

GIOVANNI ROJAS

Software Engineer

San Francisco, CA | gio.d.rojas415@gmail.com | giovanni-rojas.github.io | linkedin.com/in/GioRojas | 415-307-8752

WORK EXPERIENCE

Checksum.ai

Oct. 2025 – Current

Forward Deployed Engineer

- Developed/maintained >500 e2e automated Playwright tests with suites covering 20+ enterprise client applications
- Enhanced test automation infrastructure by configuring CI/CD integration with GCP, Git workflows, and Slack reporting
- Implemented OAuth flow, REST API endpoint, and multi-account usage testing using customer-specific helper utilities
- Maintained active customer comms to triage issues, manage shifting requirements, and prioritize tickets across projects
- Leveraged parallel AI agents to refine suites, maintaining 20-60s single test execution/15-30min total suite runtimes

Cruise

Feb. 2021 – Dec. 2023

Program Analyst

- Led Cority integration and launch (Health & Safety Compliance SaaS), improving injury reporting SOP for 750+ workers
 - Sourced, installed, and trained a 10-person team to develop a single source of truth for workplace safety metrics
 - Used Mulesoft to connect Workday and Cority APIs, syncing employee data to automate compliance reporting
- Created step-by-step Confluence docs covering software integrations, reporting tools, and safety compliance SOPs
- Developed and published COVID dashboards across offices, leveraging public and workforce data with Google Scripts

Safety Analyst

- Published monthly incident reports using Excel & Slides; managed COVID test result tracking across SF, PHX, and Austin
- Coordinated regular cross-functional meetings on facility safety with vehicle tech, security, operations, and HR teams

PROJECTS

Support SF Schools (Open Source Public School Donation Aggregator)

- Converted static school pages to dynamic API-calls, improving load time by 20% (Lighthouse tested) for 100+ schools
- Migrated project from NextJS versions 13 to 15, refactoring cookies, resolving async API changes, dependency upgrades
- Enhanced site accessibility and UX by adding keyboard navigation, semantic headings, and interactive components
- Collaborating in weekly code review and cross-team stand-ups to align progress toward the project's Fall 2025 launch

Goodplay (Fantasy Basketball Helper)

- Delivering live player projections and team insights via integration with ESPN's API into managed PostgreSQL database
- Optimized backend with Next serverless functions and caching, reducing total API calls to avoid excessive requests errors
- Designed intuitive and responsive UX with Tailwind CSS and clean visualizations for player stats and trends
- Developed a draft analyzer for 450+ NBA players using custom ranking algorithms and weighted models to rank players

Speedtester (Internet Speed Analyzer)

- Created a React front-end to the cloudflare/speedtest API to run live network tests in < 45 seconds on average
- Implemented custom progress animations and live meter updates for smooth UX and accurate multi-step visualizations
- Integrated IP geolocation via ipify + speedtest.net APIs to show closest server and ISP with 25-mile accuracy
- Wrote a suite of Jest and Playwright tests with npm scripts to automate integration deployment to Github Pages

Facefind (Full-Stack Face Detection App)

- Built a React UI that handles file and URL image inputs and manages upload with loading state hooks and error handling
- Integrated Clarifai's Face Detection API, sending async image payloads and parsing JSON results to render face boxes
- Designed backend in Node.js and PostgreSQL and deployed to Github Pages, serving ~1,000 image submissions

EDUCATION

University of California, Santa Barbara

Bachelor of Science, Computer Science

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Web Development, AI/ML

SKILLS

Languages: JavaScript, Typescript, Python, Java, C++, SQL

Frontend Stack: React, Next.js, jQuery, Redux, HTML, CSS, Bootstrap, Tailwind CSS, Figma, ES6

Backend Stack: Express, NodeJS, Spring, PostgreSQL, Django, FastAPI, Flask, Redis, OAuth, Redis, GraphQL, REST APIs

Testing Tools/IDEs: Jest, Playwright, Lighthouse, Pytest, JUnit, DevTools, Postman, Posthog, VSCode, Linux/Unix

DevOps and Cloud: Azure (AZ-900), AWS, Vercel, Github Actions, Jira, Docker, Confluence, Agile & CI/CD Practices
