Summary

Data-driven Computer Science student with a Business background, experienced in analyzing engagement and performance data to generate actionable insights that support learning outcomes and decision-making. Skilled in Python, SQL, Excel, Tableau, and data visualization.

Education

North Park University

Bachelor of Science in Computer Science

Minor in Business Administration

Coursework: Information Systems, Statistics, Programming, Databases

Chicago, IL

GPA: 3.64

Expected Graduation: May 2027

Experience

North Park University

Peer Coach

Chicago, IL

August 2025 – Present

- Analyzed engagement and performance metrics for 20+ freshman students to identify at-risk trends and recommend targeted interventions.
- Collaborated with faculty and advisors to align support strategies with academic objectives and stakeholder needs.
- Monitored outcomes, documented findings, and refined action plans based on data-driven insights.

VTL Trading Company Limited

Data Support Intern

Ho Chi Minh, Vietnam

May 2025 – August 2025

- Cleaned and validated 150+ monthly sales transactions, improving data reliability for operational and leadership reporting.
- Designed structured Excel-based workflows to streamline data tracking, reduce manual errors, and support process consistency.
- Prepared weekly and monthly performance summaries used for planning, forecasting, and cross-functional decision-making.

Broward College

Marketing Analyst Intern

Ho Chi Minh, Vietnam

August 2023 – November 2023

- Analyzed stakeholder requirements and developed data-driven insights to support enrollment and marketing strategies.
- Coordinated with cross-functional teams to align campaign objectives with institutional goals.

Personal Projects

Superstore Sales Analysis | Excel, Tableau, SQLite

December 2025 – January 2026

- Analyzed 10,000+ retail transactions to evaluate sales trends, category performance, and regional profitability.
- Identified Q4 seasonality, top-performing categories, and underperforming regions using structured analysis.
- Translated findings into dashboards and summary reports to support data-driven decisions.

Local Weather Tracker – Python, Flask, PostgreSQL

August 2025 – December 2025

- Built a scalable data pipeline to collect and structure multi-city weather data, enabling consistent analysis of time-based trends.
- Designed relational databases and SQL queries to transform raw API data into analysis-ready datasets.

Viet Flash Card – Python

January 2025 – May 2025

- Developed a Python-based application to manage user sessions, track progress, and generate performance summaries.
- Defined functional requirements and implemented core logic to support personalized learning workflows.
- Analyzed user progress patterns to identify learning bottlenecks and support data-informed feature improvements.

Leadership & Activities

Nexus Entertainment Club

Founder & President

Ho Chi Minh, Vietnam

Nov 2023 – June 2024

- Led a 25+ member team to deliver multimedia and web-based content projects.
- Secured ~\$1,000 USD in funding through partnerships and community initiatives.

Polo Ethnic Boarding Primary School

Teaching Assistant & Group Leader

Ha Giang, Vietnam

August 2023 – December 2023

- Delivered English and basic technology lessons to 200+ students.
- Collaborated with educators to design engaging, age-appropriate learning activities.
