EDUCATION

Master of Science in Information Systems | Northeastern University | Boston, MA | GPA: 3.82 Expected May 2026
Relevant Courses: Database Management, Data Architecture and Business Intelligence, Data Governance
Bachelor of Computer Science and Specialization in Artificial Intelligence | Vellore Institute of Technology | India Sep 2020 – May 2024
Relevant Courses: Data Analysis and Visualizations, Cloud Computing, Artificial Intelligence

PROFESSIONAL EXPERIENCE

Align Associates Jun 2023 – May 2024
Data Analyst Chennai, India

- Collected, cleaned, and analyzed **1M+ product interaction** records using **SQL and Python** to evaluate engagement shifts, regressions
- Performed **EDA and anomaly detection** to identify outliers, contributing to an estimated **\$2.3M reduction in projected churn risk**
- Performed ad hoc analysis and hypothesis testing (T-test, A/B Testing) to compare feature performance across user segments and regions, identifying **35% variance in activation and retention rates**
- Developed **7+ Power BI dashboards** with optimized data models to track adoption and experiment KPIs, reducing decision cycles by **15%**
- Collaborated in an **Agile setting** using Azure DevOps cross-functional coordination with product and engineering teams

VIT Chennai Jan 2023 – Feb 2024
Research and Development Analyst – [\[IEEE\]](#) Chennai, India

- Assessed **multi-year dataset** across 15+ HR variables using Python and SQL to assess churn trends and identify high-risk attrition segments
- Cleaned, validated, and reconciled** 50K+ records using SQL joins and window functions, resolving inconsistencies to improve accuracy
- Designed Machine Learning **predictive models** using scikit-learn, increasing accuracy to 90% and reducing false positives by 20%
- Translated findings into **clear reports and Excel-based visuals** for non-technical stakeholders, increasing data engagement by **40%**

TECHNICAL SKILLS

Programming & Databases: SQL RDBMS, PostgreSQL, MySQL, Python (Pandas, NumPy, Matplotlib, Seaborn), MongoDB, BigQuery
BI & Visualization: Power BI, Tableau, Looker Studio, Excel (INDEX/MATCH, Power Query, Pivot, Power Pivot, Macros/VBA)
ETL & Data Engineering: Azure Data Factory, Alteryx, Apache Airflow, DBT, Power Automate
Cloud & Warehousing: Azure (Data Lake, ADF), AWS (S3, Lambda), Docker, Databricks, Power Apps, Snowflake, Redshift
Collaboration & Tools: GitHub, Azure DevOps, Jira, Confluence, Microsoft Office Suite

CERTIFICATIONS

OCI Generative AI Professional 2025 (Oracle), Hadoop and Spark 2025, Oracle Analytics Cloud Professional 2025

PROJECTS

SaaS User Behavior Analytics & Cloud Data Pipeline Automation | SQL, Alteryx, Azure Data Factory, Snowflake, Tableau

- Conducted **exploratory analysis on 1.5M+** search and clickstream records to identify user intent signals and behavioral patterns
- Cleaned data using Alteryx, **resolving 12+ data quality issues** and improving downstream analysis accuracy by 40%
- Automated **7+ ETL pipelines** in Azure DF to centralize multi-source data into Snowflake enabling analytics and reproducible reporting
- Delivered interactive **Tableau dashboards** with **root cause analysis** and real-time filters across 10+ KPIs (CTR, search-to-click conversion, query success rate, bounce rate), reducing manual reporting workload by 60%

E-Commerce Sales & Funnel Analytics | Databricks, PySpark, SQL, MongoDB, DBT, Looker

- Processed 100K+ records across **6 sources** in Databricks, integrating MongoDB and applying **DBT-style transformations**
- Computed **8 sales metrics** using Spark SQL and PySpark, leveraging multi-table joins, CTEs, aggregations, date filtering and window functions
- Designed Looker Studio dashboards to **track sales** and funnel behavior, supporting **trend analysis** and 12+ KPI reporting for ops teams

Media Content Insights & Metadata Analytics Platform | Azure Data Factory, Hadoop, Alteryx, Tableau, GitHub

- Architected ER diagrams to structure **12+ dimension tables** and ingested 20M+ records through Alteryx and Hadoop for **BI analysis**
- Computed **10+ end-to-end ADF workflows**, incorporating Databricks for scalable transformations and Power Query for final data shaping
- Published and deployed **8+ Tableau dashboards** in an agile environment, visualizing 12+ KPIs across genre performance, rating trends and review distributions for content analytics teams

Cloud Infrastructure Health & Reliability Monitoring | Python, SQL, Airflow, AWS Redshift, PowerBI

- Evaluated 2M+ system logs (CPU load, memory spikes, node failures) to detect performance risks, outliers, and downtime patterns
- Transformed raw logs using SQL to resolve schema inconsistencies and duplicates, improving data quality by **35%**
- Built **4+ automated ETL pipeline** using Apache Airflow into AWS Redshift for performance analytics
- Produced **5+ Power BI dashboards** enabling incident detection (**40% faster**) by SRE/DevOps teams and improved resource utilization
