SUMMARY

- Product and data analyst with hands-on around 4 years of experience supporting consumer-scale products, working across rider funnels, pricing experiments, and operational metrics in fast-moving environments.
- Currently at Uber, engaging with messy event logs and raw behavioral data to define reliable product metrics, validate experiments, and deliver city-level insights used by product and ops teams to guide rollout decisions.
- Previously managed in software product teams on usage analytics, KPI reporting, and stakeholder-ready insights, bridging gaps between engineering, product, and business teams.
- Known for driving measurable outcomes, including improving conversion and retention metrics and contributing to **\$3M+ in combined revenue impact and cost avoidance** through data-backed product and process decisions.

EXPERIENCE

Uber | Product Data Analyst

Jan 2025 - Current

- Generated rider drop-offs across search, ETA view, and booking screens using **SQL** on event logs, identifying two high-friction steps that led to a **9% increase in completed trips** after fixes shipped.
- Developed weekly city-level demand and cancellation dashboards in **Tableau**, helping ops teams rebalance driver incentives and reduce peak-hour rider cancellations by **7%**.
- Ran controlled A/B tests on fare transparency and ETA messaging using **SQL + Python**, validating a variant that improved booking conversion by **5.4%** without increasing support tickets.
- Created rider and driver cohorts in **SQL** to study churn patterns after surge pricing events, informing pricing guardrails that lowered short-term rider churn by **6%** in pilot markets.
- Automated product KPI reporting with **Python and scheduled SQL jobs**, cutting manual reporting time by **40%** and giving product managers same-day visibility into experiment results.

Vivma Software Inc. | Business Intelligence Analyst

May 2022 - Aug 2023

- Spearheaded product usage and feature adoption data using **SQL** on application event tables, identifying low-engagement workflows that led to a **14% increase in weekly active users** after product changes.
- Orchestrated automated product KPI dashboards in **Power BI** covering funnels, retention, and error rates, cutting ad-hoc data requests from product managers by **35%**.
- Performed cohort and retention analysis in **Python (Pandas)** to compare new vs existing users, helping prioritize onboarding fixes that improved 30-day retention by **8%**.
- Prepared monthly executive summaries combining **SQL extracts and Excel models**, translating raw metrics into clear product recommendations used in roadmap planning.

Adons Softech | Data Analyst

Feb 2021 – Apr 2022

- Built weekly and monthly performance tracking models in **Microsoft Excel (Power Query, Pivot Tables)** to monitor revenue, cost leakage, and volume trends, helping business teams identify actions tied to **\$1.6M in incremental revenue improvement**.
- Created standardized management reports in **Excel and PowerPoint** for leadership reviews, replacing inconsistent team-level reporting and improving decision turnaround time by **30%**.
- Evaluated customer activity, billing adjustments, and support outcomes using **Excel-based reconciliations**, uncovering recurring process gaps that reduced avoidable credits and write-offs by **\$900K**.
- Coordinated with operations and finance teams to define reporting logic and metric definitions using **Excel and Jira**, improving forecast reliability and cutting revision cycles by **25%** during planning windows.
- Maintained ongoing KPI scorecards in **Excel** covering volume, turnaround time, and quality metrics, enabling managers to address performance dips and avoid **\$1.2M in downstream operational risk**.

TECHNICAL SKILLS

Data Analytics & Visualization: SQL, Python, Tableau, Power BI, Microsoft Excel (Power Query, Pivot Tables), Dashboarding, Data Visualization, Data Storytelling, Geospatial Analysis, Predictive Analytics

Product & User Analytics: Funnel Analysis, Cohort Analysis, A/B Testing, Experiment Validation, Product Metrics, KPI Reporting, Retention Analysis, User Behavior Analysis, Customer Journey Analysis, Product Performance Analysis

Statistical Analysis & Modeling: Statistical Analysis, Regression Analysis, Predictive Modeling, Data Mining, Anomaly Detection

Data Engineering & Platforms: ETL Processes, Data Warehousing, Query Optimization, Data Integration, Data Transformation, Data Lake, Data Architecture, Cloud Data Storage, Data Governance, Data Security

Business Intelligence & Insights: Reporting Automation, Performance Tracking, Revenue Analysis, Cost Analysis, Volume Trend Analysis, Process Gap Analysis, Business Performance Management, Market Trend Analysis, Business Case Development

EDUCATION

University of Texas at Dallas, Richardson, TX | Master of Science in **Information Technology Management** | May - 2025
