strategies. - Applied regression analysis, forecasting, and predictive modeling to identify key drivers of customer behavior and project future demand patterns. - Led comparative and hypothesis based analyses to evaluate product changes, validating impact through statistical testing and performance benchmarks. - Collaborated with cross functional stakeholders to gather requirements and translate insights into data driven product and marketing decisions, improving reporting efficiency by 25%. - Optimized analytical workflows and data pipelines, reducing manual effort by 30% while maintaining high data quality standards. - Delivered client facing reports, presentations, executive summaries, enabling leadership to prioritize strategic investments and roadmap decisions.	
Junior Data Analyst CitiusTech India	Jun 2020 - Aug 2021
- Analyzed operational and healthcare customer datasets using SQL and Excel, identifying trends and patterns to support business performance and quality improvement initiatives. - Developed and optimized SQL queries and automated ETL processes to improve data accuracy by 25% and streamline reporting workflows. - Created Power BI and Tableau dashboards visualizing KPIs, utilization metrics, and customer behavior, enabling faster decision making for stakeholders. - Performed exploratory data analysis, hypothesis testing, and statistical modeling using Python (Pandas, NumPy, and Matplotlib) to support predictive insights and operational optimization. - Supported forecasting and trend prediction by analyzing historical data and modeling future performance patterns. - Ensured strong data governance and compliance through rigorous data validation and secure handling procedures. - Translated analytical findings into actionable strategies through stakeholder collaboration, improving cost management and operational efficiency.	

EDUCATION

Master’s in Applied data analysis University of Detroit Mercy Detroit, USA	Apr 2025
Bachelor’s in Mechanical engineering Anurag group of institutions India	Jun 2021

PROJECTS

Business Performance Dashboard & KPI Analysis
- Built interactive Power BI dashboards to track operational and customer KPIs, trends, and performance metrics using SQL-based data models. - Automated data refresh and validation workflows, improving reporting accuracy and reducing manual effort. - Delivered actionable insights to business stakeholders to support performance optimization and decision-making. - Documented analysis methodology and ensured reproducibility through standardized reporting and version control practices.
SQL & Python-Based Data Automation and Reporting
- Developed optimized SQL queries and Python scripts (Pandas, NumPy) to clean, transform, and analyze large datasets. - Automated recurring reports and data quality checks, reducing processing time and improving reliability. - Supported cross-functional teams by translating raw data into structured, analysis-ready datasets.
Data Pipeline Optimization & ETL Analytics
- Worked on ETL pipelines using tools such as Alteryx, SSIS, and cloud data platforms to integrate data from multiple sources. - Improved pipeline efficiency through query optimization, validation logic, and process standardization. - Ensured consistent, high-quality data availability for dashboards and business reporting.

CERTIFICATIONS

Data Science Certification Program – Simplilearn
Completed end-to-end data science training covering Python, machine learning, statistics, and practical analytics.
Tableau Training Certification – Simplilearn
Hands-on course focused on dashboards, KPI reporting, and interactive visual analytics.
Data Analytics Essentials – Cisco Networking Academy
Covered foundational analytics concepts including EDA, visualization, and data interpretation.
Excel Skills Job Simulation – JPMorgan Chase & Co.
Completed an Excel-focused business simulation involving formulas, pivot tables, and reporting.
