

RISHIKA RAVI KUKUTTALA

Texas, USA | +1 (682) 970-0132 | rishika.ravi0@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience in SQL, Python, Excel, and BI tools. Skilled in validating and reconciling data sets, building and maintaining Power BI models, and automating ETL pipelines to ensure accurate KPI tracking. Proven ability to collaborate with finance, operations, and procurement teams to translate complex data into actionable insights and streamline project management processes.

SKILLS

- **Data Analysis & Programming:** Python, Pandas, NumPy, SQL, PostgreSQL, MySQL, SQL Server, Data Cleaning, Data Validation, Exploratory Data Analysis
- **Business Intelligence & Reporting:** Power BI, Tableau, Excel, Advanced formulas, Pivot Tables, Power Query, KPI Definition, Metrics Frameworks & Performance Tracking, Dashboard Design, Data Storytelling, Automated Reporting, Weekly Reporting, Monthly Reporting, Data Visualization Tools
- **Analytical Techniques:** Descriptive Analysis, Diagnostic Analysis, Trend Analysis, Regression Analysis, Forecasting, A/B Testing, Hypothesis Testing, Correlation Analysis, Variance Analysis, Analytical Problem-Solving
- **Data Management & Tools:** ETL Pipelines, Data Modeling, Data Warehousing, Snowflake, Relational Databases, Git, JIRA, Confluence, ServiceNow
- **Tools & Platforms:** AWS, S3, EC2, Lambda, API Data Extraction, Workflow Automation
- **Industry Knowledge & Certifications:** Construction Management Software, Industry Regulations Knowledge, Certification In Data Analysis

PROFESSIONAL EXPERIENCE

Uplink Works LLC

Nov 2025 - Present

Data Analyst

- Gathered and documented business requirements from marketing, finance, and operations teams using stakeholder interviews and requirement templates, which defined clear KPIs, reporting needs, and success metrics for the organization
- Collected, cleaned, and validated data from SQL databases, REST APIs, and external CSV files using Python and Excel, ensuring weekly and monthly reports were accurate and reliable
- Performed exploratory, trend, and variance analysis to identify performance gaps, risks, and improvement opportunities for business stakeholders, applying analytical problem-solving to interpret complex data sets.
- Built and maintained Power BI and Tableau dashboards tracking operational KPIs, enabling leadership to monitor performance and make data-driven decisions.
- Delivered ad-hoc analysis and automated recurring reports, reducing manual reporting effort and improving turnaround time.

University of Texas at Arlington

Feb 2025 - Oct 2025

Research Assistant (Data Analytics)

- Analyzed structured and unstructured datasets with Python and SQL, delivering diagnostic insights that supported research conclusions and operational decisions
- Built automated data ingestion and processing workflows, improving data availability and reducing manual data preparation time.
- Applied statistical and text analytics techniques in Python to extract trends from document datasets, uncovering key patterns that guided the research strategy
- Leveraged certification in data analysis to develop interactive dashboards in Tableau and visual reports with Python (Matplotlib), communicating insights to technical and non-technical stakeholders.

Smartroniverse

Jan 2021 - Nov 2022

Junior Data Analyst

- Gathered reporting requirements and business rules from finance and operations teams using stakeholder interviews and documentation templates, incorporating industry regulations knowledge to enable the development of KPI dashboards that provided real-time visibility for senior management
- Built and maintained ETL pipelines with Python, SQL Server, AWS EC2, and construction management software that integrated data from finance, sales, and inventory systems into a centralized reporting dataset, significantly reducing data-preparation effort for analysts
- Designed Power BI dashboards and Excel reports that visualized KPIs, sales trends, and operational metrics, allowing business users to spot performance gaps and make faster, data-driven decisions
- Performed forecasting and regression analysis to support demand planning, improving forecast accuracy by approximately 15%.
- Supported process improvement initiatives by enhancing data quality checks and reducing reporting delays.

Bharat Electronics Limited

Oct 2020 - Dec 2020

Analyst

- Analyzed operational and telemetry data using SQL and Python and employed data visualization tools to produce performance and variance reports for engineering teams.

- Automated data processing and reporting workflows, enabling faster access to operational metrics and insights.
- Supported database integration and data accessibility initiatives to improve analysis efficiency and decision-making.

PROJECT EXPERIENCE

ServiceNow Ticket Analytics

University of Texas at Arlington

- Analyzed ServiceNow ticket data using **SQL and Python** to identify recurring issues, bottlenecks, and escalation patterns across support workflows.
- Defined KPIs and built dashboards tracking resolution time, ticket volume, backlog, and repeat incidents.
- Performed **trend, variance, and predictive analysis** to identify high-latency tickets and priority drivers impacting service performance.

Traffic & Accident Data Analysis

University of Texas at Arlington

- Analyzed multi-year traffic and accident datasets using Python and R to identify high-risk intersections and traffic trends.
- Performed correlation analysis and statistical significance testing to evaluate relationships between vehicle volume and accident occurrence.
- Delivered visual reports and summary dashboards to support traffic management and safety planning.

EDUCATION

University of Texas at Arlington

Master of Science, Data Science

- **GPA:** 3.9

Jan 2023 - Dec 2024

Arlington, Texas

KS Institute of Technology

Bachelor of Engineering, Electronics & Communication

- **GPA:** 3.9

Aug 2018 - Jul 2022

Bengaluru, Karnataka
