SUMMARY

Entry-Level Data Analyst with a Master's degree in Data Analytics and a strong foundation in SQL, Python, Excel, Tableau, and Power BI. Experienced in data cleaning, exploratory data analysis (EDA), dashboard development, Reporting, and business insights. Proven ability to analyze large datasets, automate reporting processes, and support data-driven decision-making. Seeking Data Analyst, Business Analyst, or Technical Analyst roles. Understanding the data, operations, clients, and processes.

EXPERIENCE

Client Services / Operations Associate

(Aug 2025 – Present)

- Assisted clients with medical, life, and auto insurance services, providing policy explanations, enrollment support, and issue resolution
- Managed and maintained client records, case files, and service requests, ensuring data accuracy, confidentiality, and compliance
- Coordinated vehicle and housing rentals, tracking requests, documentation, and service timelines
- Acted as a liaison between clients and service providers, supporting smooth case coordination and service delivery
- Handled cash transactions and documentation, ensuring accurate records and compliance with internal procedures
- Supported daily operations and administrative reporting, improving workflow efficiency and response times
- Utilized strong communication, problem-solving, and organizational skills to support high-volume client interactions

System Administrator — Al Manahel Private School, Yemen (Jan 2022 – May 2022)

- Supported and maintained databases, IT systems, and user accounts for 200+ staff and students
- Analyzed system usage and operational data to identify recurring technical issues, reducing resolution time
- Created technical documentation and analytical reports to improve IT support workflows and efficiency
- Assisted users with data access, troubleshooting, and system performance optimization
- Collaborated with cross-functional teams to ensure system reliability and data availability

Researcher / Author – Mask Detection (AI) — India (May 2021 – Dec 2021)

- Built and analyzed a dataset of 9,205 images, performing data preprocessing, cleaning, labeling, and validation
- Improved object detection accuracy by 8.6% mAP using YOLOv3 and YOLOv4 models
- Conducted performance analysis and data visualization to evaluate model accuracy and efficiency
- Prepared analytical reports and technical documentation for peer-reviewed research publication
- Deployed a real-time detection model on Raspberry Pi and analyzed live performance metrics

EDUCATION

Master of Science in Management – Data Analytics (2025)

Indiana Wesleyan University — GPA: 3.78/4.0

Bachelor of Computer Applications (2021)

University of Mysore, India — Aggregate: 76.03%

SKILLS

Data Analysis, Data Analytics, SQL (Joins, Subqueries, Aggregations), Python (Pandas, NumPy – Basic), Microsoft Excel (Pivot Tables, VLOOKUP, XLOOKUP), Tableau, Power BI, Data Visualization, Dashboard Development, KPI Reporting, Business Insights, Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), Reporting, Ad-hoc Analysis, Relational Databases, Data Extraction, IT Support, System Administration, Artificial Intelligence (Basic), Machine Learning (Basic), YOLOv3 / YOLOv4, Problem Solving, Communication Skills, Attention to Detail, Time Management, Team Collaboration Insurance Services, Insurance, Client Relations, Case Coordination, Compliance Documentation, Operations Support, Interpersonal Communication, Communication
