## SUMMARY

Data Analyst with 4+ years of experience delivering actionable insights in healthcare, finance, and marketing. Proficient in SQL, Python, cloud platforms, and BI tools to create scalable ETL pipelines, predictive models, and dashboards. Proven ability at translating complex data into clear, impactful reports that drive decision-making, compliance, and operational improvements. Adept at balancing technical rigor with business acumen to deliver measurable results and strategic value.

## TECHNICAL SKILLS

|                                |                                                                                                                                                                        |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Programming Languages:</b>  | Python, R, SQL, Scala, SAS, NumPy, Pandas, Scikit-learn, TensorFlow, Spark                                                                                             |
| <b>Visualization &amp; BI:</b> | Tableau, Power BI, Excel Dashboards, Advanced Excel, Matplotlib, Seaborn, ggplot2, SciPy                                                                               |
| <b>Databases &amp; ETL:</b>    | SQL Server, PostgreSQL, Oracle, Snowflake, MySQL, dbt, Alteryx, SSIS, SSRS, Apache Airflow                                                                             |
| <b>Cloud &amp; DevOps:</b>     | AWS (S3, EC2), Azure, CI/CD                                                                                                                                            |
| <b>Other Tools:</b>            | Git, GitHub, Bitbucket, Jira, Agile, SDLC                                                                                                                              |
| <b>Data and analytics:</b>     | Data Modeling, Transformation, Visualization, Storytelling, Predictive Modeling, A/B testing, Time Series Forecasting, Hypothesis testing, Marketing and Web Analytics |

## WORK EXPERIENCE

### Data Analyst | UnitedHealth Group, Arizona, USA

Aug 2024 – Present

- Led a cost containment initiative at Kaiser Permanente by analyzing medical claims data using SQL and Python, reducing unnecessary procedures by 12% and saving \$5.2M annually while ensuring HIPAA-compliant governance.
- Developed and maintained ETL pipelines using AWS Glue and SSIS to extract healthcare data from clinical and claims systems, transform it, and load into Amazon Redshift, improving data quality and compliance.
- Designed interactive Power BI dashboards communicating clinical and operational insights to 500+ healthcare providers, accelerating informed decision-making and patient care improvements.
- Built machine learning models on AWS SageMaker to predict patient readmission risks, enabling proactive care management that reduced avoidable hospital stays.
- Conducted A/B testing on member engagement strategies for preventive care programs, increasing participation by 22% and enhancing program effectiveness.
- Collaborated cross-functionally with compliance and clinical teams to optimize data workflows and reporting accuracy.
- Developed advanced SQL queries to detect fraud, waste, and abuse in medical claims, flagging \$1.2M in potential fraud and enhancing financial sustainability and data integrity.

### Marketing Analytics Consultant | Global Health & Body Composition Institute, USA

Jan 2024 – June 2024

- Cleaned and merged fragmented user behavior and survey data using Excel and SQL, enabling basic tracking of course interest and engagement patterns despite limited resources.
- Configured Google Analytics 4 to monitor website KPIs, tracking page views, session duration, and form submissions, providing insights that guided outreach timing and content focus.
- Conducted segmentation analysis revealing student preferences for credit-bearing courses, informing targeted marketing communications and prioritizing outreach to high-potential segments.
- Produced actionable reports summarizing open rates, engagement metrics, and enrollment trends, supporting the marketing team with data-driven decisions to increase course registrations and campaign ROI.

### Data Analyst | Accenture, India

May 2021 – July 2023

- Extracted and optimized 100M+ financial records across SQL Server and Oracle databases, reducing query runtime by 30% and improving data access for financial and regulatory reporting.
- Developed and maintained ETL pipelines using Azure Data Factory and Apache Airflow to extract data and load into Snowflake, ensuring seamless integration and data quality for financial analytics.
- Designed Tableau dashboards integrating SAP FICO financial modules for investment performance, portfolio optimization, and executive reporting, accelerating decision-making with real-time, visually compelling financial intelligence.
- Built predictive machine learning algorithms for credit risk modeling using logistic regression and customer segmentation, improving risk evaluation and loss prediction accuracy for lending decisions.
- Leveraged Snowflake data warehouse micro-partitioning and clustering techniques to cut query response times by 40%, lowering data scan costs and improving reporting efficiency.
- Collaborated with cross-functional stakeholders to design risk models assessing market volatility, reducing portfolio risk exposure by 15% through proactive strategy adjustments.

## EDUCATION

**Master of Science in Management Information Systems** – University of Arizona, Tucson, Arizona, USA

**Bachelor of Technology in Computer Science** – University of Mumbai, India
