

ABHAYA LADALLA

Denton, TX 76205 | +1 (940) 442-1470 | abhaya2it7@gmail.com | <http://www.linkedin.com/in/abhaya-ladalla-323779215>

SUMMARY

Graduate Research Assistant with expertise in designing and automating ETL pipelines and transforming raw biometric and pose-detection data into analytics-ready datasets on GCP and Azure. Skilled in data modeling (star and snowflake schemas), SQL optimization, and generating detailed reports with Power BI and Tableau. Proven ability to deliver insights-demonstrated by the MindYoga wellness app-to support data-driven decision making.

EDUCATION

University of North Texas

Dec 2025

Master of Science, Information Science – Information Systems (GPA: 4.0)

- **Achievements:** Specialization: Information Systems, Data Analytics, Big Data, Data Modelling

Kakatiya Institute of Technology and Science, Warangal

Jun 2023

Bachelor of Technology, Information Technology (GPA: 3.68)

TECHNICAL SKILLS

- **Data Engineering and Warehousing:** ETL Pipelines, Data Modeling (Star/Snowflake), Hadoop, Hive, Spark (Dataproc), Data Quality, OpenRefine, Process Optimization, Azure Data Factory, CI/CD Basics
- **Data Analytics & Visualization:** Power BI, Tableau, Excel
- **Programming & Analytics:** Python (Pandas, NumPy, Matplotlib), SQL, Java, C++, Data Structures (C), Machine Learning Foundations, Algorithms, Statistics
- **Web Technologies:** HTML, PHP, JavaScript, XML
- **Database & Systems:** MySQL, Oracle DB, SQL Server, z/OS (Mainframe), HDFS
- **Cloud Platforms:** Google Cloud Platform (GCP): Dataproc, Cloud Storage, BigQuery (basics), Azure
- **Design and 3D Tools:** Adobe Suite, Unity 3D, Vizard, 3ds Max, Canva
- **Industry Expertise:** Consulting Experience, Tech Industry Experience

WORK EXPERIENCE

University of North Texas | *Graduate Research Assistant*

Jul 2025 - Dec 2025

- Developed the MindYoga mobile app using HTML and Azure services, integrating YOLOv11 pose-detection models with iHealth biometric devices to enable users to monitor activity and wellness indicators, resulting in continuous wellness tracking for users
- Automated data-ingestion workflows on GCP Dataproc Spark clusters to transform raw biometric and pose-detection outputs into analytics-ready datasets, developing snowflake data models and performing statistical profiling, which improved model accuracy and reduced preprocessing time
- Documented information flows, ETL operations, and testing processes based on CI/CD practices, ensuring reproducible, scalable deployments and maintainability
- Structured device-readings and unstructured pose-detection data to generate actionable insights for healthcare and mental-wellness decision-making using statistical analysis and data visualization

Asian Student Achievement | *Graphic design intern*

Jan 2025 - May 2025

- Designed social media posts and promotional flyers in Canva, using audience survey data to tailor visuals, which increased overall engagement
- Collaborated with the communication team for guidelines and participated in weekly meetings and receiving feedback to improve design outcomes by 25%.

University of North Texas | *Student Assistant*

Oct 2024 - Sep 2025

CERTIFICATIONS

- Accenture- Data Analytics and Visualization Job Simulation – Forage
- Python Basics – Coursera
- Cybersecurity Virtual Internship Program 2021-Cisco
- SQL Masterclass: SQL for Data Analytics-Udemy
- Database Programming with SQL - Oracle
- Python for Beginners: Learn Python Programming – Infosys Springboard
- IBM Z Xplore - In progress
- SQL Basic- Hacker Rank

PROJECT EXPERIENCE

Hackwell Hackathon- AI Clinical note summarization assistant

Oct 2025

University of North Texas

- Developed AI-powered assistant that converts patient and doctor dialogues and summarizes the conversation using SOAP notes using GPT 4 and Whisper, reducing clinical documentation time and improving care coordination.
- Applied problem solving and analytical skills to handle unstructured audio and summarize data.

Lost in Wilderness – VR Survival Game

Jan 2025 - May 2025

University of North Texas

- Designed and developed a non-immersive VR survival game using UNITY 3D, 3ds Max to stimulate realistic scenarios.
- Coordinated tasks across scripting, designing environment which demonstrates teamwork, time management and communication.

Nutritional Breakdown of Foods Dataset

Jan 2025 - May 2025

University of North Texas

- Conducted the exploratory data analysis on the nutritional dataset and cleaned raw data to enable the nutritional analysis based on categories.
- Designed interactive Tableau dashboards like heat maps, scatter plots, and bar charts.
- Created a visualization that will help public health, food labelling to make decisions on diet which applied attention to detail and critical thinking.

Senior Citizen Activity & Mental Health Big Data Pipeline

Aug 2024 - Dec 2024

University of North Texas

- Built end-to-end ETL pipeline using dataproc and spark cleaning and transforming multi source data sets for analytics.
- Large-scale data ingestion and quality rules automatically implemented to cut down on processing time and enhance data consistency.
- Formulated SQL-based transformations and dashboards, which shows high data warehousing and profiling ability.

Health Information System

Jul 2021 - Oct 2021

Kakatiya Institute of Technology and Science, Warangal

- Designed a Health Information System using a relational Database Management System to record patient details, appointments, and bills.
- Designed analytical SQL reports to monitor the visits, revenue trends and appointment trends of patients to make superior decisions.

Traffic sign detection using YOLOV3 Algorithm

Aug 2022 - May 2023

Kakatiya Institute of Technology and Science, Warangal

- Implemented a real-time Traffic Sign Detection using YOLO V3(You Only Look Once) object algorithm detection and improved.
- Conducted data analytics on detection results to evaluate model performance metrics and served as team lead, which strengthened leadership, teamwork and problem solving skills.

AWARDS AND HONORS

- **COI/IS LISC Excellence Scholarship (2025):** Awarded for achieving a 4.0 GPA and outstanding academic performance in the College of Information

PAPER PUBLICATION

- Mobile Health App. *April 2022- Jul 2022; Thirteenth International Conference on Advances in Communication, Network, and Computing-CNC 2022*
